

Philipp Hilbert. *Senior Product Owner for standards-driven digital media.*

Positioning, a hands-on PM with ten years of cross-functional delivery experience, ready to own digital product strategy at DIN Media's intersection of Normung and SaaS.

§ WHY DIN MEDIA

DIN Media operates at an intersection that genuinely interests me: deeply authoritative technical content meeting the practical challenge of making it accessible, searchable, and commercially viable at scale. The job description names the exact tension I find most productive – translating market and customer requirements into a digital product vision while steering cross-functional teams through the messy middle of delivery. The fact that the organisation carries 100 years of domain credibility into a digital transformation rather than starting from scratch changes the product challenge in meaningful ways: legacy structures to respect, expert user bases to serve, and a brand that cannot afford broken trust. *That kind of constrained environment is where structured product thinking compounds fastest.*

§ HONEST FRAMING

My background is in insurance SaaS, government analytics platforms, and defence AI infrastructure – not publishing or Normung specifically. The transferable mechanic is strong: all three domains involved making complex, highly regulated, expert-facing content and tooling operable by non-technical stakeholders, which is precisely what accessible standards delivery requires.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, requirements drafting and stakeholder narrative
- **GPT**, discovery synthesis and user story generation
- **GitHub Copilot**, in-sprint implementation support
- **Cursor / VSCode**, lightweight spec and edge-case iteration
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy concept work
- **Gamma.app**, structured presentation of product strategy
- **n8n**, workflow and agent automation design

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Django, JavaScript, PostgreSQL, MongoDB, REST APIs, Kubernetes, ArgoCD, Helm, Argo Workflows, OpenShift, Docker, Jenkins, Bitbucket, Git, dbt, Dagster, DuckDB, MicroStrategy, Kotlin (Spring Boot), Redpanda, Ionic, AngularJS, Shopware, low-code platforms, GitOps pipelines.

§ HOW I WOULD WORK AT DIN MEDIA

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow each team member and stakeholder group – TPO, UX, Vertrieb, Business Analytics – map the current product development flow against the stated process, and locate where user stories lose fidelity or acceptance criteria go undefined.

WEEK 2

Sharpen the backlog.

Run one structured backlog refinement session with the team, applying clear acceptance criteria templates and surfacing the two or three epics that most need prioritisation decisions from business stakeholders.

WEEK 3 +

Ship, close loops.

Take ownership of the first sprint review, own the stakeholder communication, and begin iterating the product strategy narrative so Vertrieb and Produktmanagement have a transparent view of what is coming and why.

I COVER LETTER

Dear DIN Media hiring team,

DIN Media sits at a moment most product organisations never reach: a century of institutional credibility being converted, deliberately and at pace, into digital services that experts actually want to use daily. That problem – making authoritative, complex content operable by people who need it to do their real work – is the product challenge I have spent the last decade solving in different guises.

At Emil Group I joined a B2B InsurTech SaaS in crisis: a 17-person team delivering inconsistently, client trust eroding, senior developers leaving. I split the team into structured Scrum units, reintroduced velocity tracking, ran weekly product workshops with clients, and delivered a Claims Center module from concept to production. Client trust was rebuilt and attrition dropped from near-total to a single departure. The mechanism there was not clever feature prioritisation alone – it was structured, transparent communication across every stakeholder level simultaneously, which is exactly what your job description identifies as central to this role.

At Rohde & Schwarz, working on the FCAS defence programme, I owned end-to-end feature delivery on an AI data management platform: writing user stories, defining acceptance criteria, supporting implementation, and managing GitOps rollout. I reduced deployment times from several days to 20–40 minutes by introducing ArgoCD-based GitOps, and I independently delivered in one week a feature a project lead had been requesting from engineers for over a year. The environment was ambiguous, multinational, and under constant pressure – conditions where pragmatic decision-making matters more than process purity.

Earlier, in my role as Proxy Product Owner at AOK ITSCare, I managed the migration of an internal webshop to Shopware, including complex catalogue integration and customisable approval policies for a health insurance buyer context – a direct encounter with the challenge of making a rules-heavy, structured product catalogue usable through a clean digital interface. That experience is closer to the DIN Media product challenge than it might first appear.

I bring ten years of product ownership across regulated, expert-facing, and technically complex domains. I am German-native, Berlin-based, authorised to work in Germany without restriction,

and available within four weeks of an offer. I would welcome the opportunity to discuss how my background maps to your current roadmap priorities.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Owner with nearly ten years of experience translating complex, expert-facing operational workflows into scalable digital products. Background spans B2B SaaS platforms in InsurTech, government analytics, defence AI infrastructure, and healthcare – environments where requirements are high-stakes, users are specialists, and delivery discipline directly affects institutional trust. Comfortable leading cross-functional teams across TPO, engineering, UX, and business stakeholders, with strong sprint discipline, structured stakeholder communication, and end-to-end ownership from user story to production rollout. German native, English C2, Berlin-based, EU citizen.

§ CORE STRENGTHS

- Translating complex domain requirements into actionable user stories
- Cross-functional team leadership across TPO, dev, UX, and Vertrieb
- Sprint discipline, backlog ownership, and velocity recovery
- Stakeholder communication across all hierarchy levels
- Structured client trust rebuilding under delivery pressure
- Agile and hybrid project management in regulated environments
- Digital service commercialisation and product strategy development
- Pragmatic prioritisation under ambiguity and shifting requirements
- Business-analytical thinking with founder-level accountability

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout
- Led a cross-functional team including architect, data scientists, backend and frontend engineers, and QA
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature a project lead had been requesting for over a year
- Managed data transformation, transparency, and auditability requirements with multinational stakeholders

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Delivered new platform features including labour shortage analytics, flexible regional comparison, and modernised admin tooling
- Designed interactive dashboards and community features (groups, networks, events) for a public-facing analytics product
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage
- Migrated legacy systems to Kubernetes and standardised CI/CD with full test integration
- Introduced Dagster for automated ETL and indicator generation

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Re-established sprint discipline and delivery stability; split a bloated 17-person team into smaller, effective Scrum units with ownership and deputy concepts
- Designed and delivered a Claims Center module from concept to production rollout
- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops
- Reintroduced velocity tracking and structured refinement practices lost under delivery pressure
- Reduced senior developer attrition from near-total to a single departure

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core patient-facing flows including digital anamnesis, meal and therapy plans, transport, chat, and document storage
 - Built stakeholder trust through transparent communication of technical complexity (legacy APIs, external databases)
 - Led a small team under tight deadlines with strict focus on highest-leverage features
 - Integrated CGM interface into hospital information system workflows
-

§ FOUNDER & EARLY-STAGE EXPERIENCE

QCRYPT AG 2016, 2018

Product Owner, Co-Founder

- Owned product architecture for backup, restore/checkpoint, and data-encryption on a quantum-secure OTP/true-RNG platform
- Positioned product for non-technical users: setup under two minutes, no prior technical knowledge required
- Served as deputy IT security officer; responsible for attack vector analysis and security architecture documentation

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Founded and built a group-based P2P payments product on a P2P backbone
- Owned PSP integration, full UX/UI design, and mobile app prototype end-to-end
- Product later acquired and operated by Sparkasse

AOK HEALTH INSURANCE – ITSCARE 2019, 2020

Proxy Product Owner

- Managed migration of internal webshop to Shopware including complex catalogue and API integration
- Designed customisable approval policies for a health insurance procurement context
- Coordinated between business stakeholders, external developers, and platform vendor
