

Philipp Hilbert. *Founding product manager for AI-native operational platforms.*

Positioning, ten years translating complex operational workflows into shipped software, now ready to do exactly that for an agentic AI platform from day one.

§ BEARING

Founding Product Manager with nearly ten years of experience translating complex operational workflows into scalable, shipped software. Background spans AI data platforms, public analytics infrastructure, B2B InsurTech SaaS, mobile healthcare, and quantum-secure encryption – always in environments where requirements were incomplete and delivery pressure was real. Fluent in AI-native workflows including LLM-assisted development, multi-agent orchestration, and rapid front-end prototyping. Equally comfortable running customer discovery interviews and sitting beside an engineer debugging a Kubernetes deployment. Six years of direct B2B SaaS experience; early-stage and founder-level context across multiple ventures.

§ CORE STRENGTHS

- Customer discovery and workflow pain mapping
- AI-native product execution and agentic workflow design
- End-to-end delivery ownership, user story to production rollout
- Cross-functional alignment across engineering, design, QA, and business stakeholders
- B2B SaaS backlog management and sprint discipline
- Rapid prototyping with low-code and LLM-assisted tooling
- Technical fluency across modern backend, data, and infrastructure stacks
- Founder-level pragmatism in ambiguous, fast-moving environments
- German native, English C2 – effective with both customer and investor audiences

§ PROFESSIONAL EXPERIENCE

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout via ArgoCD
- Unblocked an infrastructure-level OpenShift issue independently; delivered in one week a feature the project lead had been requesting from engineers for over a year
- Improved data quality through filtering, tagging, reproducible transformation pipelines, and audit trails with full data provenance
- Enabled ML training and evaluation on curated datasets with transparent evaluation concepts (SafeAI, ExplainableAI)
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Led a cross-functional team including architect, data scientists, backend and frontend engineers, and QA

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Delivered new features including labour shortage analytics, flexible regional comparison, and modernised admin tooling for the Arbeitsmarktmonitor platform
- Introduced Dagster for automated ETL and indicator generation, replacing fragile manual pipelines
- Migrated legacy systems to Kubernetes and managed major system upgrades without service interruption
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage
- Standardised CI/CD with full test integration at build time

Emil Group 2022

Product Manager, InsurTech SaaS Platform

- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation on a B2B platform reducing insurance time-to-market from over one year to under one week
- Designed and delivered a Claims Center module from concept to production rollout
- Re-established sprint discipline: split a bloated 17-person team into smaller, effective Scrum units and introduced ownership and deputy concepts

- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops
- Reduced senior developer attrition from near-total to a single departure

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage on a mobile-first pilot app for hospitals (iOS and Android)
- Integrated CGM interface into hospital information system workflows
- Built stakeholder trust through transparent communication of technical complexity around legacy APIs and external database constraints

§ FOUNDER & EARLY-STAGE EXPERIENCE

- **Co-Founder, CDO & Head of HR – Smart Soil Technologies (2021):** Intelligent self-regulation fertiliser and substrate solutions. Full establishment of digital tooling, financial and investment planning.
- **Product Owner – COVID-19 Data Platform, Bundesdruckerei (2021):** RKI projects DIM and DESH. Secure data structures and identity management.
- **Proxy Product Owner – AOK / ITSCare (2019–2020):** Migration of internal webshop to Shopware, including complex catalogue and API integration and configurable approval policies.
- **Project Lead – Enercon (2019):** Full IT modernisation of a specialist manufacturing site across software, infrastructure, and Office 365 rollout.
- **Product Owner – Qcrypt AG (2016–2018):** Quantum-secure encryption product based on one-time-pad keys and true random number generator hardware; also served as Deputy IT Security Officer.
- **Founder & CFO – Kvitt Payment Solutions (2013–2018):** Group-based P2P payments on a P2P backbone; PSP integration, full UX/UI design, mobile app prototype. Later acquired and operated by Sparkasse.
