

Philipp Hilbert. *Product Manager, internal tools and automation.*

Positioning, ten years shipping workflow automation and data platforms for demanding internal users, now bringing that stack to CapsLock's media buying engine.

§ WHY CAPSLOCK

The Media Buyer Automation Platform is exactly the kind of product I find most interesting: small, expert users, short feedback loops, and outcomes that show up directly in spend efficiency and headcount leverage. The job description names specific mechanics, pacing logic, spend guardrails, anomaly alerts, bulk actions, which tells me the team has already done the hard work of understanding the domain and wants a PM who can own delivery rather than run discovery from scratch. The framing around "a small team managing budgets that would otherwise require significantly more headcount" is a product metric I know how to instrument and protect. *That is exactly the environment where precise, low-ego product work compounds.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
- **Cursor**, code navigation and in-context refactors
- **Lovable**, rapid UI prototyping without engineering runway
- **GitHub Copilot**, test generation and boilerplate
- **n8n**, multi-step workflow automation
- **GPT**, structured data extraction and spec drafting
- **Framer**, lightweight design and layout prototyping
- **Gamma.app**, stakeholder-facing documentation and decks

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, ArgoCD, GitOps rollout and rollback, Docker, Jenkins, CI/CD, GitLab, Azure DevOps, Dagster, dbt, PostgreSQL, MongoDB, Kafka, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, Matomo, MicroStrategy, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built and operated solo.

- Zero-to-one: anonymity-until-payment model protecting both sides until commitment is made.
 - WhatsApp and Telegram as the product surface; LLM agents across the acquisition funnel.
 - Funnel and conversion analysis in SQL; one operator running the full day-to-day.
 - Demonstrates the exact PM-who-ships profile CapsLock is looking for: real product, real users, no engineering team as a crutch.
-

§ HOW I WOULD WORK AT CAPSLOCK

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow two or three media buyers through a full working day each, map the current pacing and alerting workflows in Miro, and identify the one manual process consuming the most capacity before writing a single line of a spec.

WEEK 2

Slice and specify.

Draft specs for the two highest-leverage automation slices, including edge cases, failure modes, and rollback behaviour, and walk engineering through them to surface feasibility constraints before any estimates are committed.

WEEK 3+

Ship, instrument, iterate.

Run a staged rollout of the first automation slice against a subset of budgets, instrument the relevant spend and time metrics, and close the loop with buyers within the same sprint.

I COVER LETTER

Dear CapsLock team,

I have spent the last decade owning products where the user is a domain expert with a tight feedback loop and the outcome lands in a number you can read the same day, pipeline run counts, data update time, time-to-market for an insurance product. The Media Buyer Automation Platform is that kind of product, and the description is specific enough that I can tell the team has already mapped the problem clearly: pacing logic, spend guardrails, anomaly alerts, approval flows, bulk actions. That specificity is a good sign. It means I would be walking into a context where the hard discovery has been done and the job is to own delivery, drive adoption, and keep the roadmap honest.

At Rohde & Schwarz I inherited an AI and data platform where rollout took days and the UI that had been built with great care recorded zero production clicks. I instrumented both workflows, redirected the roadmap toward the developer-code-first path users actually used, and brought rollout time down to 30 minutes via ArgoCD GitOps. The lesson, that usage data beats opinion every time, and that a beautiful feature nobody touches is a failed feature, is directly applicable to spend-affecting automation logic where a wrong guardrail is worse than no guardrail.

At the Bundesagentur für Arbeit I owned a national labour-market analytics platform and introduced Dagster and dbt so quarterly data imports ran without hand-holding, cutting data update time by roughly 75%. The parallel to CapsLock's reporting and analytics workflows is direct: the goal in both cases is to get reliable, timely data in front of decision-makers without requiring an engineer on standby.

Beyond the core role, the posting mentions active use of AI tools with examples requested. My daily stack includes Claude Code for in-repo spec work and edge-case generation, Cursor for code navigation, Lovable for rapid UI prototyping, n8n for multi-step workflow automation, and GitHub Copilot for test generation. I also built construct8, a two-sided B2B marketplace, solo, product, automation, and funnel analysis, which is the closest thing I have to a portfolio piece for the builder orientation the role describes.

I am comfortable with the scope evolving. The framing around portfolio growth across marketing automation, reporting, creative operations, and cross-platform account management matches how I have worked before: one core platform as an anchor, adjacent products added as

capacity and trust are established. I would welcome a conversation about the current roadmap priorities and how the team makes sequencing decisions.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years of end-to-end product ownership, specialising in data-heavy internal platforms and workflow automation for expert users. At Rohde & Schwarz and the Bundesagentur für Arbeit I owned AI and data platforms across multinational teams, instrumented competing workflows to redirect roadmaps, and shipped GitOps rollouts that reduced deployment time by over 95%. I write specs engineers can build from, run staged rollouts on spend-affecting logic, and close adoption loops before declaring a feature done.

§ WHAT I CAN DO

Product Management: continuous discovery, product roadmap, prioritisation, MVP definition, A/B testing, user research and interviews, prototyping, go-to-market support, product lifecycle management.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, velocity tracking, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: KPI definition, event taxonomy, funnel and churn analysis, dashboarding, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, Cursor, Lovable, GitHub Copilot, n8n, GPT.

Agile and Scaled Delivery: Scrum, Kanban, SAgile, ART, PI planning, CI/CD, GitOps with ArgoCD, release gating, regression and end-to-end test automation.

Technical Environments: Kubernetes, Docker, OpenShift, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, SQL, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024-2025

Owned an internal AI and data Platform for the FCAS European programme. Redirected roadmap from UI-led to developer-code-first after instrumenting usage, increasing pipeline runs 200%. GitOps rollout with ArgoCD cut deployment time from days to 30 minutes. Cross-functional team of 15+ engineers and Data scientists in Scrum.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics Platform for policymakers and researchers; Deputy IT Security Officer. Introduced Dagster and dbt, saving 75% of time per Data update. Migrated bare-metal system to containers; carried full UI relaunch and ETL migration in the same period.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE B2B SAAS 2023-2023

Mobile patient app for iOS and Android. Cut roadmap to top 10% of features; user acceptance rose fivefold. Implemented CGM hospital information system interface reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022-2022

B2B SaaS Platform for insurers, reinsurers, brokers, underwriters. Restructured 18-person organisation into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut time-to-market for new Insurance products from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS 2021-2022

POS and forecourt systems in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA 2021-2021

Secure Data platform; Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B SAAS 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Clinical network wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING 2025-2026

Two-sided B2B marketplace, zero to one alone. LLM agents across the funnel; funnel and conversion analysis in SQL.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped a three-layer product installing in under two minutes. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY 2018-2021

Fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments. Built from zero and taken to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
