

Philipp Hilbert. *WealthTech Product Lead building B2B wealth platforms from zero.*

Positioning, 13 years owning regulated B2B SaaS products across fintech, defence AI and insurance, now targeting wealth-platform inception.

§ WHY ALPHEYA

Alpheya is doing the rarest thing in fintech: building a modern, greenfield wealth platform from scratch for a market, the Middle East, where affluent and HNW penetration through digital channels is still nascent. The constraint of going live with a first banking client within 12 months while simultaneously defining DPM, robo-advisory and multi-asset trading products is exactly the kind of pressure-cooker inception environment I have sought out repeatedly. The 0-to-1 product challenge, backed by BNY Mellon and Lunate institutional credibility, means the decisions made in the next 12 months will be load-bearing for years. *That is the type of product work where early calls compound, and where I am sharpest.*

§ HONEST FRAMING

The posting lists DPM and robo-advisory as required domain knowledge; my direct wealth-management delivery experience is in adjacent fintech infrastructure, P2P payments (Kvitt, acquired into the girocard ecosystem) and B2B insurance SaaS, rather than in a portfolio management system. What transfers directly: I have shipped financial transaction flows, ledger-adjacent data integrity requirements, and regulatory-grade audit trails in fintech and public-sector contexts, and I have the technical depth to navigate solution design trade-offs with engineering from day one.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
 - **Cursor**, code-assisted product prototyping
 - **GitHub Copilot**, day-to-day engineering pairing
 - **Lovable**, rapid front-end prototyping without a designer
 - **GPT**, research synthesis and structured drafting
 - **n8n**, agentic workflow orchestration
 - **Gamma.app**, executive and client-facing decks
 - **Framer**, design-heavy interactive prototypes
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins, CI/CD pipelines, REST APIs, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipelines, Azure DevOps, GitLab, Git, all in production contexts across regulated industries.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Zero-to-one B2B marketplace matching construction firms with workers, running on LLM agents.

- Two-sided matching platform with an anonymity-until-payment model protecting both parties until commitment is confirmed.
- WhatsApp and Telegram as the product surface; LLM agents handle qualification and funnel steps so one person operates the day-to-day.
- Funnel and conversion analysis in SQL; architecture designed for a single operator to scale without headcount.
- Direct proof of 0-to-1 product delivery under resource constraints, the Alpheya first-client launch timeline in miniature.

§ HOW I WOULD WORK AT ALPHEYA

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the engineering and design leads to map what is already decided (data model, API contracts, channel architecture) against what the first banking client has committed to, and surface the three decisions that will block sprint one if left open.

WEEK 2

Anchor the roadmap.

Translate the gaps identified in week one into a prioritised, hypothesis-tagged backlog: DPM flow first, robo-advisory second, trading and ledger instrumented from the start so telemetry is baked in, not bolted on.

WEEK 3+

Ship and close loops.

Own the first feature to production, define the non-functional requirements for the trading and portfolio modules, and establish the API documentation review cadence with engineering so no consuming team builds against an unstable contract.

I COVER LETTER

Dear Hiring Team at Alpheyra,

Wealth technology platforms are among the most demanding B2B SaaS products to build: the domain combines real-time transaction integrity, regulatory compliance, and user journeys that must work for both sophisticated institutional operators and the end affluent investor. The fact that Alpheyra is building this from scratch, with a 12-month runway to a live banking client, and with BNY Mellon and Lunate as institutional anchors, is what drew me to this role specifically rather than to the broader WealthTech market.

My background is 13 years of product ownership across regulated B2B and B2B2C environments, fintech, defence AI, public-sector analytics, insurance SaaS, and healthcare. At Kvitt Payment Solutions I built a mobile P2P payments product from zero and took it to acquisition by Sparkasse inside the girocard ecosystem, which taught me how financial transaction flows, ledger integrity, and regulatory-grade audit requirements translate from a

whiteboard into shipped software. At EMIL Group I inherited a burning 18-person delivery organisation, restructured it into three focused teams, and shipped the Claims Center, a product with no predecessor, while simultaneously rebuilding client trust. That pattern, entering an early-stage, high-stakes product environment and establishing execution discipline quickly, is what Alpheya's first-client timeline demands.

