PRODUCT OWNER (APIS, AGILE PROZESSE,
STAKEHOLDER-MANAGEMENT) (M/W/D) 100%
REMOTE ID10203

Philipp Hilbert. *Product Owner for API-driven platforms in regulated environments.*

Positioning, senior product owner with ten years owning backlogs, APIs, and cross-functional delivery in finance, defence, and insurtech.

§ WHY MUND CONSULTING

The role sits inside a financial-sector product team building and maintaining APIs at the core of business logic – exactly the intersection where product rigour and technical fluency compound. The explicit call for a startup mentality alongside financial-sector standards is a meaningful signal: this is not a governance-only position, it is a delivery role. Short decision paths and direct communication are how I have worked across every engagement. *That is the environment where I move fastest.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, requirements drafting and edge-case generation
- **GPT**, stakeholder documents and meeting prep
- **GitHub Copilot**, in-repo spec and acceptance criteria
- **Cursor / VSCode**, LLM-assisted workflow review
- **Lovable**, rapid UI prototyping for API consumer flows
- **Gamma.app**, sprint review and stakeholder decks
- **n8n**, agentic workflow design and automation
- **Framer**, design-heavy conceptual mockups

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, Kubernetes, ArgoCD, Helm, OpenShift, Argo Workflows, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, JavaScript, Django, dbt, Dagster, DuckDB, Jenkins, Bitbucket, Git, MicroStrategy, Redpanda, AngularJS, Ionic, CGM API integration, Shopware.

§ SIDE PROJECT

DEV AGENT FRAMEWORK [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A self-built agentic development framework for crypto market analysis and automated execution.

- Implements file-queue-based agent loops for backtest execution and trading signal generation across CEX and DEX venues.
 - Combines Python orchestration with multi-agent task dispatch; integrates with exchange APIs (Hyperliquid, Bitget, Jupiter) for live data and order routing.
 - Active development corpus with iterative architectural decisions driven by real execution constraints.
 - Demonstrates the same API-consumer and workflow-automation thinking directly applicable to designing and owning financial API products.
-

§ HOW I WOULD WORK AT MUND CONSULTING

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Read existing API documentation, join sprint ceremonies as an observer, and interview each stakeholder once to map where business logic, user requirements, and current backlog items are misaligned.

WEEK 2

Slice and prioritise.

Restructure the backlog around the API surface: separate vision-level items from sprint-ready stories, write acceptance criteria with explicit API contract expectations, and flag the first two or three high-value gaps.

WEEK 3+

Ship and close loops.

Drive the first sprint to a clean demo, hold a structured retrospective, and establish a lightweight quality gate process so that every API release meets the stated user requirements before it leaves the team.

I COVER LETTER

Dear Recruiting Team,

I am applying for the Product Owner position focused on APIs, agile processes, and stakeholder management in the financial sector. With close to ten years of hands-on Product Owner and Product Manager experience – spanning regulated government programmes, B2B SaaS platforms, and infrastructure-level API work – I am well positioned to take ownership of both the product vision and the day-to-day delivery rigour this role requires.

The core of the role is exactly where I have operated most consistently: defining product concepts and business logic for API-driven systems, keeping agile processes sharp under delivery pressure, and maintaining trust with stakeholders who span technical, business, and compliance functions. At Rohde & Schwarz, I owned a central data management platform built on a microservices and Kubernetes stack, delivering autonomous feature sets end-to-end from user stories through GitOps rollout, including audit-trail and data provenance features that had to satisfy multinational programme requirements. At Emil Group, I stepped into a team that had lost sprint discipline and client confidence, rebuilt structured refinement and velocity tracking, and reduced senior developer attrition from near-total to a single departure – all while continuing to ship.

