

Philipp Hilbert. *WealthTech Product Lead, B2B Wealth Platform.*

Positioning, Product manager with 13 years in regulated fintech, B2B SaaS, and AI-native delivery, ready to own Alpheya's wealth platform from trading to portfolio to ledger.

§ WHY ALPHEYA

Alpheya sits at an intersection I find genuinely rare: BNY Mellon's institutional depth behind a greenfield platform targeting the Gulf's affluent and UHNW segments, with DPM, robo-advisory, and omnichannel journeys all in scope simultaneously. The explicit call for "technically grounded specifications that engineering can build", defining what is out of scope and what decisions need to be made before a line of code is written, describes exactly how I work. Most wealth platforms in the region are either white-labelled commodities or bespoke builds that never escape maintenance debt; the chance to set the product architecture before that debt accumulates is the kind of zero-to-one constraint I find motivating. *That is precisely the environment where deliberate early decisions compound into durable product leverage.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **Cursor / VSCode**, assisted feature prototyping
- **GitHub Copilot**, accelerated backlog and story drafting
- **Lovable**, rapid front-end prototype iteration
- **Framer**, design-heavy workflow mockups
- **GPT**, research synthesis and competitor analysis
- **n8n**, agentic workflow automation

- **Gamma.app**, stakeholder presentation drafts
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

REST APIs, FIX protocol awareness, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Kubernetes, Docker, ArgoCD, GitOps, CI/CD via Jenkins and GitLab, Dagster, dbt, ETL pipeline design, Jira, Confluence, Figma, Miro, Azure DevOps.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

A two-sided B2B marketplace that takes the headhunter out of construction hiring.

- Anonymity-until-payment model that protects both sides until commitment is established.
 - WhatsApp and Telegram as the primary product surface, keeping acquisition cost near zero.
 - LLM agents across the funnel so a single operator runs the day-to-day; funnel and conversion analysis in SQL.
 - Directly relevant to Alpheya: proves zero-to-one product ownership and AI-native execution without an engineering team behind me.
-

§ HOW I WOULD WORK AT ALPHEYA

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow every live workflow, trading desk, portfolio operations, the B2B onboarding journey, and produce a gap map against the posted roadmap priorities: DPM, robo-advisory, and omnichannel.

WEEK 2

Slice and specify.

Pick the highest-friction gap, draft a complete specification with API contracts, non-functional requirements, and telemetry instrumentation, and walk engineering through it before a single story is pointed.

WEEK 3+

Ship and close loops.

Drive the first hypothesis-driven cycle to production, instrument user funnel and system performance metrics from day one, and run the retrospective that sets the cadence for everything that follows.

I COVER LETTER

Dear Alpheya team,

I am applying for the WealthTech Product Lead position. Alpheya's premise, a greenfield B2B wealth platform backed by BNY Mellon and Lunate, targeting the Gulf's affluent and UHNW segments with DPM, robo-advisory, and omnichannel journeys, is one of the more compelling product briefs I have read this year. The combination of institutional credibility, meaningful capital, and a genuinely underserved regional market is rare; so is a posting that explicitly asks for someone who defines API documentation before the first consuming team builds against it.

That last requirement is where I want to spend a moment, because it describes something I consider non-negotiable rather than a differentiator. At Rohde & Schwarz I owned an internal AI and data platform for the FCAS European programme. The platform's early lifecycle was slowed by teams building against undocumented interfaces; I established a contract-first approach, REST API schemas reviewed and signed off before any downstream team started a sprint, and that single change cut integration rework by more than half. The same instinct drove my Claims Center delivery at EMIL Group: no line of code was written before we had agreed on what success looked like, what was explicitly out of scope, and which decisions had already been made. These are not process preferences; they are the mechanics that make a platform product defensible at scale.

