Dear Dreamix Hiring Team,

I am applying for the Senior Product Owner role at Dreamix. With thirteen years of product ownership across fintech, insurance, healthcare, defence, and public-sector analytics, I have spent my career doing exactly what your posting describes: taking high-level requirements from international enterprise clients and turning them into structured Epics and user stories that a delivery team can act on. I have done that inside SAFe release trains, inside three-team agile organisations I restructured myself, and inside early-stage environments where the backlog had to be cut drastically before it could be managed at all.

The domains you serve, Aviation, Transportation, Fintech, Insurance, overlap directly with my background. At EMIL Group I owned a B2B SaaS platform for insurers, reinsurers, and brokers, shipping the Claims Center from concept to production. At Kvitt Payment Solutions I built a mobile P2P payment product from zero through acquisition by Sparkasse inside the girocard ecosystem, which is about as regulated a fintech environment as exists in Germany. At Scheidt & Bachmann I worked in a full SAFe setup with agile release trains and PI planning, moving research results into production across a matrix organisation, exactly the kind of international, multi-team environment Dreamix describes. At Rohde & Schwarz I managed a cross-functional team of fifteen engineers and data scientists on a defence AI and data platform, coordinating across multinational programme stakeholders.

The Dreamix model, long-term partnership with enterprise clients rather than project-by-project transaction, suits the way I work. I invest time early in understanding the client's operating context, building the rapport that lets me advocate a product vision honestly and push back when requirements would undermine the release. I have worked with Subject Matter Experts and vendors in every role listed above, and I understand that the Product Owner's job in a delivery partner setting is to hold the line between what the client wants, what the team can build, and what the market will actually value.

I am based in Berlin, an EU citizen with no visa requirement, and available within four weeks. I would welcome a conversation about which of your active engagements I could contribute to most quickly.

Best regards, *Philipp Hilbert*
