

Philipp Hilbert. *AI Product Manager driving investment-grade AI from data layer to decision.*

Positioning, Product manager with 13 years in regulated, data-intensive environments, now building production AI systems end-to-end across data pipelines, model layers, and user-facing workflows.

§ WHY LIQUIDITY

Liquidity sits at an intersection I find genuinely rare: a firm where proprietary decision science is not a wrapper around a public model but the actual competitive moat, applied to private credit where data is sparse, structured, and consequence-bearing. The posting's focus on origination, diligence, and monitoring as distinct AI workflow surfaces, rather than a monolithic "AI assistant", reflects how the problem actually works, and that specificity signals an engineering culture I can work in productively. The combination of multi-agent system design with financial data mapping and risk scoring engines is exactly the stack I have been building toward across my last two roles. *That is exactly the environment where precision and speed stop being trade-offs.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo implementation and spec generation
- **GitHub Copilot**, paired development across the stack
- **Cursor / VSCode**, iterative refactoring and context-aware editing
- **Lovable**, rapid front-end prototyping for internal tools
- **n8n**, agentic workflow orchestration and automation

- **GPT**, evaluation, hallucination testing, and prompt benchmarking
 - **Dagster**, data pipeline orchestration and observability
 - **dbt**, transformation layer and data model management
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, SQL, PostgreSQL, MongoDB, REST APIs, Kotlin (Spring Boot), Django, Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Dagster, dbt, ETL pipeline design, Git, GitLab, Azure DevOps, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B construction staffing marketplace, built zero-to-one with LLM agents across the funnel.

- Anonymity-until-payment model protecting both employer and worker until commitment is confirmed.
 - WhatsApp and Telegram as the product surface, keeping acquisition friction near zero for a non-SaaS audience.
 - LLM agents handle funnel qualification, matching logic, and day-to-day operations so a single operator runs the platform.
 - Funnel and conversion analysis in SQL, directly transferable to the deal origination and monitoring workflows Liquidity is building.
-

§ HOW I WOULD WORK AT LIQUIDITY

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the origination, diligence, and monitoring workflows end-to-end, map the current data inputs and model touchpoints in each, and identify where hallucination risk or data-quality gaps are currently absorbed by human review.

WEEK 2

Instrument, slice, validate.

Define evaluation metrics for the existing AI outputs, accuracy, explainability, latency, instrument at least one workflow, and run a structured prompt benchmarking pass against the live model layer.

WEEK 3+

Ship, close loops.

Deliver a first scoped improvement, a tighter RAG retrieval boundary, a structured financial data mapping schema, or an agent-based diligence sub-workflow, and establish a review cadence with Data Science and Engineering to keep quality accountable in production.

I COVER LETTER

Dear Hiring Team at LIQUIDITY,

Private credit is one of the few domains where a wrong AI output does not produce a bad UX: it produces a bad investment decision. That consequence-bearing quality is what drew me to your posting. I have spent the last two years building and owning production AI systems, for the FCAS European defence programme and for Germany's Federal Employment Agency, and in both cases the hardest problem was not prompting or model selection. It was ensuring that the outputs were accurate, auditable, and trusted by the analysts who depended on them. That is the same problem your AI Product Manager role is asking someone to solve.

At Rohde & Schwarz I led the internal AI and data platform for FCAS, managing 15+ engineers and data scientists through a full GitOps delivery cycle. The platform covered data ingestion, model layers, and developer-facing tooling. I introduced ArgoCD-based rollouts that cut deployment time from days to 30 minutes and made the platform hotfix-capable, which matters when the users are defence programme leads who cannot wait for a scheduled release window. I also instrumented competing product approaches empirically: when a UI-first workflow recorded exactly zero clicks against a developer-code-first alternative, the data settled the strategy debate in one sprint.

At the Federal Employment Agency I owned a national labour-market analytics platform for policymakers and researchers, served as Deputy IT Security Officer, and rebuilt the ETL layer with Dagster and dbt, cutting the time per quarterly data update by 75%. The platform ingested heterogeneous structured and unstructured data sources under GDPR constraints, which forced me to think carefully about data provenance, transformation auditability, and explainability: concepts that translate directly to the financial data mapping and risk scoring systems your posting describes.

Beyond employment, I have built a two-sided B2B marketplace from zero using LLM agents for funnel qualification and matching, and I actively trade across Hyperliquid, Bitget, and DEX venues, working with liquidation heatmaps and market microstructure analytics. This gives me a practitioner's understanding of financial data, not as rows in a schema, but as signals with timing, latency, and adversarial noise properties that matter when you are building AI systems that inform capital allocation decisions.

The intersection of multi-agent workflow design, structured financial data, and production-grade AI quality is where I have been concentrating my work. Liquidity is building something at that intersection at a scale and pace I find compelling. I would welcome the opportunity to discuss how my background fits the specific workflows you are prioritising.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior AI Product Manager with 13 years of product ownership in regulated, data-intensive environments, defence AI, public-sector analytics, insurance, fintech, and healthcare. Specialised in translating complex operational problems into production-grade AI systems across data pipelines, model layers, and user-facing applications, with hands-on delivery of ETL platforms, LLM agent workflows, and cross-functional engineering teams in Scrum.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, multi-agent orchestration, prompt and context engineering, RAG, evaluation loops, hallucination mitigation, human-in-the-loop design, Explainable AI (XAI), EU AI Act, AI governance; Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Analytics and Data: ETL (extract, transform, load), Dagster, dbt, SQL, PostgreSQL, funnel and churn analysis, KPI definition, MicroStrategy, Matomo, structured and unstructured data systems.

Technical Environments Owned: Python, Kotlin, Django, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, MongoDB.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision, roadmap, prioritisation, MVP definition, machine learning evaluation metrics, A/B testing, user research, prototyping, product lifecycle management.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning, stakeholder management, C-level reporting.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Led FCAS internal AI and data platform; 15+ engineers and data scientists in Scrum. GitOps rollout with ArgoCD cut deployment from days to 30 minutes; data-first workflow analysis drove a 200% increase in pipeline runs.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Owned national labour-market analytics platform; Deputy IT Security Officer. Rebuilt ETL layer with Dagster and dbt, saving 75% of time per data update; full containerisation, Jenkins test automation, UI relaunch.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut roadmap to top 10% of features by success measure; user acceptance rose fivefold. Delivered CGM/KIS integration reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022-2023

Restructured 18-person delivery org into three lean teams; near-total engineer attrition reversed to one departure. Shipped Claims Center zero-to-production; cut insurance product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS AND POS 2021-2022

Research-to-production delivery in a full SAFe programme; agile release trains and PI planning across a matrix organisation.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT
DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B
PLATFORM 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY SITE IT 2019

End-to-end full-site IT modernisation.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B CONSTRUCTION
STAFFING MARKETPLACE 2025-PRESENT

Zero-to-one two-sided marketplace with LLM agents across the funnel; SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Three-layer hardware-software product with sub-two-minute install for enterprise; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY AND AGRICULTURE 2018-2021

Laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
