

Philipp Hilbert. *Enterprise PM who ships workflow infrastructure, not slide decks.*

Positioning, a product manager with ten years owning complex technical workflows end-to-end, built to make automation feel like first-class software engineering.

§ BEARING

Enterprise-focused Product Manager with nearly ten years of experience owning complex technical workflows from discovery through GitOps-based production rollout. Background spans AI data platforms, public analytics infrastructure, InsurTech SaaS, and mobile healthcare – consistently in environments where requirements are incomplete, stakeholders are technically demanding, and delivery rigour is non-negotiable. Equally comfortable writing acceptance criteria, unblocking an OpenShift deployment independently, and running stakeholder workshops across engineering, compliance, and enterprise customers. Low ego, high agency, and a strong bias for shipping over planning.

§ CORE STRENGTHS

- Workflow lifecycle management: environment separation, promotion paths, rollback
- GitOps and CI/CD pipeline ownership with ArgoCD, Kubernetes, Jenkins
- Enterprise developer experience and Git-based source control product design
- Production observability, audit trails, and data provenance for regulated environments
- Cross-functional alignment across engineering, design, sales, and customer success
- Backlog discipline, sprint restructuring, and velocity recovery under delivery pressure
- Technical fluency sufficient for architecture-level tradeoff discussions
- Product discovery in ambiguity: risk-first framing across value, feasibility, and viability
- Founder-level pragmatism: ships, learns, iterates rather than over-plans

§ PROFESSIONAL EXPERIENCE

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD across a Kubernetes/OpenShift environment.
- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout.
- Unblocked infrastructure-level issues in OpenShift independently; sole developer for a feature the project lead had been requesting from engineers for over a year – delivered in one week.
- Improved data quality via filtering, tagging, reproducible data transformation pipelines, and audit trails with full data provenance.
- Enabled ML training and evaluation on curated datasets with transparent evaluation concepts (SafeAI, ExplainableAI).
- Led a cross-functional team including architect, data scientists, backend and frontend engineers, and QA.

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Introduced Dagster for automated ETL and indicator generation, standardised CI/CD with full test integration at build time.
- Migrated legacy systems to Kubernetes and managed major system upgrades.
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage.
- Delivered new features including labour shortage analytics, flexible regional comparison, and modernised admin tooling.
- Designed interactive dashboards and community features for a platform serving regional labour market stakeholders.

Emil Group 2022, 2022

Product Manager, InsurTech SaaS Platform

- Re-established sprint discipline and delivery stability; split a bloated 17-person team into smaller, effective Scrum units and introduced ownership and deputy concepts.
- Reintroduced velocity tracking and structured refinement practices lost under delivery pressure.

- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops.
- Designed and delivered a Claims Center module from concept to production rollout.
- Reduced senior developer attrition from near-total to a single departure.

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage on iOS and Android.
- Built stakeholder trust through transparent communication of technical complexity involving legacy APIs and external databases.
- Integrated CGM interface into hospital information system workflows under tight deadlines.

Bundesdruckerei 2021, 2021

Product Owner, COVID-19 Data Platform

- Owned product for RKI projects DIM and DESH: secure data structures and identity management under strict regulatory constraints.

Qcrypt AG 2016, 2018

Co-Founder and Product Owner

- Owned backup, restore/checkpoint, and data-encryption product architecture for a quantum-secure encryption product based on one-time-pad keys and true random number generator hardware.
- Delivered setup under two minutes with no technical knowledge required as the core enterprise-readiness USP.
- Served as deputy IT security officer.

§ FOUNDER & EARLY-STAGE EXPERIENCE

Smart Soil Technologies 2016, 2021

Co-Founder, CDO, CFO, Head of HR

- Full establishment of digital tooling, financial and investment planning, ERP introduction, and HR infrastructure for a deep-tech vertical farming startup across multiple founding roles.

Kvitt Payment Solutions 2013, 2018

Founder and CFO

- Built group-based P2P payments on a P2P backbone, including PSP integration, full UX/UI design, and mobile app prototype. Later acquired and operated by Sparkasse.
