§ BEARING

Product Manager with close to ten years of experience translating complex operational workflows into scalable B2B SaaS systems. Previously part of the EMIL product team; delivered platform modules spanning product configuration, underwriting, document management, and workflow automation for primary insurers, reinsurers, MGAs, and brokers. Subsequent roles deepened capability in ETL data platforms, AI system delivery, and agentic automation. Comfortable operating in ambiguity, strong on delivery discipline, and fluent in AI-native workflows from prototyping through production rollout.

§ CORE STRENGTHS

- End-to-end product ownership in B2B SaaS and InsurTech platforms
- Translating complex operational workflows into dev-ready requirements
- Agile team restructuring and sprint discipline recovery
- AI-native execution: agentic pipelines, LLM-assisted specs, rapid prototyping
- ETL and data platform product ownership
- Cross-functional stakeholder alignment across engineering, QA, clients, and leadership
- Client trust management in prototype-stage and regulated environments
- GitOps and infrastructure fluency enabling independent unblocking
- German-native communication precision across technical and business audiences

§ PROFESSIONAL EXPERIENCE

EMIL Group 2022

Product Manager, InsurTech SaaS Platform

- Designed and delivered a Claims Center module from concept to production rollout
- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation for primary insurers, reinsurers, MGAs, brokers, and underwriters
- Re-established sprint discipline and delivery stability; split a bloated 17-person team into smaller, effective Scrum units and introduced ownership and deputy concepts
- Reintroduced velocity tracking and structured refinement practices lost under delivery pressure
- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops
- Reduced senior developer attrition from near-total to a single departure

Tech: Low-code platform, Java, HTML/CSS, Kubernetes, REST APIs

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Delivered autonomous feature sets end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout
- Improved data quality via filtering, tagging, reproducible data transformation pipelines, and audit trails with full data provenance
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature that had been requested from engineers for over a year
- Led a cross-functional team including architect, data scientists, backend and frontend engineers, and QA
- Enabled ML training and evaluation on curated datasets with transparent evaluation concepts (SafeAI, ExplainableAI)

Tech: Kotlin (Spring Boot), Python, PostgreSQL, MongoDB, Redpanda, Kubernetes, Argo Workflows, ArgoCD, OpenShift

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Introduced Dagster for automated ETL and indicator generation across regional labour market data
- Delivered labour shortage analytics, flexible regional comparison tooling, and modernised admin interfaces
- Migrated legacy systems to Kubernetes and managed major system upgrades
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage
- Standardised CI/CD with full test integration at build time
- Designed interactive dashboards, community features, and structured data export tooling

Tech: Python, Django, JavaScript, PostgreSQL, dbt, Dagster, DuckDB, MicroStrategy, Kubernetes, Jenkins, Bitbucket, Git

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage across iOS and Android
- Integrated CGM interface into hospital information system workflows
- Built stakeholder trust through transparent communication of technical complexity involving legacy APIs and external databases
- Led a small team under tight deadlines with strict focus on highest-leverage features

Tech: AngularJS, Ionic, Python, Kubernetes, CGM API integration

§ FOUNDER & EARLY-STAGE EXPERIENCE

Kvitt Payment Solutions 2013, 2018

Founder and CFO

- Built group-based P2P payments on a P2P backbone; designed full UX/UI and mobile app prototype
- Integrated PSP, handled payment flow edge cases, and took the product through acquisition and operation by Sparkasse

Qcrypt AG 2016, 2018

Product Owner

- Owned backup, restore/checkpoint, and data-encryption product architecture for a quantum-secure encryption product based on one-time-pad keys and true random number generator hardware
- Served as deputy IT security officer; USP: full setup under two minutes, no technical knowledge required from end user

AOK Health Insurance – ITSCare 2019, 2020

Proxy Product Owner

- Led migration of internal webshop to Shopware including complex catalogue and API integration and customisable approval policies

Bundesdruckerei – COVID-19 Data Platform 2021

Product Owner

- Delivered secure data structures and identity management for RKI projects DIM and DESH
