§ BEARING

Hands-on Product Manager and Product Owner with nearly ten years of experience translating complex operational workflows into scalable enterprise software. Background spans AI data platforms, regulated analytics environments, B2B InsurTech SaaS, defence-grade data systems, and founder-level company building. Comfortable operating in ambiguity and high-pressure delivery where requirements are incomplete and teams need clarity to move. Fluent in agile ceremonies, backlog discipline, and cross-functional stakeholder alignment across engineering, QA, data science, and executive layers.

§ CORE STRENGTHS

- Decomposing strategic objectives into clear, dev-ready requirements
- Agile ceremony facilitation and sprint discipline recovery
- Cross-functional alignment across engineering, QA, data, and leadership
- AI-native product execution and intelligent workflow automation
- Delivery metrics tracking: velocity, release readiness, risk identification
- End-to-end feature ownership from user story to production rollout
- Client trust rebuilding in prototype-stage and regulated environments
- Technical fluency across modern SaaS infrastructure and data platforms
- Founder-level pragmatism: low ego, high agency, bias toward shipping

§ PROFESSIONAL EXPERIENCE

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout
- Led cross-functional team of architect, data scientists, backend and frontend engineers, and QA across a multinational programme
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature the project lead had been requesting from engineers for over a year
- Enabled ML training and evaluation on curated multimodal datasets with transparent evaluation concepts covering SafeAI and ExplainableAI requirements
- Improved data quality via filtering, tagging, reproducible transformation pipelines, and full audit trails with data provenance

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Delivered new analytics features including labour shortage indicators, flexible regional comparison, and modernised admin tooling on a live public platform
- Introduced Dagster for automated ETL and indicator generation, replacing manual processes and reducing data latency
- Standardised CI/CD with full test integration at build time; migrated legacy systems to Kubernetes
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage
- Managed major system upgrades and database migrations with zero service interruption

Emil Group 2022, 2022

Product Manager, InsurTech SaaS Platform

- Re-established sprint discipline and delivery stability across a B2B InsurTech platform; split a bloated 17-person team into smaller, structured Scrum units and introduced ownership and deputy concepts
- Reintroduced velocity tracking and structured refinement practices that had been lost under delivery pressure
- Designed and delivered a Claims Center module from concept to production rollout

- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops
- Reduced senior developer attrition from near-total to a single departure across the engagement
- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage on iOS and Android
- Integrated CGM interface into hospital information system workflows, navigating legacy API constraints and external database dependencies
- Built stakeholder trust through transparent communication of technical complexity under tight delivery deadlines

§ FOUNDER & EARLY-STAGE EXPERIENCE

- **Qcrypt AG, Product Owner (2016–2018):** Quantum-secure encryption product based on one-time-pad keys and true random number generator hardware. Owned backup, restore, checkpoint, and data-encryption product architecture. Also served as deputy IT security officer.
- **Kvitt Payment Solutions, Founder & CFO (2013–2018):** Group-based P2P payments platform. PSP integration, full UX/UI design, mobile app prototype. Later acquired and operated by Sparkasse.
- **Bundesdruckerei, Product Owner – COVID-19 Data Platform (2021):** RKI projects DIM and DESH. Secure data structures and identity management.
- **AOK Health Insurance ITSCare, Proxy Product Owner (2019–2020):** Migration of internal webshop to Shopware, including complex catalogue and API integration and configurable approval policies.
- **Enercon, Project Lead (2019):** Full IT modernisation of a specialist manufacturing site covering software, databases, hardware, communications, and Office 365 rollout.
