§ BEARING

Product manager with 13 years of ownership in regulated environments, specialising in AI and data platforms where output quality, explainability and pipeline reliability are first-class product concerns. At Rohde & Schwarz I led the AI and data platform for the FCAS programme; at the Bundesagentur für Arbeit I owned a national analytics platform and cut ETL cycle time by 75% by introducing Dagster and dbt. I work fluently across data, model and application layers and hold the whole delivery chain, from pipeline design through evaluation loops to user-facing AI assistants, as a single product surface.
