

Philipp Hilbert. *AI-native Product Owner for a digitalization platform built on real intelligence.*

Positioning, ten years of hands-on Product Management, AI-native tooling, and end-to-end delivery – brought to bear on making Simplifier the default platform for intelligent digitalization.

§ WHY SIMPLIFIER

Simplifier sits at an interesting intersection: a low-code digitalization platform actively pushing toward becoming AI-native, competing in a market where most incumbents bolt AI on as an afterthought. The job description names "KI als eigenes Handwerkzeug" as a requirement – not a nice-to-have – which signals that the team is serious about building with AI rather than merely talking about it. That orientation matches exactly how I work: prototypes with Lovable and Framer, specs drafted with Claude, agentic workflows assembled in n8n, all feeding into structured engineering handoffs. *That is the kind of product ownership that closes the gap between AI hype and shipped product.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, spec drafting, edge-case generation, user story refinement
- **GPT**, research synthesis and stakeholder communication drafts
- **Cursor / VSCode**, in-repo exploration and implementation support
- **Lovable**, rapid front-end prototyping from plain-text prompts
- **Framer**, design-heavy interactive mockups
- **Gamma.app**, stakeholder presentations and product demos

- **n8n**, agentic workflow design and multi-step automation
 - **GitHub Copilot**, code review support and acceptance criteria validation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kotlin with Spring Boot, Python, Django, JavaScript, AngularJS, Ionic, PostgreSQL, MongoDB, REST APIs, Kubernetes, ArgoCD, Helm, Argo Workflows, OpenShift, Jenkins, Dagster, dbt, DuckDB, Redpanda, MicroStrategy, Git, Bitbucket, low-code platform backends, CGM API integration, Shopware.

§ SIDE PROJECT

DEV AGENT FRAMEWORK [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A file-queue-based autonomous agent loop for crypto market backtesting and trading automation.

- Orchestrates multi-step research and execution tasks through a structured file-queue agent pattern.
 - Built on Python with n8n handling inter-agent communication and state handoff.
 - Powers a backtesting engine for crypto markets and connects to live venues including Hyperliquid and Jupiter.
 - Demonstrates the same agentic workflow design and autonomous feature delivery the Simplifier AI roadmap will require.
-

§ HOW I WOULD WORK AT SIMPLIFIER

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the engineering team and current stakeholder touchpoints, map the existing product roadmap against customer feedback already in the backlog, and identify where AI capability is aspired to versus where it is actually specified well enough to be built.

WEEK 2

Slice and validate.

Pick one AI feature on the roadmap that is insufficiently defined, run a focused refinement session with engineering and at least one customer, and produce a shippable user story with acceptance criteria.

WEEK 3+

Ship, measure, iterate.

Establish a lightweight data-driven review loop – delivery velocity, customer feedback signal, feature adoption – and use it to drive the first roadmap reprioritisation with clear rationale for stakeholders.

I COVER LETTER

Sehr geehrte Damen und Herren,

ich bewerbe mich als Product Owner mit AI-Fokus bei Simplifier. Was mich an der Rolle konkret interessiert: Simplifier will eine Digitalisierungsplattform nicht nur mit KI-Features anreichern, sondern KI-nativ neu denken. Das ist eine andere, anspruchsvollere Aufgabe – und genau die Art von Aufgabe, für die ich mich in den vergangenen Jahren systematisch aufgestellt habe.

Bei Rohde & Schwarz habe ich innerhalb des europäischen Verteidigungsprogramms FCAS eine zentrale KI- und Datenmanagementplattform für multimodale Datensätze aufgebaut. Dabei habe ich autonome Feature-Sets vollständig end-to-end geliefert: von User Stories über Akzeptanzkriterien, Implementation Support und Testing bis zum GitOps-basierten Rollout mit ArgoCD. Ich habe Infrastrukturblockaden in OpenShift eigenständig gelöst, Deploymentzeiten von mehreren Tagen auf 20–40 Minuten reduziert und ein cross-funktionales Team aus Architekten, Data Scientists, Backend- und Frontend-Entwicklern sowie QA geleitet. Das ist der Arbeitsstil, den ich mitbringe: technisch nah, lieferorientiert, ohne Umwege über endlose Abstimmungsschleifen.

