

Philipp Hilbert. *Technical Product Manager, AI Investing Superapp.*

Positioning, fintech PM with 13 years in regulated products, payments, insurance, and AI platforms, who knows where deterministic systems must stay in control.

§ WHY KIRA

KIRA's scope, payments, remittance, insurance, wealth, and trading on a single AI-native platform, is exactly the kind of cross-vertical, high-consequence environment where my work has been strongest. The explicit expectation that AI is a means and not the goal matches how I approach LLM features: evaluate honestly, keep humans in the loop for money-moving decisions, and build the failure handling before the happy path. The call-out that "money is correct and users are never misled about the state of their funds" is the same bar I held at Kvitt, where P2P payment state was the single thing that could never be wrong. *That is precisely the kind of constraint that focuses product thinking.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, pair-coding across Python and SQL
- **Cursor / VSCode**, context-aware editing
- **Lovable**, rapid UI prototyping
- **GPT**, evaluation loops and edge-case generation
- **n8n**, agentic workflow orchestration
- **Gamma.app**, stakeholder decks from structured notes
- **Framer**, design-heavy prototypes

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, OpenShift, Docker, ArgoCD, Helm, GitOps, Jenkins, GitLab, Azure DevOps, Dagster, dbt, SQL, CI/CD pipelines, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace for construction staffing, built zero-to-one as a solo founder.

- Anonymity-until-payment model that protects both firm and worker until commitment is made.
 - WhatsApp and Telegram as the product surface; LLM agents handle intake and qualification across the funnel.
 - Funnel and conversion analysis in SQL; one person runs day-to-day operations by design.
 - Directly relevant: demonstrates full-stack product ownership under resource constraints and agentic workflow judgment.
-

§ HOW I WOULD WORK AT KIRA

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow one complete payment or trade flow end-to-end, from user intent through ledger entry to reconciliation, and document every assumption, failure mode, and undocumented dependency before touching the roadmap.

WEEK 2

Slice the vertical.

Take the highest-priority open initiative, break it into the smallest shippable slice that clears its compliance and technical gates, and align Engineering, Compliance, and Operations on that slice before any sprint starts.

WEEK 3+

Ship, close loops.

Drive the first slice to production, instrument it against the agreed success metric, and use the retro to sharpen the gate-clearing process for the next cycle.

I COVER LETTER

Dear KIRA Hiring Team,

I am applying for the Technical Product Manager role on the AI Investing App. My background sits at the intersection of regulated financial products, technical platform ownership, and AI-native delivery, which maps closely to what KIRA is building.

My most directly relevant experience comes from two sides of the fintech stack. At Kvitt Payment Solutions, I built a mobile group P2P payment product from zero and took it to acquisition by Sparkasse inside the girocard ecosystem. That meant owning payment state correctness as the absolute product constraint, not a nice-to-have, the thing that could never be wrong. More recently, at Rohde & Schwarz, I owned an internal AI and data platform end-to-end: I drove a GitOps rollout that reduced deployment time from days to thirty minutes, and I redirected the entire product strategy based on instrumented workflow analysis when a well-funded UI-led approach recorded exactly zero real clicks. Both experiences taught me the same lesson KIRA's posting articulates clearly: AI is a means, not the goal, and the bar is knowing precisely where deterministic systems must remain in control.

On the regulated dimension, I have worked across insurance (EMIL Group's B2B SaaS platform for insurers and underwriters), health insurance procurement (AOK ITSCare), and defence AI (FCAS programme at Rohde & Schwarz, with data provenance and EU AI Act compliance in scope). Each of these environments required me to build regulatory requirements into the product from the start, KYC flows, audit trails, transaction limits, and privacy constraints, rather than bolt them on at launch. I understand that a fintech or investing platform operating across Southeast Asia carries a layered regulatory surface, and I would approach the KYC, transaction monitoring, and licensing requirements at KIRA the same way.

I am AI-native in practice rather than in title. I use Claude Code, GitHub Copilot, Cursor, n8n, and Lovable daily, for in-repo refactors, agentic workflow design, rapid prototyping, and evaluation loops. I have also developed my own crypto infrastructure tooling, including a backtesting engine and algorithmic trading frameworks, which gives me hands-on fluency with the execution mechanics, perpetuals, DEX routing, slippage, market microstructure, that underpin a wealth and trading product of KIRA's scope. That is not standard PM background, and I think it is relevant here.

KIRA's insistence on moving fast while clearing the gates that actually block launch, regulatory approvals, financial rails, third-party integrations, is the product discipline I find most interesting and most difficult to get right. I have done it in payments, in insurance, and in defence-grade AI. I would like to bring that experience to the KIRA platform.

I am available for an online assessment or practical task immediately and can complete any stage of your process within the one-week window you describe.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years of ownership in regulated industries, payments, insurance, defence AI, and public-sector data platforms, who takes a product vertical from strategy through technical design to production. I hold the bar that money is correct and users are never misled about fund state, build regulatory requirements in from the start rather than at the edges, and apply AI where it genuinely improves an outcome while keeping deterministic systems in control where they must be.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Fintech and Payments: P2P payment flow design, PSP integration, ledger correctness, group payment UX, girocard ecosystem, regulated financial product ownership.

Platform and

Data: ETL (extract, transform, load), Dagster, dbt, PostgreSQL, Kafka, REST APIs, distributed systems, CI/CD, GitOps with ArgoCD, Kubernetes.

Insurance and Regulated Domains: B2B SaaS platform for insurers and underwriters, KYC flows, transaction monitoring, GDPR (DSGVO), Deputy IT Security Officer, audit trails, EU AI Act compliance.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product roadmap and vision, prioritisation, MVP definition, A/B testing, user research, go-to-market support.

Agile and Scaled Delivery: Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.

Technical Environments: Python, Kotlin (Spring Boot), Django, SQL, PostgreSQL, MongoDB, REST APIs, Kubernetes, Docker, OpenShift, ArgoCD, Jenkins, GitLab, Azure DevOps.

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

GitOps rollout cut deployment from days to 30 minutes; 200% pipeline-run increase after redirecting strategy to developer-code-first; led 15+ engineers and data scientists through Scrum on the FCAS European programme AI and data platform.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt, cutting data-update time by 75%; integrated test automation into Jenkins CI; migrated bare-metal to containers; carried full UI relaunch and large ETL migration concurrently. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a failing roadmap to the top 10% of features; user acceptance rose fivefold. Implemented CGM interface into KIS workflows: digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022

Restructured an 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped the Claims Center from concept to production; cut insurance product launch from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS AND POS 2021-2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT SECURE
DATA 2021

Data structures and identity management for the Robert Koch Institute DIM and DESH programmes.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE
PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production. Backlog refinement, user stories and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING MARKETPLACE 2025-2026

Zero-to-one two-sided B2B marketplace; LLM agents across the funnel; anonymity-until-payment model; funnel and conversion analysis in SQL.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped a three-layer enterprise product installing in under two minutes; later Chair of the Board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY AND AGRICULTURE 2018-2021

Took a fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group-based P2P payments from zero to acquisition by Sparkasse inside the girocard ecosystem.
