

Philipp Hilbert. *Product Owner for security-critical cooperative products.*

Positioning, nearly ten years owning complex B2B software end-to-end, with direct experience in regulated environments, partner integration, and delivery under ambiguity.

§ WHY GENUA

genua sits at the intersection of serious IT security and partner-integrated product delivery – a combination that demands a Product Owner who can hold technical depth and stakeholder breadth simultaneously. The posting specifically calls for someone who integrates internal and external product components into a coherent market-facing solution, which is precisely what I did at Emil Group (InsurTech platform, multiple external API layers) and at Rohde & Schwarz (multinational FCAS defence programme, federated data pipelines). The stable core business with explicit growth ambitions signals an environment where rigorous product thinking compounds over time, rather than being consumed by survival mode. *That is exactly the environment where my strengths compound.*

§ HONEST FRAMING

I have not shipped a product under BSI certification or within a CC/Common Criteria framework, which may matter for genua's specific compliance pipeline. What I do bring is direct experience as a deputy IT security officer, ownership of a quantum-secure encryption product (Qcrypt AG), and consistent delivery in regulated, auditable environments – the underlying discipline transfers directly.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude**, requirements drafting and edge-case generation
- **GPT**, stakeholder communication drafts and research synthesis
- **GitHub Copilot**, in-repo implementation support
- **Cursor / VSCode**, autonomous feature delivery
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy wireframing
- **Gamma.app**, roadmap and stakeholder presentations
- **n8n**, workflow and agent loop automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kotlin (Spring Boot), Python, Django, JavaScript, AngularJS, PostgreSQL, MongoDB, Kubernetes, ArgoCD, Helm, Argo Workflows, OpenShift, Jenkins, Bitbucket, GitOps pipelines, Dagster, dbt, DuckDB, MicroStrategy, Redpanda, REST APIs, CGM API integration, Shopware, Ionic, Java, low-code insurance platform.

§ SIDE PROJECT

QCRYPT AG [YOUTUBE.COM/WATCH?V=NT06F71LGFE](https://www.youtube.com/watch?v=NT06F71LGFE) →

Quantum-secure encryption product based on one-time-pad keys and a true random number generator hardware module.

- Owned the full product architecture for backup, restore/checkpoint, and encryption key management.
- Built on a true-RNG hardware foundation with OTP key distribution, targeting non-technical end users.
- Setup under two minutes with no technical knowledge required – the core usability constraint shaped every design decision.
- Direct precedent for genua's partner-integrated security products: vendor coordination, deputy IT security officer role, and attack-vector thinking were all live responsibilities.

§ HOW I WOULD WORK AT GENUA

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

I shadow active partner interactions, read existing roadmap artefacts, and map the dependency graph between internal components and external partner deliverables – building a picture of where integration seams create the most risk.

WEEK 2

Sharpen the backlog.

I run a structured refinement session with development and certification stakeholders to surface implicit assumptions in the top-priority items and close the gap between partner specs and internal acceptance criteria.

WEEK 3+

Ship, report, iterate.

I own the first acceptance cycle end-to-end, report status and risk clearly to relevant stakeholders, and establish a lightweight KPI baseline so product progress becomes measurable rather than anecdotal.

I COVER LETTER

Dear genua team,

I am applying for the Product Owner role focused on cooperative products. The position maps closely onto work I have done repeatedly: taking a product that spans multiple external partners and internal teams, finding the integration seams where requirements go ambiguous, and driving it through to a coherent, shippable result.

At Rohde & Schwarz, I owned a data management platform for the FCAS defence programme – a multinational environment with strict audit requirements, multiple engineering disciplines, and a hard dependency on external data standards. I delivered features end-to-end, including user stories, acceptance criteria, implementation support, and GitOps-based rollout, while managing the cross-functional team and reporting to programme stakeholders. Separately, I served as deputy IT security officer at the Federal Employment Agency, where compliance, data

lineage, and governance were daily constraints, not afterthoughts. That combination of delivery ownership and security-conscious thinking is directly relevant to what genua builds.

The cooperative product dimension is where I feel most at home. At Emil Group, the InsurTech platform integrated products from primary insurers, reinsurers, MGAs, brokers, and underwriters into a single configurable system. My job was to translate contradictory external requirements into a coherent backlog, re-establish sprint discipline in a team that had lost it, and rebuild client trust through structured communication – weekly workshops, transparent risk reporting, and consistent delivery. Earlier, at Qcrypt AG, I was the Product Owner for a quantum-secure encryption product built on true-RNG hardware, a role that included deputy IT security responsibilities and direct partner coordination. I delivered a product positioned around simplicity (sub-two-minute setup) in a domain that tends toward complexity for its own sake.

I define and prioritise requirements using market-oriented scoring and explicit risk framing – value, usability, feasibility, and viability – rather than loudest-voice-wins. I track KPIs from the start of a product cycle, not as a retrospective exercise. And I am comfortable presenting status, risk, and trade-offs to senior stakeholders and external partners with the same clarity I use internally.

