§ WHY NET2SOURCE / GTB

Open Finance for corporate clients sits at the exact intersection of regulatory translation, API-led integration, and multi-stakeholder alignment, which is where I have spent most of my career. The posting's emphasis on consent management journey design and use-case commercialisation across Web, Mobile, and H2H channels is the kind of end-to-end channel ownership I find genuinely engaging. Bridging GTB Product Owners, Wholesale Digital, regulators, and client-facing teams is a coordination problem I recognise from defence AI programmes and national public-sector platforms. *That structured complexity is where my strengths compound.*

§ HONEST FRAMING

I have not shipped inside a retail or corporate bank's channel stack, so the specific Open Banking regulatory frameworks of the UAE (CBUAE Open Finance Framework) are territory I will learn on the job rather than arrive knowing. What I bring is a demonstrated pattern of taking dense regulatory or technical requirements, EU AI Act, GDPR, identity management for government programmes, and turning them into prioritised, delivery-ready product definitions that engineering and client teams can actually execute.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec drafting and edge-case generation
- **GitHub Copilot**, accelerating SQL and Python analysis
- **Cursor / VSCode**, fast iteration on data scripts
- **Lovable**, rapid front-end prototyping for user testing
- **GPT**, stakeholder doc drafting and synthesis
- **n8n**, agentic workflow and integration automation
- **Gamma.app**, structured stakeholder presentations

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Kubernetes, ArgoCD, Docker, CI/CD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace for construction staffing, built and operated solo.

- Anonymity-until-payment model protecting both firms and workers until commitment is made.
- WhatsApp and Telegram as the primary product surface, reducing onboarding friction to zero.
- LLM agents across the funnel so one person runs the day-to-day operations end-to-end.
- Proves the ability to own a full digital journey, consent, data exchange, commercial activation, which maps directly to Open Finance channel design.

§ HOW I WOULD WORK AT NET2SOURCE / GTB

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow client-facing teams and GTB Product Owners to map the existing consent-management and H2H API journeys, identifying where regulatory requirements have not yet translated into a defined channel experience.

WEEK 2

Slice and prioritise.

Draft a ranked backlog of Open Finance use-cases by client segment impact and delivery feasibility, validated with Technology and Risk stakeholders before any sprint commitment.

WEEK 3+

Ship and commercialise.

Drive the first consent-management journey from defined acceptance criteria through UAT to channel release, establishing the repeatable delivery loop for subsequent corporate Open Finance use-cases.

I COVER LETTER

Dear Hiring Team,

The Channels Proxy Product Owner, Open Finance (Corporate) role at GTB is the kind of position I have been actively targeting: it requires someone who can sit between regulators, product owners, engineers, and client-facing teams and turn the resulting complexity into something a corporate treasury client can actually use on a web portal, a mobile app, or an H2H API connection. That translation work, from regulatory framework to prioritised, deliverable digital journey, is the core of what I have done across thirteen years of product ownership in regulated environments.

At Rohde & Schwarz, I owned the AI and data platform for the FCAS European defence programme. The stakeholder map included multinational engineering teams, programme managers across Germany, France, and Spain, and compliance layers I had to satisfy before any feature shipped. I redirected the product strategy mid-programme based on instrumented workflow data, achieved a 200% increase in pipeline runs, and cut rollout time from days to thirty minutes through GitOps delivery. The skill that made that possible, holding the regulatory and technical constraint in one hand and the client workflow in the other, is exactly what the Open Finance channel mandate asks for.

At Bundesagentur für Arbeit, I was Deputy IT Security Officer while simultaneously owning a national labour-market analytics platform. I introduced Dagster and dbt to automate quarterly

data imports and migrated the full system from bare metal to containers, reducing data update time by 75%. Working inside a public-sector regulatory environment with strict data governance requirements gave me a practical grounding in the kind of consent and data-sharing controls that sit at the heart of Open Finance.

Earlier, at Kvitt Payment Solutions, I built a mobile P2P payments product from zero and took it to acquisition by Sparkasse, where it was integrated into the girocard ecosystem. That experience gave me hands-on familiarity with payments infrastructure, PSP integration, and the compliance requirements of operating inside an established banking network, directly relevant to the corporate cash management and payments journeys the GTB channels team is responsible for enabling.

I am based in Berlin and actively targeting the UAE. I am prepared to relocate to Dubai and work fully on-site or hybrid, so the location is a positive fit. I am available at four weeks' notice and hold EU citizenship with no visa requirement within the EU/EEA.

I would welcome a conversation about how my background in regulated, API-heavy, cross-stakeholder product environments maps onto the Open Finance channel build-out at GTB.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Owner and Product Manager with 13 years of ownership in regulated industries, defence AI, public-sector analytics, insurance, healthcare, and payments. Consistent pattern: translate dense regulatory or technical requirements into prioritised, delivery-ready digital journeys, then lead cross-functional teams through Agile execution to production. Equally comfortable writing acceptance criteria, chairing a PI planning session, or presenting strategy to C-level stakeholders across multiple national jurisdictions.

§ WHAT I CAN DO

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, go-to-market support.

Payments and data: P2P and PSP integration, girocard ecosystem, ETL, Dagster, dbt, PostgreSQL, KPI definition, funnel and churn analysis, Matomo.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning, CI/CD, GitOps with ArgoCD.

Technical Environments: REST APIs, Kubernetes, Docker, Jenkins, GitLab, Azure DevOps, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Led cross-functional team of 15+ engineers through Scrum for the FCAS internal AI and data platform; GitOps rollout cut deployment from days to 30 minutes; developer-first strategy raised pipeline runs 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Owned national labour-market data platform; automated ETL with Dagster and dbt (, 75% update time); migrated bare-metal to containers; served as Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Triaged a five-person team's overloaded roadmap to the top 10% of features; user acceptance rose fivefold; implemented CGM KIS interface cutting digital anamnesis from 30 to 5 minutes.

EMIL GROUP · PRODUCT MANAGER · B2B INSURANCE SAAS 2022

Restructured 18-person delivery into three lean teams; attrition fell from near-total exodus to one departure; shipped Claims Center from concept to production; cut insurance-product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL
PAYMENTS & POS 2021-2022

Moved research results into production across matrix organisation in a full SAFe setup with agile release trains and PI planning; domain: retail and payments, POS and forecourt systems.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH; secure government data environment.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE
PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; backlog refinement, user stories, and acceptance criteria in Jira; still in production.

ENERCON · PROJECT LEAD · INDUSTRIAL IT MODERNISATION 2019

Full-site IT modernisation end-to-end for a wind-energy production facility.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

Wifi infrastructure rollout across nine hospitals within a healthcare clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING MARKETPLACE 2025-PRESENT

Zero-to-one B2B two-sided marketplace; anonymity-until-payment model; WhatsApp/Telegram product surface; LLM agents across the funnel; funnel and conversion analysis in SQL.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Owned hardware-software product architecture for enterprise quantum-resistant encryption; shipped three-layer product installable in under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY 2018-2021

Took a nanotechnology fertiliser from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group-based P2P payments product from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
