

Philipp Hilbert. *Card Product Lead for crypto-native payments at scale.*

Positioning, Fintech and crypto-native product manager with 13 years of ownership across payments, regulated platforms, and cross-functional delivery, ready to own the Bybit Card end to end.

§ WHY BYBIT

Bybit operates at a scale, 80 million users across 200 countries, where card product decisions ripple through real infrastructure: BIN sponsors, processor hooks, real-time settlement, regional compliance. The explicit mandate to own KYC onboarding, wallet linking, VIP reward tiers, and market launches as a connected system is the kind of problem I find genuinely interesting, not just strategically important. Most card PMs optimise one layer; this role asks for someone who can hold the full stack from card network rules to user activation funnel. *That is exactly the environment where my strengths compound.*

§ HONEST FRAMING

I have not shipped a white-label card product or worked directly with a BIN sponsor in a professional capacity. What I do bring is a decade of product ownership across payments infrastructure, regulated financial platforms, and crypto operations, and the depth to learn card-scheme mechanics fast and integrate them into roadmap decisions from day one.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation

- **GitHub Copilot**, accelerated story and test scaffolding
 - **Cursor**, LLM-assisted refactoring and prototype iteration
 - **Lovable**, rapid front-end prototyping
 - **Framer**, design-heavy flow mockups
 - **GPT**, research synthesis and competitive benchmarking
 - **n8n**, agentic workflow automation and funnel tooling
 - **Gamma.app**, stakeholder decks and GTM briefs
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, Kotlin (Spring Boot), Python, PostgreSQL, MongoDB, Kafka, Kubernetes, ArgoCD, Docker, GitOps, Jenkins, CI/CD pipelines, Dagster, dbt, SQL funnel analysis, Jira, Confluence, Figma, Miro, Azure DevOps.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built from zero to one, solo.

- Matches construction firms with workers, removing the headhunter from the hiring loop entirely.
 - WhatsApp and Telegram as the primary product surface; LLM agents handle the full funnel so one operator can run day-to-day.
 - Anonymity-until-payment model protects both sides until commitment is confirmed.
 - Funnel and conversion analysis in SQL; directly transferable to card activation and churn analysis at Bybit.
-

§ HOW I WOULD WORK AT BYBIT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow card operations, read every active incident log and support ticket bucket, and map the full issuance-to-transaction flow from KYC drop-off through settlement, building the shared baseline before touching the roadmap.

WEEK 2

Instrument the funnel.

Define the five card metrics that matter most (application conversion, activation rate, transaction volume, churn, cashback redemption), confirm data availability, and flag the first gap worth closing.

WEEK 3+

Ship the first slice.

Pick the single highest-leverage improvement surfaced by the funnel data, write a tight spec with edge cases, align engineering and compliance, and drive it to production, establishing the cadence the team will run on.

I COVER LETTER

Dear Bybit Card Product team,

Bybit is building what very few companies have managed: a crypto-native payments stack that works at genuine consumer scale. The Bybit Card sits at the exact junction I find most interesting, where card network rules, real-time ledger mechanics, and crypto wallet UX have to resolve into something a user can tap at a checkout terminal without thinking twice. I want to own that problem.

My most directly relevant foundation is Kvitt Payment Solutions, a fintech P2P payments product I co-founded and took from zero to acquisition by Sparkasse inside the girocard ecosystem. That work forced me to understand payment processor integration, real-time settlement constraints, and the user-experience gap between how payments actually work and how people expect them to work. Building on top of a card network rather than around one is a new layer, and I treat it as that, a defined learning surface rather than a blocker.

Beyond payments, I bring the kind of crypto depth the role requires. I actively trade across CEX and DEX venues, including Hyperliquid, Bitget, Jupiter, and Across Protocol, and I study execution mechanics, perpetual futures, cross-chain bridging, DEX aggregation, slippage and routing, as infrastructure rather than speculation. I have spent eight years as a hands-on participant in digital asset markets, including time at the L2 layer with Polygon. That means I

can translate the crypto-native side of the Bybit Card experience, wallet linking, stablecoin settlement, reward structures denominated in digital assets, without requiring a separate translation layer between product and the crypto reality the user lives in.

