
Philipp Hilbert. *AI product manager who ships, not just specifies.*

Positioning, thirteen years of end-to-end product ownership across defence AI, public-sector analytics, payments, and enterprise SaaS, the stack Halian's client needs to build AI-native products for government and enterprise in Abu Dhabi.

§ WHY HALIAN / THE CLIENT ORGANISATION

The posting describes an organisation that transforms ambiguous business challenges into demonstrable AI-powered products for enterprise and government clients, exactly the operational mode I have run across FCAS defence AI at Rohde & Schwarz, the Federal Employment Agency's national analytics platform, and my own two-sided marketplace built solo with LLM agents. The specific call-out for RAG architectures, AI agents, and modern tooling is not aspirational for me; it is my current working stack. The requirement for client-facing executive communication with public-sector stakeholders is something I have done at federal and ministry level in Germany, where the trust bar is equally high. *That is exactly the environment where my strengths compound.*

§ HONEST FRAMING

I have not shipped a product in the UAE government or smart-cities context specifically. My public-sector delivery has been German federal, Federal Employment Agency, Bundesdruckerei, which shares the long procurement cycles, compliance sensitivity, and stakeholder formality the UAE government space demands, so the transferable mechanic is strong even if the geography is new.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and refactors
 - **GitHub Copilot**, paired coding with engineering teams
 - **Cursor / VSCode**, LLM-assisted development environment
 - **Lovable**, rapid front-end prototyping
 - **Framer**, design-heavy product surfaces
 - **n8n**, agentic workflow orchestration
 - **GPT**, document drafting, edge-case generation
 - **Gamma.app**, executive-facing product presentations
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Docker, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, across regulated production environments in defence, government, insurance, and healthcare.

§ SIDE PROJECT

LIBERATION OF [BAJOR GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A self-built multi-agent coding framework constructed as a working tool, not a tutorial.

- Implements a file-queue-based agent loop where tasks are dispatched, executed, and reconciled without a human in the loop between steps.
- Architecture separates orchestration from execution so individual agents are swappable; the framework informed my agentic workflow design at construct8.
- Runs production workloads including the phoenix882.com backtesting engine and the Hyperion aFRR balancing-market pipeline.
- Demonstrates the kind of hands-on agent architecture judgment an AI PM needs to make credible feasibility calls when engineering pushes back.

§ HOW I WOULD WORK AT HALIAN'S CLIENT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow every active client engagement, read the existing PRDs and workshop outputs, and identify where requirements are ambiguous or untested, the same diagnostic I ran at Rohde & Schwarz before redirecting the FCAS platform from the unused UI-led design to the developer-code-first one users actually adopted.

WEEK 2

Sharpen the backlog.

Pick the initiative with the highest business-value-to-uncertainty ratio, run a structured discovery sprint, and produce a crisp PRD with acceptance criteria and a concrete feasibility conversation with engineering, turning vague mandates into deliverable slices.

WEEK 3+

Ship and close loops.

Own the first delivery milestone end to end, stakeholder presentation, partner accountability, and a retrospective that feeds directly into the next roadmap decision.

I COVER LETTER

To the Halian team and the hiring organisation in Abu Dhabi,

The role you are filling is one I have been doing in substance for thirteen years, most recently in two environments that map directly onto what you describe: a multinational defence AI programme at Rohde & Schwarz where I owned platform delivery for FCAS, and a national public-sector analytics platform at the Federal Employment Agency where I was also Deputy IT Security Officer. Both required the same combination this posting calls for, translating ambiguous government mandates into concrete product roadmaps, managing senior stakeholders across technical and non-technical audiences, and making credible technical decisions under delivery pressure.

On the AI side, I am not learning these tools in preparation for the role; I use them to do the work now. I built my own multi-agent coding framework (Liberation of Bajor), designed the LLM-agent funnel for my construction-staffing marketplace construct8, and work daily with

Claude Code, GitHub Copilot, Lovable, and n8n for agentic workflow automation. When a job description lists RAG architectures, LLM agents, and AI-native product tooling as requirements, I can evaluate those capabilities against real delivery constraints rather than vendor slides.

Client-facing communication with government and executive audiences is something I have done across German federal institutions, the Federal Employment Agency, Bundesdruckerei, and ministry-level security programmes, where the trust requirements and procurement sensitivities are comparable to the UAE public sector. I understand how to run a workshop with senior stakeholders who are skeptical, how to present product strategy to a C-level audience that does not want to hear about backlog mechanics, and how to hold vendors accountable to scope and timeline without burning the relationship.

The Abu Dhabi location is not a compromise for me. I am actively targeting the UAE and prepared to relocate: the scale of ambition in the region's digital and AI transformation programmes is precisely the environment where the kind of product judgment I have built over thirteen years is most useful.

I would be glad to walk through any of the specific engagements mentioned here in more detail. The YouTube link in my profile (youtube.com/watch?v=nt06f71lgfE) shows a product pitch I delivered in English for Qcrypt AG if the team wants a quick read on communication style before a first call.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with thirteen years of end-to-end ownership in regulated and technically complex environments, defence AI, federal public sector, insurance SaaS, healthcare, and fintech. I translate ambiguous business challenges into clear roadmaps, run cross-functional agile teams through delivery, and make credible technical decisions across AI, DevOps, and data platform stacks. For government and enterprise AI products, I bring both the stakeholder credibility and the hands-on tooling fluency the work demands.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI; prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level and executive reporting, workshop facilitation, conflict resolution, change management.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning.

Technical Environments Owned: Kubernetes, OpenShift, ArgoCD, Docker, GitOps, Jenkins, CI/CD, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, SQL, PostgreSQL, MongoDB, Kafka.

Analytics and Data: ETL, Dagster, dbt, PostgreSQL, KPI definition, Matomo, MicroStrategy.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI 2024 TO 2025

Internal AI and data platform for the FCAS European programme. Introduced GitOps delivery with ArgoCD: rollout time fell from days to 30 minutes and the platform became hotfix-capable. Redirected product from an unused UI-led design to developer-code-first after instrumenting two competing workflows in live customer workshops.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023 TO 2024

National labour-market analytics platform for policymakers and researchers. Integrated test automation into Jenkins, introduced Dagster and dbt, migrated bare-metal to containers, and carried a full UI relaunch concurrently. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Mobile patient app for iOS and Android. Cut roadmap to top 10% of features: user acceptance rose more than fivefold. Implemented the CGM hospital-information-system interface, reducing digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE SAAS 2022

B2B SaaS for insurers, reinsurers, brokers and underwriters. Restructured an 18-person delivery organisation into three lean teams: attrition fell from near-total to one departure. Shipped Claims Center from concept to production, cutting time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS 2021 TO 2022

POS and forecourt systems. Moved research into production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · INTERIM PRODUCT OWNER · GOVERNMENT 2021

Secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PROXY PRODUCT OWNER · HEALTH INSURANCE 2019 TO 2020

B2B procurement webshop. Migrated legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · ENERGY 2019

Full site IT modernisation end to end, wind-energy sector.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017 TO 2018

Clinical network WLAN rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING 2025 TO 2026

Two-sided B2B marketplace, zero to one solo. Anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016 TO 2021

Quantum-secure encryption hardware and software. Shipped a three-layer product that installs in under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER CDO/CFO · NANOTECHNOLOGY 2018 TO 2021

Fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013 TO 2018

Mobile group-based P2P payments. Built from zero to acquisition by Sparkasse, inside the girocard ecosystem.
