

Philipp Hilbert. *Senior Product Manager, BNPL Merchants.*

Positioning, ten-plus years shipping merchant and consumer products in fintech, payments and regulated B2B2C platforms, the exact intersection this role sits at.

Dear Hiring Team,

I am writing to apply for the Senior Product Manager, BNPL Merchants role. My background spans over thirteen years of product ownership across fintech, payments, regulated B2B platforms and public-sector analytics, and the specific problem this role is asking someone to solve, making it easier for merchants to activate, integrate and grow with a BNPL proposition while keeping the consumer checkout experience front of mind, is a problem I find genuinely compelling and am well-positioned to take on.

My most directly relevant experience comes from two directions. As founder and product owner of Kvitt Payment Solutions, I built a mobile group-based P2P payments product from zero through to acquisition, operating inside the girocard ecosystem at Sparkasse. That experience gave me a ground-level understanding of how payment flows, consumer trust and merchant or partner incentives interact, and how quickly an integration decision in one layer creates friction or opportunity in another. More recently, at EMIL Group I owned a B2B SaaS insurance platform serving insurers, reinsurers, brokers and underwriters: a genuinely B2B2C structure where the platform customer and the end user are distinct people with distinct needs. I restructured an eighteen-person delivery organisation into three focused squads, shipped the Claims Center from concept to production, and reduced time-to-market for new insurance products from months to under a week. The mechanics, stakeholder triangulation across commercial, technical and success functions, funnel analysis, cross-functional squad ownership, transfer directly.

On the analytical side: at the Federal Employment Agency I used Dagster, dbt and PostgreSQL to drive a data platform that eliminated roughly 75% of manual effort per data update cycle. At Rohde & Schwarz I instrumented competing product workflows with real usage data and used the findings to redirect the entire product strategy, the result was a 200% increase in pipeline runs. I mention these not as infrastructure credentials but as evidence that I reach for data before I reach for opinion, and that I know how to translate funnel and cohort findings into prioritisation decisions the squad can act on.

The B2B2C nature of the BNPL merchant product is something I take seriously rather than treat as a footnote. Every decision in the merchant activation or integration flow has a downstream effect on the consumer checkout experience, and the product manager who loses sight of that creates invisible problems that show up later as churn or conversion drop. My experience building on both sides of two-sided markets, at Kvitt on the consumer payment side, at EMIL and CLINET on the business platform side, means I hold both perspectives simultaneously rather than defaulting to whichever is louder in the room.

I am actively targeting roles in the UAE and am ready to relocate to Dubai without delay. I am available at four weeks' notice and require no visa sponsorship within the EU; for the UAE I am prepared to handle relocation independently.

I would be glad to discuss the role in more detail at your convenience.

Best regards, *Philipp Hilbert*