Genua's growth trajectory in the security product space, combined with the explicit mandate to manage the full product lifecycle across partner integrations, makes this a role I would take seriously from day one. I am based in Berlin, speak German natively, and am open to the Kirchheim location.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Owner and Product Manager with nearly ten years of experience in complex B2B software, regulated environments, and partner-integrated product delivery. Background spans government defence programmes, InsurTech SaaS platforms, public data analytics, and security-critical encryption products. Consistently delivers in environments where requirements are incomplete, external dependencies are real, and stakeholder alignment is non-trivial. Served as deputy IT security officer in two separate roles; co-founded and owned a quantum-secure encryption product at Qcrypt AG. Fluent in agile delivery, backlog management, KPI-driven product thinking, and cross-functional leadership.

§ CORE STRENGTHS

- End-to-end product ownership across partner-integrated systems
- Security-domain product experience: OTP encryption, deputy IT-SV, audit trails
- Backlog management, sprint discipline, and velocity recovery
- Structured requirements engineering and market-oriented prioritisation
- Cross-functional alignment: engineering, QA, compliance, certification, documentation
- External partner and supplier coordination with proactive dependency resolution
- Workshop facilitation and stakeholder trust rebuilding
- KPI definition and product success measurement
- Founder-level pragmatism, low ego, high delivery agency

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ 2024, 2025

Product Manager, AI Data Transformation

- Owned product delivery for a central AI and data management platform within the FCAS European defence programme, coordinating multinational stakeholders across engineering, data science, QA, and programme management
- Delivered features end-to-end: user stories, acceptance criteria, implementation support, testing, and GitOps-based rollout
- Introduced data provenance, audit trails, and transparent evaluation concepts (SafeAI, ExplainableAI) to meet regulated programme requirements
- Reduced deployment times from several days to 20–40 minutes by introducing GitOps with ArgoCD
- Unblocked infrastructure-level issues in OpenShift independently; delivered in one week a feature that had been requested from engineers for over a year

FEDERAL EMPLOYMENT AGENCY (BUNDESAGENTUR FÜR ARBEIT) 2023, 2024

Product Manager, Public Data Analytics

- Advanced the Arbeitsmarktmonitor analytics platform for regional labour market data, delivering labour shortage analytics, flexible regional comparison, and modernised admin tooling
- Served as Deputy IT Security Officer (IT-SV) with responsibility for compliance, governance, and data lineage

- Introduced Dagster for automated ETL and indicator generation; standardised CI/CD with full test integration
- Migrated legacy systems to Kubernetes and managed major system upgrades

EMIL GROUP 2022, 2022

Product Manager, InsurTech SaaS Platform

- Owned delivery across a B2B InsurTech platform integrating primary insurers, reinsurers, MGAs, brokers, and underwriters into a single configurable product
- Designed and delivered a Claims Center module from concept to production rollout
- Re-established sprint discipline by splitting a bloated 17-person team into structured Scrum units with clear ownership and deputy concepts
- Rebuilt client trust in a prototype-stage environment through weekly product workshops and transparent status communication
- Reduced senior developer attrition from near-total to a single departure

CLINET PLATFORMS 2021, 2022

Product Owner, Mobile Healthcare App

- Led delivery of a mobile-first pilot app for hospitals (iOS and Android) covering digital anamnesis, meal and therapy plans, transport, chat, and patient document storage
- Integrated CGM interface into hospital information system (KIS) workflows
- Built stakeholder trust through transparent communication of technical complexity including legacy APIs and external database dependencies

§ FOUNDER & EARLY-STAGE EXPERIENCE

QCRYPT AG 2016, 2018

Product Owner & Deputy IT Security Officer

- Owned product architecture for a quantum-secure encryption product based on one-time-pad keys and true random number generator hardware
- Designed the product around a sub-two-minute setup with no technical knowledge required, targeting non-technical end users in regulated environments
- Served as deputy IT security officer; responsible for attack-vector assessment and product security positioning

KVITT PAYMENT SOLUTIONS 2013, 2018

Founder & CFO

- Co-founded a group-based P2P payments product; owned PSP integration, full UX/UI design, and mobile app prototype
- Product later acquired and operated by Sparkasse

ADDITIONAL EARLIER ROLES

- Proxy Product Owner, AOK Health Insurance ITSCare (2019–2020): migration of internal webshop to Shopware, complex catalogue and API integration, customisable approval policies
- Project Lead, Enercon (2019): full IT modernisation of a specialist manufacturing site
- Co-Founder, CDO & Head of HR, Smart Soil Technologies (2021): digital tooling, financial and investment planning for vertical indoor farming startup
- Product Owner, COVID-19 Data Platform, Bundesdruckerei (2021): RKI projects DIM and DESH; secure data structures and identity management
