

Philipp Hilbert. *Technical Product Manager, AI Investing.*

Positioning, fintech-native product manager with 13 years owning regulated products end-to-end, from payments and insurance to defence AI, who knows when to let a model decide and when to keep the ledger deterministic.

§ WHY BJAk

Bjak is doing something harder than building a trading app: it is building a financially correct, regulatorily compliant superapp across payments, insurance, and wealth in Southeast Asia, a region where the rails are inconsistent and the regulatory perimeter changes by country. The job description is explicit that money must always be in a known state and users must never be misled about their funds, which is exactly the discipline that separates real fintech from feature demos. The fact that Bjak treats AI as a means rather than a goal, and calls out explicitly that deterministic systems must remain in control where correctness matters, is the kind of engineering-honest stance that makes a product worth owning. *That is exactly the environment where careful, outcome-first product thinking compounds.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and implementation work
- **Cursor / VSCode**, assisted refactoring and feature slicing
- **GitHub Copilot**, accelerated development loops
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy interaction work
- **GPT**, structured reasoning, evaluation drafts
- **n8n**, agentic workflow orchestration

- **Gamma.app**, stakeholder-facing document production
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built zero-to-one, solo.

- Matches construction firms with workers, removing the headhunter from the hire through an anonymity-until-payment model.
 - WhatsApp and Telegram as the product surface; LLM agents across the funnel so one operator runs day-to-day operations.
 - Funnel and conversion analysis in SQL; agentic file-queue-based loops handle matching and follow-up.
 - Directly relevant to Bjak: proves ability to design agentic workflows with real-money commitment gates, human-in-the-loop checkpoints, and failure handling under uncertainty.
-

§ HOW I WOULD WORK AT BJAК

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the engineering and compliance leads on the investing vertical, map the current data flows and ledgering logic end-to-end, and locate the open questions around regulatory approvals and third-party financial rail dependencies before touching the roadmap.

WEEK 2

Slice and validate.

Take the vertical's backlog, apply correctness-first prioritisation, anything that could leave money in an unknown state goes to the top, and validate that the stated metrics actually track the outcomes we care about.

WEEK 3+

Ship, unblock, close.

Own the first launch-gating decisions: define the evaluation criteria for any AI feature entering the investing flow, write the failure-handling spec for the external financial rails, and align compliance, treasury, and engineering on a release checklist that does not stall on ambiguity.

I COVER LETTER

Dear Bjak team,

Bjak's investing superapp is technically harder than most fintech products, and the job description names the reasons honestly: real money, external financial rails, regulatory requirements that vary by country, and the discipline to know when AI improves an outcome versus when it introduces unacceptable uncertainty. That is the class of product problem I have spent the last decade working on, and it is the reason this role caught my attention.

My background spans regulated, high-consequence product domains: a P2P payments startup I co-founded at Kvitt Payment Solutions was acquired by Sparkasse and operated inside the girocard ecosystem. I shipped an insurance B2B SaaS platform at EMIL Group from concept to production, restructured the delivery organisation to stop attrition, and cut the time to launch a new insurance product from months to under a week. At Rohde & Schwarz I owned an AI and data platform for a multinational defence programme, where the correctness bar is absolute and the audit trail is not optional. Across these roles the through-line is the same: own the vertical end-to-end, make the trade-offs legible, and keep money or data in a known state.

On the AI side: I use AI tooling daily in my own work, Claude Code, Cursor, GitHub Copilot, Lovable, and agentic workflows in n8n, and I have built evaluation loops and human-in-the-loop checkpoints into production systems. I take the same position Bjak does: AI is a means. For an investing product, the settlement ledger and the transaction state machine stay deterministic; AI earns its place in the user-facing layer and the analytics layer, with explicit evaluation criteria and fallback paths. I have written those specs and defended them to engineers and to compliance teams.

Southeast Asia's regulatory environment is fragmented by design, which means shipping across payments, insurance, and wealth requires a PM who can hold the regulatory requirements inside the product spec, not alongside it. I built that skill at the Federal Employment Agency handling national-scale data under German public-sector governance, and at CLINET Platforms integrating into hospital information systems under clinical-workflow constraints. The pattern transfers.

I am remote-capable, comfortable in distributed international teams, and available at short notice. I would be glad to work through a practical task or technical interview quickly, the one-week process you describe suits me well.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Technical Product Manager with 13 years of product ownership across fintech, insurance, regulated data platforms and defence AI. I own verticals end-to-end, strategy, roadmap, technical design, delivery, and launch, and have repeatedly shipped in domains where money, identity, or safety-critical data must remain in a correct and auditable state. I design AI features with explicit evaluation criteria and know when to keep the system deterministic.

§ WHAT I CAN DO

Regulated product domains: fintech, payments, insurance platform, public-sector analytics, defence AI, healthcare, identity management

Technical product design: system architecture review, API and data flow design, ledgering and reconciliation logic, failure handling, distributed systems, REST APIs

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI)

SDLC and Delivery: GitOps with ArgoCD, CI/CD, Jenkins, containerised environments, Kubernetes, Docker, branching strategy, release gating, same-day hotfix paths

Data and Analytics: ETL, Dagster, dbt, PostgreSQL, MongoDB, Kafka, KPI definition, funnel analysis

Product Ownership: roadmap, backlog refinement, user stories, acceptance criteria, Jira, Confluence, Scrum, Kanban, SAFe

Stakeholder and Leadership: cross-functional alignment across engineering, compliance, treasury, operations; C-level reporting; workshop facilitation

Governance: GDPR, Deputy IT Security Officer, EU AI Act, identity management, budget ownership

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024-2025

AI and data platform for the FCAS European programme. Led 15+ engineers and data scientists; GitOps rollout cut deployment from days to 30 minutes; pipeline utilisation up 200% after redirecting strategy from UI-first to developer-code-first based on instrumented workflow data.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

National labour-market analytics platform. Introduced Dagster and dbt, saving ~75% of time per data update; migrated bare-metal to containerised environments; integrated Jenkins test automation; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023-2023

Mobile patient app. Cut roadmap to top 10% of features; user acceptance rose fivefold. Integrated CGM hospital information system interface, reducing anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022-2022

Restructured 18-person delivery org into three lean teams; attrition near-eliminated. Shipped Claims Center zero to one. Cut insurance product launch time from months to under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS 2021-2022

POS and forecourt systems. Moved research results into production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER · SECURE DATA PLATFORM
2021-2021

Government identity management. Data structures for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER · HEALTH INSURANCE 2019-2020

B2B procurement webshop. Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · ENERGY 2019-2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING 2025-2026

Zero-to-one two-sided B2B marketplace. Anonymity-until-payment model, WhatsApp/Telegram product surface, LLM agents across the funnel, SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY 2018-2021

Fertiliser product from lab to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments platform, built zero to one, acquired by Sparkasse and operated inside the girocard ecosystem.
