

Philipp Hilbert. *Platform PM who ships without waiting for perfect information.*

Positioning, ten years of B2B SaaS delivery, backlog discipline, and cross-functional alignment – brought to a platform in active growth.

§ WHY AMPR

Ampr is doing something structurally interesting: turning a lead-routing product into an operating system for an entire market vertical. The job description explicitly names the need for someone who can hold the interface between engineering, stakeholders, and user needs simultaneously – not rotate between them. That is a specific kind of pressure I have worked under at Rohde & Schwarz and Emil Group, where the same person had to run refinements, unblock infrastructure issues, and rebuild client trust in the same week. The line in the posting about triage – "Bug, Produktchance, Kundenwunsch?" – is exactly the judgment call that slows platforms down when it is handled by committee rather than owned by one PM. *That is precisely the kind of ownership I am built for.*

§ HONEST FRAMING

My background is in enterprise B2B SaaS, defence, and regulated health platforms – not real estate or mortgage origination. The domain terminology will take a few weeks to internalise. What transfers immediately is the structural mechanic: a multi-sided platform connecting supply, demand, and financing is operationally close to the InsurTech intermediary stack I owned at Emil Group, where I had to reason about product configuration, underwriting rules, and downstream data flows across four different partner types simultaneously.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, spec drafting, edge-case generation, PRD review
- **GPT**, research synthesis and stakeholder communication drafts
- **GitHub Copilot**, in-editor code reading and ticket validation
- **Cursor / VSCode**, navigating unfamiliar codebases quickly
- **Lovable**, rapid front-end prototyping before engineering commits
- **Gamma.app**, stakeholder presentations built from outlines
- **n8n**, lightweight automation for product ops workflows
- **Framer**, interactive mockups for user testing

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kotlin (Spring Boot), Python, Django, JavaScript, PostgreSQL, MongoDB, REST APIs, Kubernetes, ArgoCD, Helm, Argo Workflows, OpenShift, Jenkins, Bitbucket, dbt, Dagster, DuckDB, MicroStrategy, Redpanda, Docker, GitOps pipelines, CI/CD with full test integration, AngularJS, Ionic, CGM API integration, low-code workflow platforms, Java.

§ HOW I WOULD WORK AT AMPR

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow every active squad ceremony – refinement, planning, review – and build a written map of where decisions stall, where tickets arrive without enough context, and where the boundary between bug, product chance, and customer wish is currently unowned.

WEEK 2

Triage and slice.

Take the highest-friction area identified in week 1, own the triage, and produce the first batch of tickets that the engineering team can pull without follow-up questions.

Ship and close loops.

Run a full sprint cycle end-to-end, moderate the ceremonies, and deliver at least one scoped user-facing improvement – establishing the cadence Ampr needs to treat the backlog as a living instrument rather than a queue.

I COVER LETTER

Sehr geehrte Freyja, sehr geehrter Olli, sehr geehrter Maximilian,

ich bewerbe mich als Product Manager für Platform Scaling und Product Operations bei Ampr. Was mich an der Rolle reizt, ist weniger der Titel als die Aufgabe: eine funktionierende Plattform zu einem belastbaren Betriebssystem weiterzuentwickeln – mit echtem Engineering-Team, echter Stakeholder-Last und der klaren Erwartung, dass ich eigenverantwortlich priorisiere, auch wenn mir nicht alle Informationen vorliegen.

Genau das habe ich in den letzten Jahren gemacht. Bei Emil Group habe ich ein InsurTech-SaaS-Produkt übernommen, das unter Lieferdruck die Sprint-Disziplin verloren hatte: Velocity-Tracking fehlte, ein 17-köpfiges Team arbeitete als Block, und das Kundenvertrauen war angeschlagen. Ich habe das Team in kleinere Scrum-Einheiten aufgeteilt, Ownership-Konzepte eingeführt, strukturierte Refinements wiederhergestellt und durch wöchentliche Product Workshops mit den Kunden den Vertrauensverlust aufgefangen – alles parallel. Bei Rohde & Schwarz habe ich im Kontext des FCAS-Programms ein KI-Datenmanagement-System aufgebaut, wo ich als einziger PM über Architect, Data Scientists, Backend, Frontend und QA koordiniert habe und selbst ein Feature, das der Projektleiter seit Monaten von Engineers gefordert hatte, in einer Woche deliver habe.

