SENIOR PRODUCT MANAGER
(FINANCIAL SERVICES & AI-ENABLED
PRODUCTS) (M/F/D)

Philipp Hilbert. *Senior Product Manager, Financial Services & AI-Enabled Products.*

Positioning, Financial Services product leader with 13 years in regulated industries, payments, insurance, public-sector, who applies AI practically to accelerate delivery and business value.

BERLIN, GERMANY · [HILBERT@TRUE-NORTH.BERLIN](mailto:hilbert@true-north.berlin) · [TRUE-NORTH.BERLIN](https://true-north.berlin)

§ WHY HALIAN / CLIENT

Enterprise-grade banking software operating in highly regulated environments is where product management gets genuinely hard: the margin for ambiguity in requirements is near zero, regulators are stakeholders, and every architectural decision has compliance consequences. The posting is specific about what "AI-enabled" means here, intelligent automation, decision support, agentic AI workflows, which maps directly to how I have been working, rather than being a label for a chatbot wrapper. The mention of payments, settlement systems, and transaction processing infrastructure as the core product surface is the part of the domain I find most structurally interesting, because the operational and regulatory constraints are what make the design space both constrained and rich. *That combination of financial infrastructure depth and practical AI application is exactly the environment where my strengths compound.*

§ HONEST FRAMING

I have not shipped a core banking system or a central bank settlement platform as product owner. My payments background is at the consumer and PSP layer, Kvitt Payment Solutions, built to acquisition inside the girocard ecosystem, and payments integration at Scheidt & Bachmann, rather than at the wholesale infrastructure layer. The transferable mechanic is strong: I have owned end-to-end product lifecycles in heavily regulated environments where

transaction integrity, audit trails, and regulatory sign-off are non-negotiable, and I move quickly from domain unfamiliarity to credible ownership.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case coverage
 - **GitHub Copilot**, accelerated implementation across Python and Kotlin codebases
 - **Cursor**, context-aware refactoring in large monorepos
 - **Lovable**, rapid front-end prototyping before engineering commitment
 - **n8n**, agentic workflow orchestration and process automation
 - **GPT**, stakeholder-facing document drafting and structured analysis
 - **Gamma.app**, executive and client presentation from structured outlines
 - **Framer**, interactive product demos and investor-facing prototypes
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, CI/CD, Jenkins, GitLab, Azure DevOps, Python, Kotlin (Spring Boot), Django, REST APIs, PostgreSQL, MongoDB, Kafka, Dagster, dbt, SQL, Jira, Confluence, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace for construction staffing, built zero-to-one solo.

- Anonymity-until-payment model protecting both sides of the hire until commitment is exchanged.
- WhatsApp and Telegram as the primary product surface, keeping acquisition cost near zero.
- LLM agents across the full funnel so one operator runs daily matching, qualification, and follow-up.
- Demonstrates the agentic AI workflow design the posting calls out as a desired capability, applied to a real transactional marketplace.

§ HOW I WOULD WORK AT HALIAN / CLIENT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the existing product team through a full sprint cycle, standups, backlog refinement, stakeholder syncs, and map the current payment or settlement product's decision rights, regulatory obligations, and open ambiguities before forming any views.

WEEK 2

Verify, prioritise, propose.

Take the gap map into structured conversations with engineering leads and compliance stakeholders to validate which items are genuinely blocking and which are noise, then draft a first-pass prioritisation rationale for review.

WEEK 3+

Own, deliver, expand.

Take full ownership of the assigned product area, run the next discovery sprint independently, and identify one AI-enabled efficiency or automation opportunity within the financial product workflows that can be scoped and validated within the quarter.

I COVER LETTER

Dear Hiring Team,

The role you have posted, Senior Product Manager for Financial Services and AI-Enabled Products, is the intersection I have been working toward. My thirteen years of product ownership span regulated environments that are structurally similar to enterprise banking software: public-sector analytics at the Federal Employment Agency, B2B insurance platforms at EMIL Group, a fintech payments product at Kvitt Payment Solutions taken from zero to acquisition inside the girocard ecosystem, and most recently a defence AI and data platform for the FCAS European programme. In each case, the hard part was not the backlog, it was translating regulatory obligations and operational constraints into scalable product decisions that engineering could actually deliver and that auditors and clients could actually accept.

