

Philipp Hilbert. *AI-native Product Manager for enterprise workflow transformation.*

Positioning, ten years translating complex operational workflows into production software, now building AI-native products where the requirement is to reinvent the work itself.

§ BEARING

Hands-on Product Manager with nearly ten years of experience translating complex operational workflows into scalable, production-ready software. Background covers AI data platforms, B2B SaaS, regulated public-sector analytics, InsurTech, and founder-level company building. Fluent in AI-native working methods including LLM-assisted requirements engineering, rapid front-end prototyping, and autonomous feature delivery. Comfortable in ambiguity, precise in delivery, and effective as a cross-functional alignment point for engineering, design, data science, and business stakeholders. Ready to bring that full stack of skills to enterprise generative AI product development at CHAPTER.

§ CORE STRENGTHS

- Product discovery and Design Thinking facilitation with real users
- AI-native prototyping and requirements engineering
- Translating operational workflows into dev-ready product specs
- Cross-functional alignment across engineering, UX, data, and business
- Backlog management, sprint discipline, and velocity ownership
- KPI-oriented prioritisation and measurable iteration
- Workshop moderation, technical and non-technical audiences
- End-to-end feature delivery with GitOps and CI/CD fluency
- Founder-level pragmatism, high agency, low ego

§ PROFESSIONAL EXPERIENCE

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Built a central AI and data management platform for multimodal datasets (image, audio, tabular) within the European defence programme FCAS, from discovery through to production rollout
- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout via ArgoCD
- Improved data quality through filtering, tagging, reproducible transformation pipelines, and audit trails with full data provenance (SafeAI, ExplainableAI concepts)
- Led a cross-functional team across architect, data scientists, backend and frontend engineers, and QA with multinational stakeholders
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD; independently unblocked infrastructure-level OpenShift issues that had stalled engineering for over a year

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Drove product development on the Arbeitsmarktmonitor, an analytics platform for regional labour market and demographic data
- Delivered labour shortage analytics, flexible regional comparison tooling, and modernised admin interfaces
- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration at build time
- Migrated legacy systems to Kubernetes and managed major platform upgrades
- Served as Deputy IT Security Officer with responsibility for compliance, governance, and data lineage

Emil Group 2022, 2022

Product Manager, InsurTech SaaS Platform

- Delivered a B2B InsurTech platform reducing insurance product time-to-market from over one year to under one week, serving primary insurers, reinsurers, MGAs, brokers, and underwriters
- Designed and delivered a Claims Center module from concept through production rollout

- Re-established sprint discipline by splitting a bloated 17-person team into focused Scrum units, reintroducing velocity tracking and structured refinement
- Regained client trust in a prototype-stage environment through structured communication and weekly product discovery workshops
- Reduced senior developer attrition from near-total to a single departure through improved team clarity and ownership structures

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered a mobile-first pilot app for hospitals across iOS and Android covering digital anamnesis, meal and therapy plans, transport coordination, chat, and patient document storage
- Integrated CGM interface into hospital information system workflows under tight deadlines
- Built stakeholder trust through transparent communication of technical complexity across legacy APIs and external databases

§ FOUNDER & EARLY-STAGE EXPERIENCE

- **Qcrypt AG (2016–2018), Product Owner:** Quantum-secure encryption product built on one-time-pad keys and true random number generator hardware; USP of setup under two minutes with no technical knowledge required. Also served as deputy IT security officer.
- **Kvitt Payment Solutions (2013–2018), Founder & CFO:** Group-based P2P payment product on a P2P backbone, including PSP integration, full UX/UI design, and mobile app prototype. Later acquired and operated by Sparkasse.
- **Smart Soil Technologies (2016–2021), Co-Founder/CDO/CFO/Project Lead:** Indoor vertical farming technology startup; established digital tooling, financial planning, investor relations, and HR from the ground up.
- **Bundesdruckerei (2021), Product Owner:** COVID-19 data platform for RKI projects DIM and DESH; secure data structures and identity management.
- **AOK Health Insurance ITSCare (2019–2020), Proxy Product Owner:** Migrated internal webshop to Shopware with complex catalogue and API integration and customisable approval policies.