Was mich für Ampr besonders qualifiziert: Ich verstehe technische Abhängigkeiten tief genug, um mit dem Engineering-Team die Vor- und Nachteile verschiedener Lösungswege zu diskutieren – nicht als Beobachter, sondern als Gesprächspartner. Ich kann Backlog-Triage nicht nur als Prozess beschreiben, sondern tatsächlich durchführen: Bug oder Feature?

Kundenwunsch oder Produktchance? Mit welcher Priorität? Das ist eine Urteilsaufgabe, keine Recherchefrage. Ich treffe diese Entscheidungen pragmatisch und kommuniziere sie klar nach innen wie außen.

Mein Hintergrund liegt nicht in Immobilien oder Finanzierungsvermittlung – das sage ich direkt. Die strukturelle Aufgabe, die Ampr löst, kenne ich aber gut: eine Plattform, die mehrere Partner-Typen (Makler, Portale, Banken, Finanzungsvertriebe) verbindet und deren Interessen in Produktentscheidungen übersetzen muss, ist operativ nah an dem, was ich bei Emil Group mit Erstversicherern, Rückversicherern, MGAs und Brokern gemacht habe. Die Domäne lerne ich; das Denkmuster bringe ich mit.

AI-native zu arbeiten ist für mich kein Schlagwort. Ich nutze Claude und GPT täglich für Spec-Drafting und Edge-Case-Generierung, Lovable für Frontend-Prototypen vor dem ersten Engineering-Commitment, Gamma für Stakeholder-Präsentationen und n8n für Product-Ops-Automatisierungen. Das beschleunigt meine Arbeit messbar – und ich bin neugierig darauf, wie das in eurem Setup aussieht.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Hands-on Product Manager and Product Owner with nearly ten years of experience translating complex operational workflows into scalable software systems. Background spans B2B SaaS, regulated environments, AI systems, and founder-level company building. Comfortable in ambiguity and high-pressure delivery, where requirements are incomplete, priorities shift, and teams need clarity to move. Strong track record of re-establishing sprint discipline, unblocking delivery, and holding the stakeholder interface across business, engineering, and end users. AI-native by practice, low-ego by disposition.

§ CORE STRENGTHS

- Backlog triage and prioritisation under incomplete information
- Sprint discipline: refinement, planning, review moderation
- Cross-functional alignment across engineering, business, and users
- Technical fluency sufficient for meaningful architecture discussions
- Stakeholder communication, internal and external
- Product operations design: as much process as needed, no more
- AI-native tooling applied to daily PM work
- Discovery pragmatism: knowing when research is done
- Founder-level ownership and self-organisation

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Led cross-functional team (architect, data scientists, backend, frontend, QA) on a central AI data management platform for the FCAS defence programme
- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, GitOps rollout
- Unblocked an infrastructure-level OpenShift issue independently; delivered in one week a feature the project lead had been requesting from engineers for over a year
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Responsible for data provenance, transformation transparency, and auditability with multinational stakeholders

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Owned the Arbeitsmarktmonitor analytics platform for regional labour market and demographic data
- Delivered labour shortage analytics, flexible regional comparison, and modernised admin tooling
- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration
- Migrated legacy systems to Kubernetes and managed major system upgrades
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Re-established sprint discipline and delivery stability on a B2B InsurTech platform connecting insurers, reinsurers, MGAs, brokers, and underwriters
- Split a bloated 17-person team into smaller, effective Scrum units; introduced ownership and deputy concepts
- Reintroduced velocity tracking and structured refinement practices lost under delivery pressure
- Designed and delivered a Claims Center module from concept to production rollout

- Regained client trust through structured communication and weekly product workshops; reduced senior developer attrition from near-total to a single departure

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered a mobile-first pilot app for hospitals covering digital anamnesis, meal and therapy plans, transport, chat, and patient document storage
 - Integrated CGM interface into hospital information system workflows
 - Managed stakeholder trust through transparent communication of technical complexity (legacy APIs, external databases)
-

§ FOUNDER & EARLY-STAGE EXPERIENCE

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Built a group-based P2P payment product on a P2P backbone: PSP integration, full UX/UI design, mobile app prototype
- Later acquired and operated by Sparkasse

QCRYPT AG 2016, 2018

Product Owner & Co-Founder

- Owned product architecture for quantum-secure encryption based on one-time-pad keys and true random number generator hardware; setup target of under two minutes with no technical knowledge required
- Served as deputy IT security officer

SMART SOIL TECHNOLOGIES 2016, 2021

Co-Founder, CDO, CFO & Head of HR

- Built digital tooling, financial and investment planning, and ERP introduction for an AgTech vertical farming startup
-
