

Philipp Hilbert. *Product manager who turns ambiguous fintech requirements into shipped, measurable product.*

Positioning, ten years of end-to-end product ownership in regulated industries, now applying that rigour to investment platforms built on data and KPIs.

§ WHY XTB

XTB is one of the few investment platforms that has grown past one million users while keeping a single, coherent app, that is a product constraint most fintech PMs never have to solve. The posting calls for someone who avoids guesswork and justifies decisions with numbers; that maps precisely to how I have run every discovery and prioritisation cycle in my career. The explicit appetite for AI tooling in the PM's daily workflow is not a checkbox here, it signals a team that ships with leverage rather than headcount. *That is exactly the environment where my working style compounds.*

§ HONEST FRAMING

My direct experience is in insurance, public-sector analytics, and B2B SaaS rather than in a retail investment or brokerage product. What transfers directly is the pattern underneath: owning a data-heavy, compliance-constrained platform, running continuous discovery with real users, and translating ambiguous regulatory requirements into a prioritised, measurable backlog.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, code review and boilerplate
- **Cursor / VSCode**, exploratory prototyping
- **Lovable**, rapid front-end prototyping
- **GPT**, drafting, edge-case generation, research synthesis
- **Gamma.app**, stakeholder decks and workshop material
- **n8n**, agentic workflow automation
- **Framer**, design-heavy prototypes

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Docker, GitOps, Jenkins, CI/CD, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, REST APIs, Kafka, Dagster, dbt, Matomo, MicroStrategy, Jira, Confluence, Figma, Miro, Azure DevOps, GitLab.

§ SIDE PROJECT

PHOENIX882.COM GITHUB.COM/HILBERTP →

A personal crypto backtesting engine built to validate trading strategies before putting capital at risk.

- Reconstructs marginal prices over merit-order and aFRR balancing-market data; separate from the crypto backtester but the same engineering philosophy.
- Multi-agent coding framework (Liberation of Bajor) drives test generation and scenario expansion autonomously.
- Built and operated solo, product, infrastructure, and data pipeline in one.
- Demonstrates the quantitative, data-first instinct XTB asks for in a PM: hypothesis → metric → experiment → decision.

§ HOW I WOULD WORK AT XTB

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the squad rituals, audit the KPI dashboard and the analytics stack, and map the current discovery pipeline against what the posting describes, identifying where decisions are still driven by intuition rather than data.

WEEK 2

Instrument the funnel.

Pick the single most ambiguous KPI, align with engineering and data on how it is currently measured, and propose a sharper definition with a baseline and a target.

WEEK 3+

Close the first loop.

Run a structured discovery cycle, user interviews or quantitative analysis depending on what the gap demands, and bring a prioritised, evidence-backed proposal to the team for the next sprint or PI.

I COVER LETTER

Dear XTB hiring team,

I am applying for the Product Manager role because the problem you are solving, keeping a complex, multi-asset investment platform coherent for over one million users while the product surface keeps expanding, is precisely the kind of constraint I find most interesting to work inside. A growing user base and a single, unified app are in direct tension: every new feature is a potential coherence debt.

My 13 years of product ownership have been almost entirely in regulated, data-heavy environments. At Bundesagentur für Arbeit I owned a national labour-market analytics platform where every indicator was a policy decision with visible downstream consequences, I learned quickly that "it seems to me" is not an acceptable justification for a roadmap choice. At EMIL Group I shipped the Claims Center from concept to production, cutting time-to-market for a new insurance product from months to under a week, while simultaneously restructuring an 18-person delivery organisation that was losing its senior engineers. Both situations required the same skill your posting names: justifying decisions with numbers and facts, then executing cleanly with a cross-functional team.

On the discovery side, I have run the full cycle, JTBD interviews, usability testing, stakeholder workshops, and I know how to distinguish a signal worth acting on from noise worth ignoring. At Rohde & Schwarz I instrumented two competing workflows before committing to a direction.

One had a beautiful UI and exactly zero actual clicks; the other was plainer and was the one people used. That finding redirected several months of engineering effort. Discovery discipline is not a phase before development; it is a continuous risk-reduction practice that runs in parallel with delivery.

My fintech background includes founding Kvitt Payment Solutions, a mobile P2P payments product that ran inside the girocard ecosystem and was acquired by Sparkasse, and seven years of hands-on crypto and DeFi experience including perpetual futures, DEX aggregation, cross-chain bridging, and market-microstructure analysis. I track liquidity, execution quality, and market structure not as a hobbyist but as someone who has built tooling around them. That gives me genuine domain empathy for the users XTB serves.

I use AI tooling not as a novelty but as a productivity multiplier: Claude Code and GitHub Copilot for in-repo work, Lovable for rapid front-end prototyping, n8n for agentic workflow automation. I can move from a user insight to a testable prototype in hours rather than weeks, which compresses the discovery loop considerably.

I would be glad to walk through any of these projects in more detail. The work is concrete and the outcomes are measurable, which is, I think, exactly what you are looking for.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with 13 years of end-to-end ownership in regulated, data-heavy environments, defence AI, public-sector analytics, insurance, healthcare, payments, and fintech. I run continuous discovery, translate strategy and user needs into prioritised roadmaps, and lead cross-functional agile teams through delivery. My default mode is KPI-first: hypotheses are cheap, experiments are structured, and decisions are justified with numbers.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision, roadmap prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, go-to-market support, KPI definition, funnel and churn analysis.

Product Ownership: requirements engineering, user stories, acceptance criteria, epics, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Analytics and Data: KPI definition, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, cross-functional team leadership.

Technical Environments Owned: Kubernetes, OpenShift, ArgoCD, Docker, GitOps, Jenkins, CI/CD, Python, Kotlin, Django, PostgreSQL, MongoDB, REST APIs, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

PROJUNCTA GMBH · FREELANCE PRODUCT MANAGER · ENTERPRISE & PUBLIC SECTOR 2017 TO PRESENT

Independent product ownership for enterprise, public-sector and startup clients. Selected engagements below.

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024 TO 2025

Introduced GitOps delivery with ArgoCD across a multinational team, cutting rollout time from days to 30 minutes and making the platform hotfix-capable; redirected product direction to a developer-code-first design after instrumenting two competing workflows, the UI-led alternative recorded zero clicks.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023 TO 2024

Integrated test automation into Jenkins, introduced Dagster and dbt for quarterly imports, migrated bare-metal to containers, and carried a full UI relaunch, all while serving as Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a three-person team's roadmap to the top 10% of features, raising user acceptance more than fivefold; implemented the CGM hospital interface, reducing digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured an 18-person delivery organisation into three lean teams, reducing senior-engineer attrition to a single departure; shipped the Claims Center from concept to production, cutting time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS POS 2021 TO 2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · GOVERNMENT SECURE DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE PROCUREMENT 2019 TO 2020

Migrated a legacy procurement system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017 TO 2018

WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER & PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025 TO 2026

Zero-to-one two-sided B2B marketplace; anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel so one person runs the day-to-day.

QCRYPT AG · CO-FOUNDER & PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016 TO 2021

Shipped a three-layer product that installs in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER & CFO · FINTECH P2P PAYMENTS 2013 TO 2018

Built from zero; acquired by Sparkasse, operated inside the girocard ecosystem.
