

Philipp Hilbert. *Senior Product Manager driving B2B SaaS growth through agentic AI and rigorous discovery.*

Positioning, 13 years shipping B2B SaaS products end-to-end, now adding agentic AI workflows to close the loop between strategy and execution.

§ WHY JOBOT

A fully remote B2B SaaS company built around revenue acceleration is a precise match for what I have spent the last several years doing: owning the full product lifecycle from discovery through launch, across cross-functional teams, in regulated and fast-moving environments alike. The explicit callout of agentic AI systems, API fluency, and wireframing in the qualifications list matches my daily toolkit rather than a wishlist. What draws me in particular is the multi-campaign structure, running parallel product workstreams demands exactly the kind of roadmap discipline and trade-off reasoning I built at companies like EMIL Group and Rohde & Schwarz. *That combination of pace, scope, and AI-native mandate is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and implementation cycles
- **GitHub Copilot**, pair-programming and review acceleration
- **Lovable**, rapid front-end prototyping from user stories
- **Cursor / VSCode**, LLM-assisted refactoring and edge-case generation
- **n8n**, agentic workflow orchestration

- **Gamma.app**, executive-ready decks from rough notes
 - **GPT**, product brief drafting and research synthesis
 - **Framer**, design-heavy interface mockups
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Dagster, dbt, Kafka, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy, SQL.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built and operated solo.

- Anonymity-until-payment model that protects both sides of the marketplace until commitment is made.
 - WhatsApp and Telegram as the product surface, removing onboarding friction for a low-tech user base.
 - LLM agents across the full funnel, matching, outreach, qualification, so a single operator runs daily operations.
 - Demonstrates end-to-end B2B SaaS product ownership including funnel instrumentation and conversion analysis in SQL.
-

§ HOW I WOULD WORK AT JOBOT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit with sales, marketing, and engineering to map the existing product campaigns end-to-end, locate where customer needs diverge from the current roadmap, and read the last three quarters of data to understand what "more revenue" actually means in measurable terms at this company.

WEEK 2

Slice and prioritise.

Take the gap list from week one and run a structured prioritisation pass, value, feasibility, and business viability, producing a candidate roadmap slice with clear success criteria before writing a single user story.

WEEK 3+

Ship and close loops.

Move the top slice into groomed backlog items with acceptance criteria, align with engineering on sprint cadence, and establish a lightweight review rhythm so every release has a measurable outcome to check against.

I COVER LETTER

Dear Hiring Team,

I am writing to apply for the Senior Product Manager role at Jobot. With 13 years of product ownership across B2B SaaS, defence AI, public-sector analytics, insurance, and fintech, I have spent my career doing exactly what this posting describes: taking products from concept to launch, building the business requirements and user stories that engineering can act on, and aligning cross-functional teams around a shared roadmap.

The emphasis on APIs, agentic AI systems, and strong workflows resonates directly with my current practice. At Rohde & Schwarz I owned the internal AI and data platform for the FCAS European programme, leading a cross-functional team of 15+ engineers and data scientists. I introduced GitOps delivery with ArgoCD that reduced rollout time from days to 30 minutes, and I instrumented two competing product workflows to let data, not opinion, decide the direction, which drove a 200% increase in pipeline runs. At the Federal Employment Agency I integrated Dagster and dbt into a national labour-market analytics platform, cutting data update time by roughly 75% and migrating a bare-metal system into a fully containerised environment. Both roles required the same combination this posting calls for: technical depth, stakeholder alignment across business and engineering, and a bias for outcomes over output.

On the AI-native side, I build and operate agentic workflows daily. My solo B2B marketplace construct8 runs LLM agents across the full funnel, matching, outreach, qualification, so a single operator manages day-to-day operations. I prototype in Lovable and Framer, write specs and generate edge cases with Claude Code, and orchestrate multi-step agent loops in n8n. This is not a capability I am building toward; it is how I work now, and it maps directly to the agentic AI requirement in the job description.

I am particularly comfortable with the multi-campaign structure Jobot describes. At EMIL Group I restructured an 18-person delivery organisation into three parallel lean teams, stabilising engineer retention and shipping the Claims Center from concept to production while simultaneously cutting time-to-market for new insurance products from months to under a week. Managing competing priorities across workstreams with different stakeholders and timelines is a mode I find energising rather than stressful.

I would welcome the opportunity to discuss how my experience translates to Jobot's specific product challenges. I am available at short notice and happy to provide references, a portfolio of past roadmaps and PRDs, or a more detailed walkthrough of any of the projects above.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with 13 years of product ownership in B2B SaaS, AI platforms, public-sector analytics, insurance, healthcare, and fintech. I run continuous discovery, translate strategy and user needs into prioritised roadmaps and crisp user stories, and lead cross-functional engineering teams through agile delivery from concept to launch. I bring hands-on fluency in APIs, agentic AI systems, and rapid prototyping, not as adjacent interests, but as core delivery tools.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Ownership: requirements engineering, user stories, acceptance criteria, epics, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision, roadmap ownership, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAgile, ART, PI planning.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, SQL.

Technical Environments Owned: REST APIs, Python, Kotlin (Spring Boot), Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, MongoDB, Kafka, Git.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance and Business: GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI / DATA PLATFORM 2024-2025

Internal AI and data platform for the FCAS European programme. Led 15+ engineers and data scientists through Scrum; cut GitOps rollout time from days to 30 minutes with ArgoCD; drove a 200% increase in pipeline runs by data-led workflow prioritisation. Stack: Kubernetes, ArgoCD, Dagster, Python, Jira.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics SaaS platform. Integrated Dagster and dbt, reducing data-update effort by 75%; migrated bare-metal to containers; delivered full UI relaunch and large ETL migration concurrently. Deputy IT Security Officer. Stack: Dagster, dbt, Jenkins, PostgreSQL, Docker.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Scoped a five-person team's roadmap to the top 10% of features; user acceptance rose fivefold. Shipped CGM/KIS interface cutting digital anamnesis time from 30 to 5 minutes. Stack: iOS/Android, REST APIs, Jira.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Restructured 18-person delivery org into three lean teams; stabilised engineer retention. Shipped Claims Center from concept to production; cut insurance-product time-to-market from months to under a week. Stack: Scrum, Jira, Confluence.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND
PAYMENTS POS 2021-2022

Moved research into production across a matrix organisation in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B SAAS
2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production. User stories and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL
NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B SAAS
MARKETPLACE 2025-PRESENT

Two-sided marketplace matching construction firms with workers. Zero to one alone: anonymity-until-payment model, WhatsApp/Telegram as product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped a three-layer product installable in under two minutes to satisfy enterprise buyers; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · DEEP TECH /
AGRICULTURE 2018-2021

Nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Mobile group-based P2P payments built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