On the API side specifically, my background covers REST API integration from both the product consumer and the product owner perspective. At CLINET Platforms I managed complex legacy CGM API integration into hospital information systems with incomplete documentation and strict external dependencies. At AOK ITSCare I drove a Shopware migration that required mapping a custom catalogue API with configurable approval policies. I understand what makes an API product releasable – clear contracts, well-specified edge cases, and acceptance criteria that a developer can test against – and I know how to write requirements that reduce back-and-forth rather than generate it.

The startup-mentality requirement in the posting resonates directly with how I work. I am comfortable with short communication paths, I prefer direct alignment over escalation chains, and I treat ambiguity as a product constraint to be resolved rather than a reason to wait. My tooling reflects this: I use AI-native workflows daily to accelerate requirements writing,

stakeholder documentation, and prototype iteration, which means I can move at a pace that matches fast-moving financial product teams.

I would welcome a conversation about the specific API domain and team structure. Please find my CV attached.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Owner and Product Manager with close to ten years of experience owning APIs, backlogs, and cross-functional delivery in regulated and fast-moving environments. Proven track record in financial, government defence, insurtech, and healthcare domains. Equally comfortable writing precise acceptance criteria for a REST API endpoint and facilitating a stakeholder workshop to resolve conflicting business requirements. Operates with founder-level pragmatism: low bureaucracy, high accountability, direct communication.

§ CORE STRENGTHS

- API product ownership: contracts, acceptance criteria, release gates
- Backlog management and sprint discipline under delivery pressure
- Stakeholder alignment across business, engineering, and compliance
- Agile process re-establishment and velocity recovery
- Requirements engineering for complex operational workflows
- Technical fluency across modern backend and infrastructure stacks
- AI-native tooling for faster specification and prototyping
- Cross-domain delivery in regulated environments (finance, defence, health)
- Founder-level pragmatism, low ego, high agency

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Owned end-to-end feature delivery including API contracts, user stories, acceptance criteria, implementation support, testing, and GitOps rollout
- Led cross-functional team across architect, data scientists, backend and frontend engineers, and QA with multinational stakeholders
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature that had been stalled for over a year
- Delivered data provenance, audit trails, and SafeAI transparency features for a government defence programme (FCAS)

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Owned the Arbeitsmarktmonitor analytics platform: backlog, roadmap, sprint ceremonies, and stakeholder communication
- Introduced Dagster for automated ETL and indicator generation; migrated legacy systems to Kubernetes
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage
- Standardised CI/CD with full test integration at build time
- Delivered labour shortage analytics, flexible regional comparison, and modernised admin tooling

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Re-established sprint discipline and delivery stability in a team that had lost both; split a 17-person unit into effective Scrum teams with ownership and deputy concepts
- Designed and delivered a Claims Center module from concept to production rollout on a B2B insurance platform
- Reintroduced velocity tracking and structured refinement practices

- Regained client trust through structured communication and weekly product workshops
 - Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation
-

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Owned backlog and delivery for a mobile-first hospital app across iOS and Android
 - Managed complex CGM API integration into hospital information system workflows with legacy API constraints
 - Built stakeholder trust through transparent communication of technical complexity
 - Delivered core patient flows for digital anamnesis, meal and therapy plans, transport, chat, and document storage
-

§ FOUNDER & EARLY-STAGE EXPERIENCE

QCRYPT AG 2016, 2018

Product Owner & Deputy IT Security Officer

- Owned product architecture for quantum-secure encryption product based on one-time-pad keys and true random number generator hardware
- Defined backup, restore/checkpoint, and data-encryption features; USP was setup under two minutes with no technical knowledge required
- Served as deputy IT security officer; responsible for attack vector framing and security requirements

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Founded a group-based P2P payments product on a P2P backbone; owned PSP integration, UX/UI design, and mobile app prototype
- Later acquired and operated by Sparkasse

AOK ITSCARE (PROXY PRODUCT OWNER) 2019, 2020

- Drove migration of internal webshop to Shopware including complex catalogue and API integration with configurable approval policies
