

Philipp Hilbert. *Product Owner who closes the gap between client intent and working software.*

Positioning, Berlin-based Product Owner with ten years of Scrum delivery, cross-functional stakeholder work, and a record of restoring sprint discipline in complex B2B projects.

§ WHY ASSECOR

Assecor builds coherent digital solutions for complex client situations, which is precisely the domain where a Product Owner earns their keep – not by writing polished user stories in a vacuum, but by sitting at the intersection of client requirements, engineering reality, and delivery risk. The posting mentions Industrie 4.0 and digitisation contexts, which maps directly onto work I have done at Rohde & Schwarz inside the FCAS programme and at the Federal Employment Agency building public analytics infrastructure. What draws me specifically is the flat hierarchy and the promise of short decision paths – at Emil Group I had to rebuild sprint discipline and team trust almost from scratch inside a bloated structure; a flat org is one where I can focus on product work rather than navigating layers. *That is the kind of environment where careful communication and fast iteration compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, requirements drafting and edge-case generation
- **GPT**, stakeholder communication drafts and research synthesis
- **GitHub Copilot**, in-editor implementation support
- **Cursor / VSCode**, lightweight code review and spec validation

- **Lovable**, rapid front-end prototyping
 - **Framer**, design-heavy wireframing and concept validation
 - **Gamma.app**, structured stakeholder presentation decks
 - **n8n**, automated workflow orchestration
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), JavaScript, PostgreSQL, MongoDB, Django, AngularJS, Ionic, REST APIs, Kubernetes, ArgoCD, Argo Workflows, Helm, OpenShift, Jenkins, Bitbucket, Git, dbt, Dagster, DuckDB, MicroStrategy, Redpanda, Shopware, JIRA, Confluence, low-code insurance platforms.

§ SIDE PROJECT

BACKTEST ENGINE & DEV AGENT FRAMEWORK [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Crypto market backtesting engine and personal agentic development framework, built from scratch.

- Implements a file-queue-based agent loop for autonomous task execution across research and coding workflows.
 - Architecture combines Python-based backtesting core with n8n orchestration and LLM-assisted decision steps.
 - Active development across multiple repos; used daily for real trading strategy evaluation on Hyperliquid and Bitget.
 - Demonstrates the kind of autonomous, requirement-to-implementation ownership that translates directly into credible technical conversations with a Scrum development team.
-

§ HOW I WOULD WORK AT ASSECOR

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit in on ongoing sprint ceremonies and client-facing workshops to understand how requirements currently travel from stakeholder to backlog item, and where ambiguity or translation loss typically occurs.

WEEK 2

Audit the backlog.

Work through existing backlog items with the team to identify stories that are under-specified, acceptance criteria that are untestable, and sprint commitments that carry unacknowledged dependencies.

WEEK 3 +

Own and close loops.

Run the first refinement sessions end-to-end, facilitate client acceptance of delivered items, and establish a lightweight reporting cadence that gives management visibility without adding ceremony overhead to the team.

I COVER LETTER

Dear Assecor team,

The formula in your posting – "As a Product Owner I want to work in a great team in order to get the best out of myself and the others" – is a good shorthand for what the role actually demands: the ability to hold client intent and engineering reality in the same head, and to translate between the two without information loss. That is the work I have been doing for the past ten years across defence, public sector, InsurTech, healthcare, and early-stage ventures.

At Emil Group, I joined a B2B InsurTech platform where sprint discipline had collapsed under delivery pressure. A 17-person team was operating without clear ownership, velocity tracking had been abandoned, and client trust was deteriorating. I split the team into smaller Scrum units, reintroduced structured refinement and velocity tracking, rebuilt a weekly workshop cadence with clients, and delivered the Claims Center module from concept to production. Senior developer attrition dropped from near-total to a single departure. That kind of recovery requires precisely what your posting describes: sensitive communication in flat structures, agile mindset, and value-maximising judgement under pressure.