On the technical side, I work directly with engineering to define API contracts before the first consuming team builds against them, specify non-functional requirements across performance, reliability and data integrity, and instrument telemetry as part of the brief rather than as an afterthought. At Rohde & Schwarz I introduced GitOps delivery with ArgoCD that cut rollout time from days to 30 minutes on a multinational AI platform. At the Bundesagentur für Arbeit I introduced Dagster and dbt to a bare-metal ETL environment, reducing quarterly data-update time by 75%. These are the kinds of structural decisions that make or break a platform's ability to evolve quickly, exactly what a WealthTech product in its first year needs to get right.

I use AI tooling as a standard part of how I work, not as a talking point: Claude Code for in-repo specification and edge-case generation, Cursor and GitHub Copilot for engineering pairing, Lovable for front-end prototyping, and n8n for agentic workflow design. This is documented practice, not a slide claim. The posting's requirement for active, demonstrated use of AI coding and product tools describes how I already operate daily.

I am genuinely excited about the Abu Dhabi location and the Gulf market context. The opportunity to own the product roadmap spanning multi-asset trading, DPM, and omnichannel journeys for a platform that will define how HNW and UHNW investors are served through regional banks is not a role that comes around often. I would welcome the chance to discuss how my background maps to Alpheya's first-year priorities.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of delivery in regulated B2B SaaS, fintech, defence AI and insurance. I take a business problem and turn it into a complete, technically grounded specification that engineering can build: scope, success criteria, non-functional requirements and API contracts before the first line of code is written. I have founded and scaled fintech products (Kvitt, acquired into the girocard ecosystem), restructured failing delivery organisations, and shipped platform products under hard client deadlines. Comfortable owning roadmap, backlog and cross-functional alignment simultaneously from inception.

§ WHAT I CAN DO

Fintech and Payments Product: P2P payments, ledger flows, PSP integration, girocard ecosystem, financial transaction UX, regulatory-grade audit trails

B2B SaaS Platform Product Management: roadmap ownership, continuous discovery, MVP definition, prioritisation, go-to-market support, SaaS metrics, ARR reasoning

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity, UAT, Jira, Confluence

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe, ART, PI planning, GitOps, CI/CD, ArgoCD, containerised environments

Data and Analytics: ETL, Dagster, dbt, PostgreSQL, funnel and churn analysis, KPI definition, MicroStrategy, Matomo

Technical Environments: Kubernetes, OpenShift, Docker, Jenkins, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, Azure DevOps

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI 2024-2025

GitOps delivery with ArgoCD cut rollout time from days to 30 minutes; redirected strategy from UI-led to developer-code-first, increasing pipeline runs by 200%; led 15+ engineers and data scientists through Scrum for the FCAS AI and data platform.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt, saving 75% of time per data update; containerised a bare-metal system; carried a full UI relaunch and large ETL migration simultaneously. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Cut a five-person team's backlog to top-10% features: user acceptance rose fivefold. Implemented CGM interface into hospital KIS workflows, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE 2022

Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to one departure. Shipped the Claims Center from concept to production; cut time-to-market for new insurance products from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS 2021-2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning. POS and forecourt systems.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA 2021

Data structures and identity management for the Robert Koch Institute DIM and DESH programmes.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

Migrated a legacy procurement system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE 2025-PRESENT

Zero-to-one construction staffing marketplace: anonymity-until-payment model, WhatsApp/Telegram product surface, LLM agents across the funnel, SQL-based conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software; shipped a three-layer install in under two minutes to satisfy enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY 2018-2021

Took a fertiliser product from lab to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments built from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.