Bei der Bundesagentur für Arbeit habe ich eine Analytics-Plattform für Arbeitsmarktdaten weiterentwickelt, ETL-Prozesse mit Dagster automatisiert und als stellvertretender IT-Sicherheitsbeauftragter Governance- und Compliance-Anforderungen verantwortet. Bei Emil Group habe ich ein 17-köpfiges, unstrukturiertes Scrum-Team in funktionierende Einheiten aufgeteilt, Sprint-Disziplin wiederhergestellt und Kundevertrauen in einer Prototyp-Umgebung durch strukturierte Kommunikation und wöchentliche Product Workshops zurückgewonnen. KI nutze ich täglich als Handwerkzeug: Claude für Spec-Drafts und Edge-Case-Generierung, Lovable und Framer für Rapid Prototyping, n8n für agentic Workflows, Gamma.app für Stakeholder-Präsentationen.

Ich bringe fließendes Deutsch und Englisch auf C2-Niveau mit, bin mit agilen Methoden vertraut und habe mit Azure DevOps, Jira und Confluence gearbeitet. Mein Abschluss als Diplom-Wirtschaftsingenieur an der TU Berlin gibt mir das strukturelle Fundament, technische und betriebswirtschaftliche Anforderungen gleichermaßen zu durchdenken.

Ich freue mich auf ein Gespräch mit Tanya Gogova-Stang oder dem Simplifier-Team.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Owner and Product Manager with nearly ten years of experience delivering scalable software in regulated, technically complex environments. At Rohde & Schwarz I shipped AI data platform features end-to-end within a European defence programme. At the Federal Employment Agency I owned an analytics platform and served as Deputy IT Security Officer. At Emil Group I restructured delivery, restored sprint discipline, and rebuilt client trust in a prototype-stage environment. I work AI-native by default: Claude, Lovable, Framer, and agentic workflow tooling are part of my daily practice, not experiments.

§ CORE STRENGTHS

- Translating complex operational workflows into dev-ready requirements
- AI-native product execution: prototyping, agentic workflows, LLM-assisted specs
- Roadmap ownership aligned to business goals and customer needs
- Sprint discipline, backlog management, and velocity restoration
- Cross-functional alignment across engineering, QA, data science, and stakeholders
- Data-driven product decisions and KPI-oriented prioritisation
- UX intuition and empathy-driven feature design
- Agile facilitation, workshop moderation, and client trust rebuilding
- Founder-level pragmatism: high agency, low ego, bias toward delivery

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Built a central AI and data management platform for multimodal datasets (image, audio, tabular) within the European defence programme FCAS
- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Improved data quality via filtering, tagging, reproducible transformation pipelines, and full audit trails with data provenance
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature requested from engineers for over a year
- Led cross-functional team including architect, data scientists, backend and frontend engineers, and QA
- Enabled ML training and evaluation on curated datasets with transparent evaluation concepts (SafeAI, ExplainableAI)

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Advanced the Arbeitsmarktmonitor, an analytics platform for regional labour market and demographic data
- Delivered new features including labour shortage analytics, flexible regional comparison, and modernised admin tooling
- Introduced Dagster for automated ETL and indicator generation, standardised CI/CD with full test integration
- Designed interactive dashboards, tables, and community features
- Served as Deputy IT Security Officer (IT-SV) with focus on compliance, governance, and data lineage
- Migrated legacy systems to Kubernetes and managed major system upgrades

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation on a B2B InsurTech platform reducing insurance time-to-market from over one year to under one week
- Designed and delivered a Claims Center module from concept to production rollout
- Re-established sprint discipline and delivery stability; split a bloated 17-person team into smaller, effective Scrum units with ownership and deputy concepts
- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops
- Reduced senior developer attrition from near-total to a single departure

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage on a mobile-first pilot app for hospitals
- Integrated CGM interface into hospital information system workflows
- Built stakeholder trust through transparent communication of technical complexity with legacy APIs and external databases
- Led a small team under tight deadlines with strict focus on highest-leverage features

BUNDESDRUCKEREI 2021, 2021

Product Owner, COVID-19 Data Platform

- Owned product for RKI projects DIM and DESH: secure data structures and identity management under regulated conditions

AOK HEALTH INSURANCE – ITSCARE 2019, 2020

Proxy Product Owner

- Led migration of internal webshop to Shopware including complex catalogue and API integration and customisable approval policies

§ FOUNDER & EARLY-STAGE EXPERIENCE

QCRYPT AG 2016, 2018

Product Owner & Deputy IT Security Officer

- Owned product architecture for a quantum-secure encryption product based on one-time-pad keys and true random number generator hardware
- Designed for setup under two minutes with no technical knowledge required; served as deputy IT security officer

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Built a group-based P2P payments product on a P2P backbone; responsible for PSP integration, full UX/UI design, and mobile app prototype; later acquired and operated by Sparkasse
