

Philipp Hilbert. *Technical Product Manager building in AI-native environments.*

Positioning, Senior PM and hands-on builder who turns business requirements into production software using Claude Code daily, without ceremony.

§ WHY NOOREX.IO

A fully AI-native business inside a regulated industry, backed by a corporate but run lean and fast, is a genuinely unusual setup, and the right one for where software delivery is heading. The requirement that ideas can move into production on the same day is not a workflow preference; it is a forcing function that eliminates the usual PM theatre. What draws me specifically is the dual-role framing: I can operate as Technical Project Manager writing sharp specifications, and I can operate as Technical Product Manager actually building the solution in Claude Code. Most postings ask for one or the other. *This one asks for both at once, which is exactly how I already work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo builds and refactors
- **GitHub Copilot**, inline acceleration
- **Cursor / VSCode**, agentic coding sessions
- **Lovable**, rapid front-end prototyping
- **n8n**, agentic workflow orchestration
- **Framer**, design-heavy product surfaces
- **Gamma.app**, stakeholder-ready specs and decks

- **GPT**, research, edge-case generation, prompt evaluation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, ArgoCD, Helm, Docker, GitOps rollout and rollback, Jenkins, GitLab, Azure DevOps, CI/CD pipelines, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, REST APIs, Dagster, dbt, SQL, all in production contexts, not sandboxes.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B staffing marketplace built solo, zero to one, using LLM agents across the entire funnel.

- Anonymity-until-payment model protecting both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, no native app required for MVP.
 - LLM agents handle matching, qualification and follow-up so one operator runs the day-to-day.
 - Demonstrates exactly the "idea to production, one person" capability this role requires.
-

§ HOW I WOULD WORK AT NOOREX.IO

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit with every workstream in flight, map the actual dependency graph between business requirements and what engineering is building, and identify where specifications are ambiguous before they become blockers.

WEEK 2

Sharpen and slice.

Turn the ambiguous requirements into precise, testable specifications, either handing them to engineers as unblocked work items, or opening Claude Code and building the first iteration myself.

Ship and close loops.

Own the delivery from specification through to production, surface the next round of blockers early, and keep the team moving at the speed the business demands without adding process weight.

I COVER LETTER

Dear Faisal and the Noorex.io team,

I am applying for the Technical Project Manager / Technical Product Manager role at Noorex.io. The posting describes something I have not seen stated this plainly before: a business that is genuinely AI-native, operating inside a regulated industry, where ideas can reach production the same day they are discussed. That is not a stretch goal for me, it is how I have been working for the past two years.

The non-negotiable you named is Claude Code or Codex every day. I use Claude Code daily: to write specifications, to prototype features, to run in-repo refactors, and to build production-grade tooling when the engineering team is occupied elsewhere. When I founded construct8, a two-sided B2B staffing marketplace, I built the entire product alone, matching engine, qualification flows, LLM agents across the funnel, with Claude Code as the primary instrument. That is the Product Builder profile you described in Role 2. At the same time, I have spent thirteen years writing the kind of precise, unambiguous technical specifications that senior engineers actually want to work from, coordinating cross-functional teams in regulated contexts, defence AI at Rohde & Schwarz, national analytics infrastructure at the Federal Employment Agency, healthcare and insurance platforms. That is the Technical Project Manager profile in Role 1.

In regulated environments, the challenge is always the same: moving fast without cutting corners that create compliance or audit exposure. At the Bundesagentur für Arbeit I carried a full bare-metal-to-containers migration, a UI relaunch and a large ETL migration simultaneously, while serving as Deputy IT Security Officer and keeping the data platform within its regulatory envelope. At Rohde & Schwarz I reduced rollout time from days to 30 minutes for a multinational AI and data platform by championing GitOps delivery, not by simplifying the regulatory requirements, but by engineering the delivery pipeline so compliance was built in rather than bolted on.

The self-organisation requirement is one I take seriously. I do not need a process around me to stay oriented. I maintain my own dependency maps, flag blockers before they become delays, and default to producing a working artefact rather than a slide about one. If the answer to a

business problem can be prototyped in Claude Code in two hours, I will have a prototype ready before the next conversation rather than a requirements document asking for engineering time.

I am available immediately and happy to show rather than tell in a short scoping call.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Technical Product Manager and Product Owner with 13 years of product ownership in regulated industries, defence AI, public-sector analytics, insurance, healthcare, fintech, combined with daily hands-on delivery using AI-native tooling. I write precise technical specifications, coordinate senior engineering teams without adding process overhead, and build working solutions in Claude Code when speed demands it. Available immediately for a 3-month engagement, fully remote from Berlin.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, multi-agent orchestration (n8n), prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Management: continuous discovery, product vision and roadmap, MVP definition, PoC, prioritisation, user research and interviews, A/B testing, prototyping, go-to-market support, product lifecycle management.

Product Ownership: requirements engineering, user stories, acceptance criteria, epics, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART, PI planning, SDLC.

SDLC and Delivery Practices: GitOps rollout and rollback with ArgoCD, containerised environments, CI/CD, Jenkins, branching strategy, same-day hotfix paths, regression and end-to-end test automation, release gating, defect-to-fix as a product metric.

Technical Environments Owned: Kubernetes, OpenShift, Docker, ArgoCD, Helm, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, REST APIs, Dagster, dbt, SQL, GitLab, Azure DevOps.

Stakeholder and Leadership: stakeholder management, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Governance: GDPR/DSGVO, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI / DATA PLATFORM 2024-2025

Led cross-functional team of 15+ engineers and data scientists on the FCAS European programme's internal AI and data platform; GitOps rollout reduced deployment time from days to 30 minutes; pipeline runs increased 200% by redirecting strategy based on instrumented workflow analysis.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

National labour-market analytics platform; Deputy IT Security Officer; introduced Dagster and dbt cutting data-update effort by 75%; migrated bare-metal system to containers while carrying a full UI relaunch and ETL migration in parallel.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Cut a failing five-person team's roadmap to the top 10% of features; user acceptance rose fivefold; implemented CGM interface reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to one departure; shipped Claims Center from concept to production; cut new-product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL PAYMENTS 2021-2022

Moved research results into production in a fully SAFe setup with agile release trains and PI planning; POS and forecourt systems.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY 2019

Full site IT modernisation end to end across two sites.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals in a regulated clinical network.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE
2025-PRESENT

Zero-to-one two-sided staffing marketplace built alone with Claude Code and LLM agents; anonymity-until-payment model; WhatsApp/Telegram as product surface.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software; shipped a three-layer product installing in under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH
2018-2021

Took nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile P2P group payments built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
