

Philipp Hilbert. *Product Owner who ships agentic AI, not just roadmaps.*

Positioning, ten years of B2B product delivery, AI-native execution, and agentic workflow design – now focused on corporate AI that converts.

§ WHY SIXT

SIXT is building agentic AI into its corporate sales layer at a moment when most competitors are still running rule-based chatbots. The explicit mention of Virtual Sales Assistants and CRM integration with Salesforce signals that this is a real product mandate, not an innovation theatre project. That gap between where enterprise AI is today and where it needs to be to handle end-to-end B2B sales touchpoints is exactly the design space I have been working in – mapping multi-step workflows, defining fallback logic, and owning the KPIs that prove it worked. *That is exactly the kind of problem where operational precision and AI-native tooling compound into something useful.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, prompt engineering and conversational AI design
- **GPT**, spec and edge-case generation, dialogue flow drafting
- **GitHub Copilot**, in-sprint implementation support
- **Claude Code**, in-repo refactors and acceptance criteria
- **n8n**, multi-agent and agentic workflow orchestration
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy interface iteration
- **Gamma.app**, stakeholder presentations and workshop materials

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kotlin (Spring Boot), Python, Django, JavaScript, PostgreSQL, MongoDB, Kubernetes, ArgoCD, Argo Workflows, Helm, OpenShift, Jenkins, Dagster, dbt, DuckDB, REST APIs, Redpanda, Bitbucket, GitOps pipelines, CGM API integration, Shopware, Ionic, AngularJS.

§ HOW I WOULD WORK AT SIXT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Walk every live corporate sales touchpoint – chat, voice, Salesforce handoff – with sales reps and data scientists to map where the current AI drops conversations and where conversion is being lost.

WEEK 2

Slice, baseline, prioritise.

Define the two or three highest-leverage intervention points, set baseline CSAT and conversion metrics, and structure the backlog around measurable impact rather than feature volume.

WEEK 3+

Ship, measure, iterate.

Push the first scoped agent improvement to production, instrument it against the baseline, and run a structured retrospective with sales stakeholders to anchor the next cycle.

I COVER LETTER

Dear Hiring Team,

I am applying for the Senior Product Owner Agentic AI B2B role at SIXT. The combination of agentic AI, B2B sales process ownership, and global deployment at scale is a design space I have been working in directly – and one I want to own end-to-end.

At Rohde & Schwarz, I built and shipped a central AI data management platform inside a multinational defence programme, owning everything from user stories and acceptance criteria

through to GitOps rollout. I designed audit-trail pipelines, SafeAI evaluation concepts, and autonomous feature sets that unblocked a cross-functional team of architects, data scientists, and engineers. The work required me to translate between business needs and technical constraints daily, which is exactly the skill the SIXT role demands when bridging sales, engineering, and data science around conversational AI.

At Emil Group, I took over a B2B SaaS platform that had lost client trust and sprint discipline simultaneously. I restructured a 17-person team into smaller Scrum units, reintroduced velocity tracking, and ran weekly product workshops that rebuilt stakeholder confidence in a prototype-stage environment. I know what it takes to keep a roadmap credible when the system is mid-construction and the business is watching closely.

The agentic AI component of this role is not new territory for me. I have designed multi-agent workflows using n8n, built autonomous agent loops with file-queue-based orchestration, and used Claude, GPT, and GitHub Copilot daily to accelerate delivery. I understand the difference between a well-designed fallback in a voicebot and a frustrating dead end, and I know how to set up the KPIs that distinguish the two.

SIXT's product mandate here – Virtual Sales Assistants, chat and voice bots, CRM integration with Salesforce – is the kind of work that requires both product rigour and genuine AI fluency. I bring both, along with the German-language B2B context, the cross-functional stakeholder management experience, and the delivery track record to execute it.

I would welcome the opportunity to talk.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Hands-on Product Manager and Product Owner with nearly ten years of experience translating complex B2B workflows into scalable AI-enabled systems. Has delivered agentic AI tooling, ETL and analytics platforms, InsurTech SaaS, and mobile healthcare products across regulated and high-stakes environments. Fluent in AI-native execution – from prompt engineering and multi-agent workflow design through to GitOps deployment. Equally comfortable owning a backlog, facilitating a stakeholder workshop, and unblocking an infrastructure issue independently. Operates with low ego and high delivery accountability.

§ CORE STRENGTHS

- Conversational and agentic AI: design, delivery, and optimisation
- Translating B2B sales workflows into AI product requirements and KPIs
- Cross-functional alignment across sales, engineering, data science, and QA
- Backlog ownership, sprint discipline, and velocity management
- AI-native product execution and rapid prototyping
- Prompt engineering and multi-agent orchestration
- End-to-end feature delivery, user story through production rollout
- Stakeholder trust rebuilding in high-pressure delivery environments
- Technical fluency across modern backend and infrastructure stacks

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Owned an agentic AI data management platform from requirements through GitOps rollout, delivering full data provenance, audit trails, and SafeAI evaluation concepts for a multinational stakeholder group
- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and deployment
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level issues in OpenShift independently, delivering in one week a feature that had been pending from the engineering team for over a year
- Led cross-functional team of architect, data scientists, backend and frontend engineers, and QA across a European defence programme (FCAS)

FEDERAL EMPLOYMENT AGENCY 2023, 2024

Product Manager, Public Data Analytics

- Owned the product roadmap for the Arbeitsmarktmonitor, a public analytics platform serving regional labour market stakeholders across Germany
- Introduced Dagster for automated ETL and indicator generation, standardising reproducible data pipelines
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage

- Migrated legacy systems to Kubernetes and standardised CI/CD with full test integration at build time
- Designed interactive dashboards, community features, and modernised admin tooling

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Owned B2B InsurTech SaaS product that reduced insurance product time-to-market from over one year to under one week, serving primary insurers, reinsurers, MGAs, brokers, and underwriters
- Designed and delivered Claims Center module from concept to production rollout
- Restructured a bloated 17-person team into smaller, effective Scrum units and reintroduced velocity tracking and structured refinement practices
- Rebuilt client trust in a prototype-stage environment through weekly product workshops and structured stakeholder communication
- Reduced senior developer attrition from near-total to a single departure

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered a mobile-first pilot app for hospitals on iOS and Android, covering digital anamnesis, meal and therapy plans, transport, chat, and patient document management
- Integrated CGM API into hospital information system workflows under tight delivery constraints
- Managed stakeholder trust through transparent communication of technical complexity involving legacy APIs and external databases

§ FOUNDER & EARLY-STAGE EXPERIENCE

- **Co-Founder, CDO & Head of HR – Smart Soil Technologies (2021):** Digital tooling, financial and investment planning for an agritech startup in vertical indoor farming.
- **Product Owner – COVID-19 Data Platform, Bundesdruckerei (2021):** RKI projects DIM and DESH. Secure data structures and identity management.
- **Proxy Product Owner – AOK Health Insurance ITSCare (2019–2020):** Shopware webshop migration including complex catalogue and API integration with customisable approval policies.
- **Product Owner – Qcrypt AG (2016–2018):** Quantum-secure encryption product (OTP, true-RNG hardware). Setup under two minutes, no technical knowledge required. Deputy IT security officer. English-language product promotion video available on request.

- **Founder & CFO – Kvitt Payment Solutions (2013–2018):** Group-based P2P payment product on a P2P backbone, including PSP integration, full UX/UI design, and mobile prototype. Later acquired by Sparkasse.
