CONTRACT STAFFING

SENIOR PRODUCT MANAGER
(FINANCIAL SERVICES & AI-ENABLED
PRODUCTS) (M/F/D)

Philipp Hilbert. *Senior Product Manager, Financial Services & AI-Enabled Products.*

Positioning, a product leader with 13 years of delivery in regulated industries, payments, insurance, defence, now applying that depth to enterprise banking and financial infrastructure.

BERLIN, GERMANY · [HILBERT@TRUE-NORTH.BERLIN](mailto:hilbert@true-north.berlin) · [TRUE-NORTH.BERLIN](https://true-north.berlin)

§ WHY HALIAN / CLIENT

Enterprise-grade banking software in regulated markets is one of the fewer product domains where the full stack of skills, payment flows, regulatory constraints, stakeholder politics, and technical credibility with engineering, must all be present simultaneously, not traded off. The posting names payments, settlement systems, and transaction processing as core, then adds practical AI capability as a differentiator rather than the job title; that framing is exactly right, and it matches how I have been operating. The specific call-out of agentic AI workflows as a desired applied competency is a concrete signal that the organisation is thinking about automation seriously, not just ticking a box. *That is the kind of problem environment where careful, grounded product thinking compounds fastest.*

§ HONEST FRAMING

The posting asks for deep experience in core banking platforms and central bank or payment-network infrastructure specifically; my payments work has been at the product and PSP integration layer (P2P, consumer-facing, girocard ecosystem) rather than inside settlement rails or central bank ledger systems. The transferable mechanic is strong: I have owned transaction lifecycles, regulatory constraints, and operational controls in FinTech, insurance, and public-

sector platforms, and I pick up infrastructure-layer details quickly when working directly with engineering on architecture decisions.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
 - **GitHub Copilot**, assisted development across Python and Kotlin
 - **Cursor**, context-aware editing and LLM-assisted requirements
 - **Lovable**, rapid front-end prototyping and stakeholder demos
 - **n8n**, agentic workflow orchestration and automation pipelines
 - **GPT**, research, summarisation, and decision-support drafting
 - **Gamma.app**, fast stakeholder presentation generation
 - **Framer**, design-heavy prototyping for user-facing flows
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, Dagster, dbt, SQL, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace removing the headhunter from construction staffing.

- Matches construction firms with workers through an anonymity-until-payment model that protects both sides until commitment is made.
- WhatsApp and Telegram as the primary product surface; LLM agents across the acquisition and matching funnel so a single operator runs day-to-day operations.
- Funnel and conversion analysis in SQL; zero-to-one built alone from concept through live operation.
- Demonstrates end-to-end platform product ownership, agentic automation, and marketplace mechanics directly transferable to financial infrastructure products.

§ HOW I WOULD WORK AT HALIAN / CLIENT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow existing product rituals, map the payment and settlement workflows end to end, and identify where engineering and business stakeholders currently disagree on priorities or definitions.

WEEK 2

Anchor the roadmap.

Identify the top three open questions blocking the next delivery milestone and structure them as testable assumptions with clear owners and resolution criteria.

WEEK 3+

Ship, then compound.

Take the first independently owned initiative to a decision point, requirements signed off, architecture aligned, regulatory considerations documented, and establish the feedback loop that will measure whether it lands.

I COVER LETTER

Dear Hiring Team,

Thirteen years of product ownership in regulated industries, payments, insurance, defence AI, public-sector analytics, have taught me that the hardest part of financial services product management is not the technology or the regulatory complexity individually, but holding both in tension simultaneously while keeping a cross-functional team pointed at the right outcome. The role you have described maps closely to how I have been working.

At Kvitt Payment Solutions I took a mobile P2P payments product from zero through acquisition by Sparkasse, where it was integrated into the girocard ecosystem. That meant designing payment flows, edge-case handling, and reconciliation logic with a small team, then managing the regulatory and commercial relationship with one of Germany's largest savings bank networks. At EMIL Group I owned a B2B SaaS platform serving insurers, reinsurers, and underwriters, another regulated stakeholder environment where compliance requirements, client expectations, and engineering capacity had to be balanced against each other every sprint.