The payments and financial infrastructure dimension of this role is one I can engage at a product-architecture level. At Kvitt Payment Solutions I owned the full P2P payment flow

design, the PSP integration, and the edge-case handling that regulators and Sparkasse required before acquisition. At Scheidt & Bachmann I managed POS and forecourt payment integration in a SAFe organisation. I understand payment flows, transaction lifecycles, reconciliation, and the operational controls that sit around them, and I am honest that wholesale settlement infrastructure is territory I would be learning in this role rather than arriving with.

On the AI capability the posting names specifically: I apply AI practically rather than decoratively. At Rohde & Schwarz I redirected an entire platform strategy based on instrumented workflow analysis, the UI-led design recorded zero clicks, the developer-code-first path drove a 200% increase in pipeline runs. I use agentic workflows in n8n, write and review prompts and evaluation loops, and have shipped production systems where LLM agents run day-to-day operations autonomously. I know the difference between a useful copilot and an automation risk, and I am able to make that case credibly to compliance and executive stakeholders.

Stakeholder breadth is the other thing I want to address directly. The posting lists executive leadership, clients, engineering, compliance, and regulators as distinct audiences that need different things from the same product manager. I have navigated that simultaneously: at the Federal Employment Agency I was Deputy IT Security Officer while running an ETL migration and a full UI relaunch; at EMIL Group I restructured an 18-person delivery organisation to stop senior engineer attrition while simultaneously shipping the Claims Center from concept to production. The ability to hold the technical, regulatory, and business threads at the same time is where I am strongest.

Abu Dhabi and the UAE market are a genuine target for me, not a compromise. I am actively pursuing roles in the Gulf and am prepared to relocate on the standard notice period. I look forward to the opportunity to discuss how my background maps to the specific product area you are looking to staff.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with 13 years of product ownership in regulated industries, FinTech, Insurance, public-sector analytics, defence AI, and healthcare. I own product lifecycles end-to-end: discovery through scale, regulatory alignment, cross-functional delivery, and measurable outcomes. I combine financial services domain knowledge with practical AI capability and the technical credibility to work directly with engineering at the architecture level.

§ WHAT I CAN DO

Payments & Financial Infrastructure: P2P payment flow design, PSP integration, transaction lifecycle, POS and forecourt payment integration, girocard ecosystem, reconciliation controls, regulatory platform product ownership.

Product Management: continuous discovery, product vision, product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, release planning, UAT, Jira, Confluence, Figma, Miro.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable.

Agile and Scaled Delivery: Scrum, Kanban, SAgile, ART, PI planning, GitOps rollout with ArgoCD, CI/CD, regression and end-to-end test automation.

Analytics and Data: ETL, Dagster, dbt, PostgreSQL, KPI definition, funnel and churn analysis, MicroStrategy, Matomo.

Regulated Environments: GDPR, Deputy IT Security Officer, identity management, audit trails, compliance stakeholder management.

Stakeholder and Leadership: cross-functional team leadership (up to 15+), C-level reporting, workshop facilitation, conflict resolution, change management, mentor junior product professionals.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Owned internal AI and data platform for the FCAS European programme; led 15+ engineers and data scientists. GitOps with ArgoCD cut rollout from days to 30 minutes; developer-code-first pivot increased pipeline runs 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS PLATFORM 2023-2024

National labour-market analytics platform; Deputy IT Security Officer. Introduced Dagster and dbt, saving 75% of time per data update; carried full ETL migration and UI relaunch simultaneously.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut roadmap to top 10% of features: user acceptance rose fivefold. Delivered CGM/KIS integration reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B INSURANCE SAAS PLATFORM 2022

Restructured 18-person delivery org into three lean teams; reduced attrition from near-total exodus to one departure. Shipped Claims Center from concept to production; cut insurance product launch from months to under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS & POS 2021-2022

Moved research results into production in a full SAFe setup with agile release trains and PI planning; POS and forecourt payment systems integration.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B WEBSHOP 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-PRESENT

Zero-to-one two-sided B2B platform; LLM agents across the full funnel so one operator runs daily operations.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Shipped a three-layer IT security product installing in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group-based P2P payments from zero; acquired and operated by Sparkasse inside the girocard ecosystem.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY & AGRICULTURE 2018-2021

Took a fertiliser data product from laboratory to investor rounds; owned financial planning and investor reporting.
