CURRICULUM VITAE PRODUCT MANAGER

Philipp Hilbert.*Product Manager.*

Positioning , AI-native Product Manager turning complex operational workflows into shippable software , across regulated, public-sector, and founder-led environments.

Berlin, Germany philipp@projuncta.com true-north-cy.lovable.app

---

PROFILE

Hands-on Product Manager. AI-native operator. Workflow and systems builder.

Nearly ten years of experience translating complex operational workflows into scalable software systems. Background spans AI systems, analytics platforms, regulated environments, founder-level company building, and cross-functional execution. Comfortable operating in ambiguity and high-pressure delivery , where requirements are incomplete, priorities shift, and teams need clarity to move. Fluent in AI-native workflows including GitHub Copilot, LLM-assisted development, rapid prototyping, and autonomous feature delivery.

---

01 , CORE STRENGTHS

- Translating messy operational workflows into dev-ready requirements
- AI-native product execution and rapid prototyping
- Cross-functional stakeholder alignment

- Strong delivery ownership and backlog management
- Product discovery under ambiguity
- Workshop moderation , technical and non-technical
- KPI-oriented product thinking and prioritization
- Technical fluency across modern software systems
- Founder-level pragmatism , low ego, high agency

---

02 , PROFESSIONAL EXPERIENCE

Rohde & Schwarz

2024 , 2025

Product Owner , AI Data Transformation

- Built and operated a central AI and data management platform for multimodal datasets.
- Delivered autonomous production-ready features using GitHub Copilot and AI-assisted workflows.
- Coordinated architects, developers, QA engineers, and data scientists.
- Structured requirements, managed delivery, and resolved technical blockers directly.
- Worked with Kubernetes, Argo Workflows, ArgoCD, Helm, Terraform, Prometheus, Grafana, PostgreSQL, MongoDB, Jenkins CI/CD, and distributed systems.
- Improved data quality, reproducibility, and operational workflows for ML environments.

Federal Employment Agency

2023 , 2024

Product Owner , Public Analytics Platform

- Advanced a large analytics platform for labor market and demographic data.
- Coordinated stakeholders across public-sector and technical teams.
- Introduced structured ETL workflows and modernized operational tooling.

- Managed migration initiatives and complex system dependencies.
- Designed dashboards, admin tooling, and collaborative platform functionality.

Emil Group

2022

Product Owner , InsurTech SaaS Platform

- Stabilized delivery in a high-pressure environment after organizational disruption.
- Rebuilt client trust through structured workshops and transparent communication.
- Split a large overloaded Scrum team into clearer ownership structures.
- Designed and launched a Claims Center module from concept to production.
- Maintained execution clarity between stakeholders and engineering teams.

CLINET Platforms

2021 , 2022

Founding Product Owner , Healthcare App

- Worked in a founding product role on a mobile-first healthcare platform for hospitals.
- Coordinated hospital stakeholders, operations teams, and developers.
- Prioritized delivery aggressively to focus on highest-impact features.
- Structured ambiguous operational requirements into shippable software.
- Integrated external healthcare interfaces into the platform ecosystem.

---

03 , FOUNDER & EARLY-STAGE EXPERIENCE

Kvitt Payment Solutions

2013 , 2018

Founder & CFO

- Built a FinTech startup around consumer payment flows and financial transaction logic.
- Worked on business model, product direction, financing, stakeholder communication, and operations.

Qcrypt AG

2016 , 2018

Founder / Product Owner , Encryption Technology

- Worked on quantum-resistant encryption technology and security-sensitive product positioning.
- Translated complex technical concepts into product, stakeholder, and investment-facing communication.

---

in_vis

Founder-level structuring / VSOP support

- Worked on early-stage company structuring topics including a virtual stock option plan (VSOP).
- Developed practical understanding of incentive alignment, equity participation, and founder-level company building.

Smart Soil Technologies

Co-Founder, Head of Digital / CFO / Project Lead

- Led digital transformation, HR, finance, ERP implementation, investor communication, and operational project work.
- Operated in a low-resource startup environment where focus, speed, and direct ownership were essential.

---

04 , AI-NATIVE STACK

Lovable
polished front-end prototypes

Framer
design-heavy work

Claude Code
in-repo refactors

II-Agent
mixed agent work

Gamma.app
presentations

GitHub Copilot
feature delivery

GPT-4o / GPT-5
spec, edge cases, review

Cursor / VSCode
shipping environment

05 , TECHNICAL ENVIRONMENT

Python, Kotlin, JavaScript, PostgreSQL, MongoDB, Kubernetes, Argo Workflows, ArgoCD, Helm, Terraform, Prometheus, Grafana, Jenkins, GitOps, Docker, RedHat OpenShift, REST APIs, ETL systems, AI-assisted development workflows, GitHub Copilot, LLM-based prototyping.

06 , SELECTED SIDE PROJECT

Liberation of Bajor

GITHUB.COM/HILBERTP/LIBERATION-OF-BAJOR →

A local file queue where AI agents coordinate autonomously , one writes briefs, a watcher picks them up, another executes them, a third reviews the result.

- Multi-agent orchestration loop running end-to-end without human intervention.
- Files on disk as source of truth , no database, no message broker.
- 669+ commits across 298 thin slices, ADR-driven refactors, regression suite with mutex-gated merges.
- Personal lab for AI-native execution, tight feedback loops, dev-ready slices.

07 , LANGUAGES

German , native. English , C2.