On the delivery side, I have led cross-functional teams of up to 15 engineers and data scientists through complex, regulated product cycles. At Rohde & Schwarz I owned an AI and data platform for a multinational defence programme; at Bundesagentur für Arbeit I ran a national analytics platform as deputy IT security officer while carrying a full infrastructure migration and UI relaunch in the same period. Both required exactly the skills the Bybit Card role describes: translating complex operational realities into prioritised roadmaps, driving go-to-market execution across internal and external stakeholders, and keeping the user journey legible while the underlying system is anything but simple.

I am based in Berlin, hold an EU passport, and am open to relocating to Dubai or working fully remote. My notice period is four weeks.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of experience across fintech, payments, regulated platforms, defence AI, public-sector data, insurance, and healthcare. Founded a P2P payments product acquired into the Sparkasse girocard ecosystem; led cross-functional teams of up to 15 through complex, regulated delivery cycles. Eight years of hands-on crypto participation across CEX and DEX venues. Ready to own the Bybit Card product end to end, strategy, roadmap, GTM execution, and data-driven optimisation.

§ WHAT I CAN DO

Payments and fintech: P2P payment flow design, PSP integration product design, girocard ecosystem, real-time settlement, transaction UX, card management product ownership

Web3 and crypto: CEX/DEX mechanics, perpetuals, cross-chain bridging, DEX aggregation, stablecoin operations, DeFi protocols, wallet UX

Product ownership and management: continuous discovery, roadmap ownership, MVP and PoC definition, backlog refinement, user stories, acceptance criteria, A/B testing, user research, go-to-market support, product lifecycle management, Jira, Confluence, Figma

Data and analytics: funnel and churn analysis, KPI definition, ETL pipeline ownership, Dagster, dbt, PostgreSQL, SQL, Matomo, MicroStrategy

Agile and scaled delivery: Scrum, Kanban, SAFe, ART, PI planning, GitOps, CI/CD, ArgoCD, release gating, cycle time as product metric

Platform and technical fluency: Kubernetes, Docker, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka, Jenkins, Git, Azure DevOps

AI products and tooling: LLM agents, agentic workflow design, prompt engineering, evaluation loops, human-in-the-loop design, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable

Governance: GDPR, deputy IT security officer, identity management, budget ownership, ROI reasoning

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

GitOps rollout with ArgoCD cut deployment from days to 30 minutes for a FCAS multinational programme; led 15+ engineers and data scientists through Scrum; 200% pipeline-run increase by redirecting strategy from UI-led to developer-code-first after instrumenting competing workflows.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

National labour-market data platform for policymakers; introduced Dagster and dbt, saving 75% of time per data update; migrated bare-metal to containers; deputy IT security officer; full UI relaunch delivered in parallel.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut an undeliverable roadmap to the top 10% of features; user acceptance rose fivefold; shipped CGM/KIS integration reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B INSURANCE SAAS PLATFORM
2022-2023

Restructured an 18-person delivery organisation into three lean teams; reversed near-total senior engineer attrition; shipped Claims Center from concept to production; cut new-product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND
PAYMENTS POS 2021-2022

Moved research results into production across a matrix organisation in a full SAFe setup with agile release trains and PI planning; POS and forecourt payment systems.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT
DATA 2021

Data structures and identity management for the Robert Koch Institute's DIM and DESH programmes.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B
PROCUREMENT 2019-2020

Migrated a legacy procurement system to Shopware for three AOK insurers and 20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
INFRASTRUCTURE 2017-2018

Wifi rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B STAFFING
MARKETPLACE 2025-2026

Zero to one: two-sided marketplace, anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel, SQL-based conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Three-layer quantum-resistant product installing in under two minutes for enterprise buyers; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Mobile group-based P2P payments product, built from zero, acquired by Sparkasse and operated inside the girocard ecosystem.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH
2018-2021

Took a nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.