At Rohde & Schwarz, I was the sole Product Manager on a European defence AI platform (FCAS), responsible for end-to-end delivery of complex data transformation features across a cross-functional team of architects, data scientists, and engineers. I wrote the user stories, supported implementation, and drove GitOps-based rollout – reducing deployment times from several days to under an hour. That experience sharpened my ability to manage both fachliche Anforderungen and technical feasibility in parallel, which is the core of stakeholder-to-backlog translation.

At the Federal Employment Agency, I owned a public-facing analytics platform for regional labour market data, served as Deputy IT Security Officer, and introduced Dagster for automated ETL pipelines. The stakeholder landscape there – federal governance, data science teams, regional administrators – required exactly the kind of multi-level communication and reporting discipline your posting calls out.

I am based in Berlin, hold German as my native language and English at C2, and am available within four weeks. I would welcome a conversation about how I can contribute to your client projects.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Owner and Product Manager with close to ten years of experience turning complex client requirements into structured backlog items and working software. Operated across B2B SaaS, public sector analytics, defence AI, InsurTech, and healthcare. Comfortable in Scrum environments with incomplete requirements, shifting priorities, and multi-stakeholder communication demands. Track record of restoring delivery discipline, closing the client-to-team translation gap, and shipping end-to-end without losing non-functional requirements along the way. Native German speaker, C2 English, Berlin-based.

§ CORE STRENGTHS

- Translating stakeholder requirements into precise, dev-ready backlog items
- Sprint planning, velocity tracking, and delivery risk management
- Cross-functional alignment across clients, engineering, QA, and management
- Facilitating workshops and managing fachliche Abnahme with clients
- Restoring Scrum discipline in stressed or disorganised delivery teams
- Reporting across product team, client team, and management levels
- Functional and non-functional requirements engineering
- AI-native tooling applied to specification, prototyping, and delivery
- Founder-level pragmatism: high agency, low ego, outcome-focused

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps rollout
- Led cross-functional team of architect, data scientists, backend and frontend engineers, and QA across multinational stakeholders
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level delivery issues in OpenShift independently; delivered in one week a feature engineers had not shipped in over a year
- Responsible for data transformation transparency, audit trails, and full data provenance under defence programme requirements

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Delivered labour shortage analytics, flexible regional comparison features, and modernised admin tooling on the Arbeitsmarktmonitor platform
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage
- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration
- Managed major system upgrades and Kubernetes migration of legacy infrastructure
- Reported across data science, regional administration, and federal governance stakeholders

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Designed and delivered a Claims Center module from concept to production rollout on a B2B insurance platform serving primary insurers, reinsurers, MGAs, and brokers
- Re-established sprint discipline: split a bloated 17-person team into smaller Scrum units; reintroduced velocity tracking and structured refinement
- Rebuilt client trust through structured communication and weekly product workshops in a prototype-stage environment
- Reduced senior developer attrition from near-total to a single departure
- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core patient flows: digital anamnesis, meal and therapy plans, transport, chat, and document storage on iOS and Android
 - Integrated CGM interface into hospital information system workflows
 - Communicated technical constraints (legacy APIs, external databases) transparently to hospital stakeholders to maintain delivery trust
-

§ FOUNDER & EARLY-STAGE EXPERIENCE

QCRYPT AG 2016, 2018

Product Owner & Deputy IT Security Officer

- Owned product architecture for quantum-secure encryption based on one-time-pad keys and true random number generator hardware
- Defined backup, restore, checkpoint, and encryption feature scope; drove USP of sub-two-minute setup with no technical knowledge required

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Built a group-based P2P payments product on a P2P backbone; owned PSP integration, UX/UI design, and mobile app prototype
- Product later acquired and operated by Sparkasse

AOK HEALTH INSURANCE – ITSCARE (VIA PROJUNCTA) 2019, 2020

Proxy Product Owner

- Managed migration of internal webshop to Shopware including complex catalogue and API integration and configurable approval policy workflows

BUNDESDRUCKEREI 2021, 2021

Product Owner, COVID-19 Data Platform

- Delivered secure data structures and identity management for RKI projects DIM and DESH
-
