§ BEARING

Hands-on Product Manager and Product Owner with nearly ten years of experience translating complex operational workflows into scalable B2B software systems. Background spans internal operations platforms, regulated environments, AI data infrastructure, and founder-level company building. Proven track record owning state-machine-heavy products – entitlement flows, transformation pipelines, insurance configuration logic – end-to-end from discovery through GitOps rollout. Fluent in the technical context of APIs, middleware, microservices, and Kubernetes-based deployments without being the one writing the code. Low ego, high agency, and comfortable in environments where requirements arrive incomplete and clarity is the PO's job to create.

§ CORE STRENGTHS

- Subscription and licence logic modelling for virtual B2B software products
- Translating operational complexity into dev-ready stories and data-model documentation
- Backlog management, sprint discipline, and velocity recovery under delivery pressure
- Cross-functional stakeholder alignment across business, engineering, QA, and compliance
- Technical fluency in APIs, microservices, Kubernetes, and ETL pipelines
- Internal platform ownership with KPI visibility and monitoring focus
- AI-native product execution: rapid prototyping, LLM-assisted spec work
- Workshop moderation and client trust rebuilding in prototype-stage environments
- Founder-level pragmatism: scoped delivery under ambiguity and incomplete requirements

§ PROFESSIONAL EXPERIENCE

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Owned end-to-end delivery of a central AI data management platform (government contract, FCAS programme): defined state model for dataset ingestion, transformation, tagging, and audit trails
- Delivered autonomous feature sets from user stories through acceptance criteria, implementation support, testing, and GitOps rollout
- Unblocked infrastructure-level issues in OpenShift independently; delivered a feature the project lead had been requesting for over a year – completed in one week
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Led cross-functional team including architect, data scientists, backend and frontend engineers, and QA; responsible for data provenance and auditability with multinational stakeholders

Tech: Kotlin (Spring Boot), Python, PostgreSQL, MongoDB, Redpanda, Kubernetes, Argo Workflows, ArgoCD, OpenShift

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Owned backlog and delivery for the Arbeitsmarktmonitor analytics platform; shipped labour shortage analytics, flexible regional comparison, and modernised admin tooling
- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration at build time
- Migrated legacy systems to Kubernetes and managed major system upgrades
- Served as Deputy IT Security Officer (IT-SV) with focus on compliance, governance, and data lineage

Tech: Python, Django, JavaScript, PostgreSQL, dbt, Dagster, DuckDB, MicroStrategy, Kubernetes, Jenkins, Bitbucket, Git

Emil Group 2022, 2022

Product Manager, InsurTech SaaS Platform

- Owned product for a B2B InsurTech platform reducing insurance product time-to-market from over one year to under one week, serving primary insurers, reinsurers, MGAs, brokers, and underwriters
- Designed and delivered a Claims Center module from concept to production rollout
- Re-established sprint discipline: split a 17-person team into scoped Scrum units, introduced ownership and deputy concepts, reintroduced velocity tracking and structured refinement
- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops; reduced senior developer attrition from near-total to a single departure

Tech: Low-code platform, Java, HTML/CSS, Kubernetes, REST APIs

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage on iOS and Android
- Built stakeholder trust through transparent communication of technical complexity including legacy APIs and external database dependencies
- Integrated CGM interface into hospital information system workflows

Tech: AngularJS, Ionic, Python, Kubernetes, CGM API integration

Bundesdruckerei 2021, 2021

Product Owner, COVID-19 Data Platform

- Owned RKI projects DIM and DESH: secure data structures and identity management under strict data governance and compliance requirements

AOK Health Insurance – ITSCare 2019, 2020

Proxy Product Owner

- Led migration of internal webshop to Shopware including complex catalogue and API integration and customisable approval policies for a healthcare procurement workflow
-

§ FOUNDER & EARLY-STAGE EXPERIENCE

Qcrypt AG 2016, 2018

Co-Founder, Product Owner

- Owned product architecture for a quantum-secure encryption product built on one-time-pad keys and true random number generator hardware; designed for setup under two minutes with no technical knowledge required
- Served concurrently as deputy IT security officer; bridged product decisions with attack-vector analysis and compliance framing
- Delivered English-language product promotion independently (video sample: [youtube.com/watch?v=nt06f71lgfE](https://www.youtube.com/watch?v=nt06f71lgfE))

Kvitt Payment Solutions 2013, 2018

Founder, CFO

- Built a group-based P2P payment product on a P2P backbone; owned PSP integration, full UX/UI design, and mobile app prototype; later acquired and operated by Sparkasse

Smart Soil Technologies 2016, 2021

Co-Founder, CDO, CFO, Head of HR

- Established digital tooling, financial and investment planning, ERP introduction, and HR infrastructure for an agri-tech startup from founding through growth stage
