

Philipp Hilbert. *AI Product Manager, financial intelligence and agentic systems.*

Positioning, ten years building AI-native products in regulated environments, now targeting the intersection of LLMs, data pipelines and high-stakes financial decision-making.

§ WHY UMATR

UMATR is doing something specific and hard: making AI outputs reliable enough to sit inside credit and capital decisions, where a hallucination is not a UI annoyance but a financial risk. The posting's explicit call for evaluation loops, hallucination mitigation and explainability in production tells me this team thinks about AI quality the way an engineering team thinks about uptime, as a first-class product concern. I have built that discipline across two regulated AI platforms already, including a national defence data platform where reproducibility and audit trails were non-negotiable.

The combination of agentic workflows, structured financial data and multi-model reasoning is precisely the problem space I have been moving toward for the past three years. *That is exactly the environment where the gap between a PM who understands the stack and one who doesn't compounds every sprint.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, pair-programming across feature work
- **Cursor / VSCode**, LLM-assisted development environment

- **Lovable**, rapid front-end prototyping
 - **GPT**, evaluation, summarisation and structured extraction
 - **n8n**, multi-agent and agentic workflow orchestration
 - **Dagster**, data pipeline orchestration and observability
 - **dbt**, data transformation and lineage
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, SQL, PostgreSQL, MongoDB, REST APIs, Kotlin (Spring Boot), Django, Kafka, Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Dagster, dbt, ETL pipelines, LLM agents, RAG architectures, prompt engineering, evaluation loops, Explainable AI (XAI), EU AI Act compliance, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, run end-to-end by one person using LLM agents.

- Anonymity-until-payment model protecting both sides until commitment, with WhatsApp and Telegram as the primary product surface.
 - LLM agents across the full funnel: intake, matching, qualification and follow-up, enabling solo operation at scale.
 - Funnel and conversion analysis in SQL; all discovery, prioritisation and delivery handled without a team.
 - Demonstrates the exact discipline UMATR needs: an AI-native product PM who can own data quality, model behaviour and UX simultaneously in a high-stakes transactional environment.
-

§ HOW I WOULD WORK AT UMATR

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the Data Science and Engineering teams through a live deal-evaluation or risk-assessment workflow, map every hand-off where data quality or model output becomes a user-facing decision, and document where evaluation coverage is thin.

WEEK 2

Instrument the loops.

Define the first evaluation harness for one AI output in production, agree on ground-truth labels with DS, wire a hallucination-detection pass, and get a baseline metric into a dashboard before anything new is built.

WEEK 3+

Ship and close loops.

Take the highest-leverage gap from week 1 through discovery to a scoped build, keep the eval loop live, and present the first reliability trend to stakeholders.

I COVER LETTER

Dear UMATR Hiring Team,

I am applying for the AI Product Manager role. I have spent the past four years building AI and data products in environments where the output quality is not optional, a national defence AI platform for the FCAS European programme, a public-sector labour-market analytics system used by policymakers, and a series of agentic workflow products built on LLMs and multi-agent orchestration. The common thread across all of them is the problem UMATR's posting names explicitly: making AI outputs accurate, explainable and reliable when the stakes are high.

At Rohde & Schwarz I owned an internal AI and data platform across a multinational engineering team of 15+ people. The work that moved the needle was not the UI, instrumentation of two competing developer workflows showed the beautiful interface recorded exactly zero clicks, while the code-first path drove a 200% increase in pipeline runs. That experience shaped how I think about AI product quality: instrument before you build, agree on what good looks like before you ship, and treat hallucination rates and eval coverage as product metrics alongside retention and throughput.

At the Bundesagentur für Arbeit I introduced Dagster and dbt into a quarterly ETL process for a national analytics platform, cutting the time per data update by roughly 75% and making the pipeline self-auditing. Structured data pipelines, lineage, and the ability to trace a model output

back to its source data are not engineering concerns I hand off, they are the foundation of an AI product that a regulator or a credit committee can trust.

UMATR's focus on financial analysis, risk assessment and deal evaluation is the domain where I want to apply this stack. I co-founded Kvitt Payment Solutions, a mobile P2P payment product that was acquired and operated inside the Sparkasse girocard ecosystem, which gave me early-stage fintech product experience at the infrastructure layer. Separately, I have spent years working with crypto market microstructure, execution quality and algorithmic decision frameworks, the kind of structured financial reasoning that translates directly into the data representations and evaluation logic that capital-access products require.

I am based in Berlin and actively targeting the UAE, so the Abu Dhabi location is a positive fit rather than a compromise. I am available at short notice and happy to talk through the product and technical specifics at whatever depth is useful.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with 13 years of ownership in regulated environments, specialising in AI and data platforms where output quality, explainability and pipeline reliability are first-class product concerns. At Rohde & Schwarz I led the AI and data platform for the FCAS programme; at the Bundesagentur für Arbeit I owned a national analytics platform and cut ETL cycle time by 75% by introducing Dagster and dbt. I work fluently across data, model and application layers and hold the whole delivery chain, from pipeline design through evaluation loops to user-facing AI assistants, as a single product surface.

§ WHAT I CAN DO

AI Products and Tooling: LLM (large language model) agents, agentic workflows, prompt and context engineering, evaluation loops, hallucination mitigation, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Analytics and Data: ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, SQL, Matomo, MicroStrategy, funnel and churn analysis, KPI definition.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP and PoC definition, A/B testing, user research and interviews, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, story-point estimation, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.

Technical Environments: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, Git, REST APIs, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, Azure DevOps.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, financial planning as CFO, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Led the AI and data platform for the FCAS European programme with a cross-functional team of 15+ engineers and data scientists; championed GitOps with ArgoCD, cutting rollout time from days to 30 minutes; redirected product strategy from UI-led to developer-code-first based on instrumented workflow analysis, increasing pipeline runs by 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Owned a national labour-market analytics platform; introduced Dagster and dbt, saving ~75% of time per data update; migrated bare-metal system to containers; Deputy IT Security Officer; carried full UI relaunch and large ETL (extract, transform, load) migration in parallel.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut a failing roadmap to the top 10% of features against agreed success measures; user acceptance rose more than fivefold. Integrated CGM interface into hospital KIS workflows, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to one departure. Shipped the Claims Center from concept to production; cut time-to-market for new insurance products from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND
PAYMENTS 2021-2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE DATA
PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B SAAS
2019-2020

Migrated a legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL
NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING MARKETPLACE 2025-PRESENT

Zero-to-one two-sided B2B marketplace; LLM agents across intake, matching and follow-up; SQL funnel and conversion analysis; solo operation.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped a three-layer hardware-software encryption product that installs in under two minutes; later Chair of the Board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY 2018-2021

Took a fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built a mobile group-based P2P payment product from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
