§ WHY NEXT VENTURES

The role sits at the intersection of enterprise roadmapping, cross-functional leadership, and commercially oriented digital services – exactly the operating model I have worked in across InsurTech, public analytics, and defence programme contexts. The explicit mention of eCommerce as advantageous maps directly to my Shopware migration work at ITSCare/AOK, where I owned a complex catalogue and API integration with customisable approval policies. The hybrid model and structured onboarding signal an organisation that invests in people rather than just headcount. *That is exactly the environment where careful, low-ego product work compounds.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, discovery, spec drafting, edge-case generation
- **GPT**, stakeholder communication and user story refinement
- **GitHub Copilot**, in-repo feature support
- **Cursor/VSCode**, LLM-assisted development cycles
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy wireframes and concept screens

- **Gamma.app**, structured presentation and stakeholder decks
 - **n8n**, agentic workflow automation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Delivered production work across Python, Django, JavaScript, PostgreSQL, MongoDB, Kotlin (Spring Boot), Kubernetes, ArgoCD, Helm, Jenkins, dbt, Dagster, DuckDB, REST APIs, Redpanda, OpenShift, AngularJS, Ionic, and Shopware. Experienced with GitOps rollout pipelines, CI/CD standardisation, and low-code insurance platform tooling.

§ SIDE PROJECT

DEV AGENT FRAMEWORK [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Personal infrastructure for agentic, file-queue-based automation and crypto market analysis.

- Builds autonomous agent loops using file-queue orchestration for repeatable task execution without manual intervention.
 - Architecture layers n8n-based workflow triggers over Python execution environments for composable agent pipelines.
 - Incorporates backtesting engine components targeting crypto market microstructure analysis.
 - Directly relevant to the role's digital innovation mandate: demonstrates self-directed platform thinking beyond day-to-day PM work.
-

§ HOW I WOULD WORK AT NEXT VENTURES

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the existing roadmapping cadence, map stakeholder dependencies across GTM, engineering, and marketing, and identify where the highest-friction handoffs currently sit.

WEEK 2

Slice and prioritise.

Take one in-flight initiative, sharpen its acceptance criteria, and surface any missing business or technical assumptions before the next sprint planning.

WEEK 3+

Ship and close loops.

Drive delivery on the first owned backlog slice end-to-end, establish a lightweight retrospective rhythm with the cross-functional team, and begin contributing to the enterprise roadmap view.

I COVER LETTER

Dear Hiring Team at Next Ventures,

I am applying for the Senior Product Owner role in Berlin. With nearly ten years owning product backlogs and roadmaps across enterprise software, regulated platforms, and commercially focused digital services, I am confident I can step in and add value quickly – not after a long ramp-up.

The job description asks for someone who can translate customer, market, and business needs into a clear product vision while managing delivery across cross-functional teams. That is the core of what I have done across every role. At Emil Group, I took over an InsurTech B2B SaaS platform under significant delivery pressure – a prototype-stage environment where client trust had deteriorated. I restructured a bloated 17-person team into smaller Scrum units, reintroduced velocity tracking and structured refinement, and ran weekly product workshops to rebuild stakeholder confidence. The commercial outcome was measurable: senior developer attrition dropped from near-total to a single departure, and the platform regained credibility with primary insurers and reinsurers. At Rohde & Schwarz, I led a cross-functional team spanning architects, data scientists, backend and frontend engineers, and QA on a government defence programme – an environment where ambiguity is constant and the cost of miscommunication is high.

The posting mentions eCommerce experience as advantageous. My most direct exposure comes from AOK ITSCare, where I owned the migration of an internal webshop to Shopware. This included complex product catalogue integration, third-party API mapping, and the design of customisable approval policies – a genuinely technical migration with real commercial stakes for the insurance procurement workflow it supported. I also hold a logistics specialisation from my Diplom Wirtschaftsingenieur at TU Berlin, which gives me a structural understanding of supply chain and operations contexts that often underpin eCommerce platform decisions.

