§ WHY HALIAN / THIS ROLE

A strategic PM role over a consumer mobile application serving millions of users in a regulated environment is a precise match for where I have spent the last decade: Bundesagentur für Arbeit (national scale, public sector, data governance), CLINET Platforms (mobile patient app, hospital compliance), and EMIL Group (regulated insurance SaaS). The posting calls out the need to balance long-term vision with empowered delivery teams already in place, that is exactly the operating model I used at Rohde & Schwarz, where I owned direction and priority while 15+ engineers ran day-to-day execution. The explicit openness to candidates from consumer technology and high-growth businesses, rather than requiring healthcare credentials, signals a team that values outcome thinking over domain pedigree. *That is exactly the environment where my strengths compound.*

§ HONEST FRAMING

The posting mentions healthcare as beneficial but not essential, and the broader regulated-environment and mobile-at-scale profile maps well to my background. There is no structural gap to name here.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built solo from zero to one.

- Matches construction firms with workers, removing the headhunter from the hire loop entirely.
- WhatsApp and Telegram as the product surface; LLM agents run intake, qualification, and follow-up so one operator manages the full funnel.
- Anonymity-until-payment model protects both sides until commitment is confirmed.
- Demonstrates end-to-end consumer-facing mobile product thinking directly relevant to a role owning a high-volume user-facing application.

§ HOW I WOULD WORK AT HALIAN / THIS COMPANY

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the delivery teams, audit the existing roadmap against stated KPIs, and map every stakeholder who currently influences product priority, without touching a single backlog item yet.

WEEK 2

Validate the roadmap.

Run structured interviews with five to eight end users and one round with senior stakeholders to identify where the current roadmap assumption set diverges from lived user need and organisational objective.

WEEK 3+

Set the cadence.

Publish a refreshed multi-quarter roadmap with clearly defined success metrics per initiative, establish a regular product review rhythm with engineering and design, and begin the first prioritised discovery sprint on the highest-value opportunity identified in weeks one and two.

I COVER LETTER

Dear Hiring Team,

I am applying for the Senior Product Manager role you have posted through Halian. The brief describes a strategic leadership position over a consumer-facing mobile application serving millions of users in a regulated environment, and that combination of scale, compliance, and consumer product thinking is where I have spent the last decade as a Product Manager.

At CLINET Platforms I owned the product roadmap for a mobile patient application piloted across hospitals, operating inside healthcare compliance constraints while keeping a five-person team moving. The roadmap was overloaded; I cut it to the top ten percent of features against agreed success measures and user acceptance rose more than fivefold. At Bundesagentur für Arbeit I managed a national-scale analytics platform for policymakers and researchers, serving as Deputy IT Security Officer and steering the product through a full infrastructure migration, a UI relaunch, and a major ETL overhaul, all in parallel, all while maintaining data governance requirements. These are not adjacent experiences; they are the same operating conditions your posting describes.

The posting explicitly asks for a leader who sets direction rather than runs delivery, and who can align diverse stakeholder groups around a shared product vision. At Rohde & Schwarz I did exactly that: I owned strategy and priority for the FCAS AI and data platform while a cross-

functional team of fifteen engineers and data scientists ran execution. I redirected the product strategy mid-cycle based on instrumented workflow analysis, the visually polished UI-led path recorded zero clicks; the developer-code-first path drove a 200 percent increase in pipeline runs. That is the kind of data-driven product decision-making the posting calls for.

I am an EU citizen currently based in Berlin and actively targeting Abu Dhabi. Relocation is not a compromise for me; the UAE is a priority location. I am prepared to be on-site from the first day of engagement.

I would welcome the opportunity to discuss the role in more detail. Please find my CV below.

Best regards, *Philipp Hilbert*
