§ BEARING

Hands-on Product Manager with nearly ten years of experience translating complex operational workflows into scalable software. Background spans AI data platforms in regulated government and defence environments, public analytics, B2B InsurTech SaaS, and healthcare mobile applications. Fluent in AI-native workflows including GPT, Claude, Gemini, GitHub Copilot, n8n, and rapid prototyping tools. Comfortable with cross-functional stakeholder alignment across business, engineering, data science, compliance, and executive layers. Six years of dedicated B2B SaaS PM experience with a consistent track record from MVPs to scalable production rollouts.

§ CORE STRENGTHS

- AI use-case identification, scoping, and regulated implementation
- End-to-end feature delivery: requirements to GitOps rollout
- B2B SaaS backlog management and sprint discipline
- Translating business requirements into user-centred, dev-ready specs
- Multi-agent workflow design with n8n and API orchestration
- Cross-functional alignment across business, engineering, and compliance
- Data quality, provenance, and ETL pipeline ownership
- Rapid prototyping with Low-Code, No-Code, and LLM-assisted tools
- German native and English C2, effective with multinational stakeholders

§ PROFESSIONAL EXPERIENCE

Rohde & Schwarz 2024, 2025

Product Manager, AI Data Transformation

- Owned the full product lifecycle for a central AI and data management platform within the FCAS European defence programme – research, requirements, prototyping, testing, and GitOps-based rollout
- Delivered automated data quality filtering, tagging, reproducible transformation pipelines, and audit trails with full data provenance aligned to SafeAI and ExplainableAI requirements
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature requested from engineers for over a year
- Led cross-functional team including architect, data scientists, backend and frontend engineers, and QA with multinational stakeholders

Tech: Kotlin (Spring Boot), Python, PostgreSQL, MongoDB, Redpanda, Kubernetes, Argo Workflows, ArgoCD, OpenShift

Federal Employment Agency (Bundesagentur für Arbeit) 2023, 2024

Product Manager, Public Data Analytics

- Advanced the Arbeitsmarktmonitor analytics platform for regional labour market and demographic data, serving users across German regions
- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration at build time
- Served as Deputy IT Security Officer with focus on compliance, governance, and data lineage – directly relevant to regulatory requirements named in the posting
- Migrated legacy systems to Kubernetes and managed major system upgrades
- Delivered labour shortage analytics, flexible regional comparison, and modernised admin tooling

Tech: Python, Django, JavaScript, PostgreSQL, dbt, Dagster, DuckDB, MicroStrategy, Kubernetes, Jenkins

Emil Group 2022, 2022

Product Manager, InsurTech SaaS Platform

- Delivered modules across product configuration, pricing, underwriting, policy issuance, document management, and workflow automation on a B2B SaaS platform for insurers, reinsurers, MGAs, and brokers
- Designed and delivered a Claims Center module from concept to production rollout
- Re-established sprint discipline; split a bloated 17-person team into effective Scrum units with ownership and deputy concepts, reintroducing velocity tracking and structured refinement
- Regained client trust in a prototype-stage environment through structured communication and weekly product workshops

Tech: Low-code platform, Java, HTML/CSS, Kubernetes, REST APIs

CLINET Platforms 2021, 2022

Product Owner, Mobile Healthcare App

- Delivered core flows for digital anamnesis, meal and therapy plans, transport, chat, and patient document storage on a mobile-first iOS and Android pilot app for hospitals
- Integrated CGM interface into hospital information system workflows; communicated technical complexity of legacy APIs transparently to stakeholders
- Led a small team under tight deadlines with strict focus on highest-leverage features

Tech: AngularJS, Ionic, Python, Kubernetes, CGM API integration

§ FOUNDER & EARLY-STAGE EXPERIENCE

Qcrypt AG 2016, 2018

Product Owner / Deputy IT Security Officer

- Owned product architecture for quantum-secure encryption based on one-time-pad keys and true random number generator hardware; USP: setup under two minutes, no technical knowledge required
- Served as deputy IT security officer; managed attack vector analysis and compliance framing

Kvitt Payment Solutions 2013, 2018

Founder & CFO

- Founded and built a group-based P2P payment platform; handled PSP integration, full UX/UI design, and mobile app prototype
- Later acquired and operated by Sparkasse

AOK Health Insurance / ITSCare 2019, 2020

Proxy Product Owner

- Migrated internal webshop to Shopware including complex catalogue and API integration and customisable approval policies

§ LANGUAGES

German, native. English, C2.