The role calls for confident decision-making in complex or ambiguous situations and transparent communication with both technical and non-technical audiences. I have served as deputy IT Security Officer, led infrastructure-level unblocking independently, and presented product strategy to multinational stakeholders under a European defence programme. At the Federal Employment Agency, I advanced the Arbeitsmarktmonitor analytics platform, introduced Dagster-based ETL automation, and managed major Kubernetes migrations – all while maintaining governance and data lineage standards. These experiences have sharpened my ability to hold a technical conversation with an engineer and a strategic one with a board-level stakeholder in the same afternoon.

I am Berlin-based, hold German and English at native and C2 level respectively, and am available within four weeks of an offer. I would be glad to discuss the role and how my experience maps to your current product priorities.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Owner and Product Manager with nearly ten years of experience driving digital platforms and cross-functional delivery across InsurTech, public analytics, defence, and healthcare contexts. Consistently operates at the intersection of business strategy, engineering reality, and user need – translating ambiguous requirements into prioritised, dev-ready backlogs and shipping production outcomes. Strong communicator across technical and non-technical audiences, with a track record of rebuilding delivery discipline and stakeholder trust under pressure. AI-native in daily workflow, German-native in language, and commercially grounded in every product decision.

§ CORE STRENGTHS

- Translating business and user needs into actionable backlogs
- Enterprise roadmapping and stakeholder alignment across management levels
- Agile framework execution: Scrum restructuring, velocity tracking, sprint discipline
- Cross-functional team leadership: engineering, QA, data science, GTM, marketing
- eCommerce and Shopware platform product ownership
- Transparent communication with technical and non-technical audiences

- Product discovery and prioritisation under ambiguity
- KPI-oriented delivery with commercial outcome focus
- German-native, English C2: fluent in both working languages

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Led a cross-functional team including architect, data scientists, backend and frontend engineers, and QA within the European defence programme FCAS.
- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout.
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD.
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature the project lead had been requesting from engineers for over a year.
- Managed data transparency, transformation, and auditability requirements with multinational stakeholders.

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Advanced the Arbeitsmarktmonitor analytics platform, delivering labour shortage analytics, flexible regional comparison, and modernised admin tooling.
- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration at build time.
- Migrated legacy systems to Kubernetes and managed major system upgrades.
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage.
- Designed interactive dashboards, community features, and structured product communication for non-technical stakeholders.

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Re-established sprint discipline and delivery stability on a B2B InsurTech platform; split a bloated 17-person team into smaller, effective Scrum units with ownership and deputy concepts.

- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops with insurers, reinsurers, MGAs, and brokers.
- Designed and delivered a Claims Center module from concept to production rollout.
- Reduced senior developer attrition from near-total to a single departure.
- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation.

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Owned delivery of a mobile-first hospital app across iOS and Android covering digital anamnesis, meal and therapy plans, transport, chat, and patient document storage.
- Integrated CGM interface into hospital information system workflows and managed legacy API complexity transparently with stakeholders.
- Led a small cross-functional team under tight deadlines with strict focus on highest-leverage features.

§ FOUNDER & EARLY-STAGE EXPERIENCE

ITSCARE / AOK HEALTH INSURANCE 2019, 2020

Proxy Product Owner

- Owned migration of internal procurement webshop to Shopware, including complex product catalogue integration, third-party API mapping, and customisable approval policy design.

QCRYPT AG 2016, 2018

Co-Founder & Product Owner

- Defined product architecture for a quantum-secure encryption product built on one-time-pad keys and true random number generator hardware.
- Owned backup, restore/checkpoint, and encryption feature sets; achieved a setup-under-two-minutes UX target for non-technical users.
- Served as deputy IT security officer.

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Founded and built a group-based P2P payment product on a P2P backbone, including PSP integration, full UX/UI design, and mobile app prototype.
- Product later acquired and operated by Sparkasse.