I shipped the Claims Center from concept to production and cut time-to-market for new insurance product launches from months to under a week.

On the AI capability side, the posting is precise in what it is asking for: practical application within financial services products, not AI product management as a specialty. At Rohde & Schwarz I owned an internal AI and data platform for the FCAS European defence programme, managing a cross-functional team of fifteen engineers and data scientists through Scrum. I instrumented competing workflow designs with real usage data, redirected strategy based on what the data showed, and introduced GitOps delivery that reduced rollout time from days to thirty minutes. In my own ventures I have built LLM-agent pipelines in n8n, used Claude Code and GitHub Copilot daily for spec generation and in-repo work, and shipped an agentic marketplace funnel end to end as a solo operator. These are applied AI capabilities, not theoretical ones.

I am an EU citizen currently based in Berlin and actively targeting the UAE; Abu Dhabi is a location I am willing to relocate to and work fully on-site. I am available at short notice. I would welcome the opportunity to speak in more detail about the specific product area and the team structure.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with 13 years of product ownership in regulated industries: FinTech and Payments, Insurance, defence AI, public-sector analytics, and healthcare. Consistent track record of owning complex products end to end, from discovery and requirements through cross-functional delivery, regulatory alignment, and measurable adoption, in Agile and SAFe environments. Technically credible with engineering teams; practical AI capability applied in production contexts, not as a side interest.

§ WHAT I CAN DO

Payments & FinTech: P2P payment flow design, PSP integration, girocard ecosystem, transaction lifecycle, edge-case and reconciliation logic.

Product Management: continuous discovery, product vision and roadmap, MVP and PoC definition, prioritisation, A/B testing, user research, go-to-market support, product lifecycle management.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Regulated Industries & Governance: Insurance (B2B SaaS), defence AI (FCAS), public sector, healthcare; GDPR (DSGVO), EU AI Act, Deputy IT Security Officer, identity management.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, Explainable AI (XAI); daily use of Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Agile & Scaled Delivery: Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI planning; GitOps rollout with ArgoCD, CI/CD, containerised environments.

Analytics & Data: KPI definition, funnel and churn analysis, ETL (extract, transform, load), Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments: Kubernetes, OpenShift, Docker, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, SQL, PostgreSQL, MongoDB, Kafka.

Stakeholder & Leadership: C-level and executive reporting, cross-functional team leadership (15+ engineers), workshop facilitation, conflict resolution, change management.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Owned internal AI and data platform for the FCAS European programme; led 15+ engineers and data scientists through Scrum. GitOps with ArgoCD cut rollout from days to 30 minutes; workflow instrumentation redirected strategy and increased pipeline runs by 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics platform; Deputy IT Security Officer. Introduced Dagster and dbt, saving ~75% of data-update time; migrated bare-metal system to containers and carried a full UI relaunch in parallel.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Mobile patient app (iOS/Android). Cut roadmap to top 10% of features; user acceptance rose more than fivefold. Integrated CGM interface reduced digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Platform for insurers, reinsurers, brokers, underwriters. Restructured 18-person org into three lean teams; attrition dropped from near-total exodus to one departure. Shipped Claims Center concept-to-production; cut new-product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL & PAYMENTS 2021-2022

POS and forecourt systems; full SAFe setup with agile release trains and PI planning. Moved research results into production across a matrix organisation.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

B2B procurement webshop on Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · ENERGY 2019

Full site IT modernisation end to end, wind energy sector.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals in a clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · CONSTRUCTION FINTECH 2025-PRESENT

Two-sided B2B marketplace; anonymity-until-payment model; LLM-agent-driven funnel; built zero-to-one solo.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software; three-layer install under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO & CFO · AGRITECH 2018-2021

Nanotechnology fertiliser from lab to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH 2013-2018

Mobile P2P group payments; built from zero, acquired and operated by Sparkasse inside the girocard ecosystem.