On the wealth domain itself: I have shipped in fintech since founding Kvitt Payment Solutions in 2013, a mobile P2P group payment product that was acquired and operated by Sparkasse inside the girocard ecosystem. I understand payment ledger mechanics, the operational reality of regulated transaction flows, and the trust dynamics of a B2B2C model where the bank's risk appetite governs what the end investor can see or do. I have not shipped a full DPM engine or robo-advisory product, and I say that clearly rather than dress it up. What I bring is the ability to read a domain quickly, the technical depth to hold an honest conversation with quant and engineering teams, and a track record of taking complex regulated products from concept to production under time pressure, the Claims Center at EMIL went from concept to live in one quarter with no precedent in the organisation.

The AI-native requirement is one I meet in practice, not as a talking point. I use Claude Code and Cursor daily for specification work, edge-case generation, and rapid prototyping. I have

designed and shipped agentic workflows using n8n, and I built construct8, a two-sided B2B marketplace, largely alone using LLM agents across the entire funnel. For a platform like Alpheya's, where the product surface spans web, mobile, and API integrations for bank clients, AI tooling shortens the spec-to-validation loop considerably; I treat that as a competitive obligation, not an optional upgrade.

I am an EU citizen, based in Berlin, and actively targeting the UAE, Abu Dhabi is a positive fit, not a location compromise. I can be on-site in the Gulf and am ready to relocate. I would welcome a conversation about the roadmap, the current team setup, and where the most acute friction sits today.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of ownership in regulated B2B SaaS, fintech, and AI-driven platform environments. I turn business problems into technically grounded specifications, own the roadmap end-to-end, and lead cross-functional teams through agile delivery at pace. My background spans payment ledger products, B2B insurance SaaS platforms, national data infrastructure, and defence AI, each demanding contract-first API thinking, non-functional rigor, and outcome measurement from day one.

§ WHAT I CAN DO

Platform and B2B SaaS Product Management: roadmap ownership, MVP definition, hypothesis-driven discovery, prioritisation, go-to-market support, SaaS metrics (ARR, churn, funnel), B2B and B2B2C integration design, omnichannel product design.

Fintech and Payments Domain: P2P payment product design, PSP and girocard ecosystem integration, ledger mechanics, regulated transaction flows, payment UX edge-case handling.

AI-Native Product Execution: LLM agents, agentic workflow design (n8n), prompt engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Technical Ownership: REST API contract definition, non-functional requirements (performance, reliability, security, data integrity), telemetry instrumentation, ETL pipeline

design, Dagster, dbt, Kubernetes, ArgoCD, GitOps, CI/CD, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Agile Delivery: Scrum, Kanban, SAFe, backlog refinement, sprint planning, velocity tracking, PI planning, release gating.

Product Ownership Craft: requirements engineering, user stories, acceptance criteria, definition of done, epics, UAT, Jira, Confluence, Figma, Miro.

Stakeholder and Leadership: C-level reporting, cross-functional alignment across engineering, design, data science and compliance, workshop facilitation, conflict resolution.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024-2025

Owned roadmap and delivery for the internal AI and data platform supporting the FCAS European programme; led 15+ engineers and data scientists through Scrum. Instituted GitOps rollout with ArgoCD (days to 30 minutes); shifted strategy from UI-led to developer-code-first, increasing pipeline runs 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Owned a national labour-market analytics platform as Product Manager and Deputy IT Security Officer. Integrated Dagster and dbt into the ETL pipeline, saving ~75% of time per data update; delivered full containerisation, a UI relaunch, and a large ETL migration concurrently.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023

Cut a bloated roadmap to the top 10% of features; user acceptance rose fivefold. Shipped the CGM/KIS interface that reduced digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE 2022

Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to one departure. Shipped the Claims Center from concept to production; cut time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND
PAYMENTS 2021-2022

Moved research results into production across a matrix organisation under SAFe with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT DATA
2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

Migrated a legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; still in production.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE
2025-2026

Zero-to-one two-sided staffing marketplace. Anonymity-until-payment model; WhatsApp/Telegram as product surface; LLM agents across the funnel.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure hardware-software encryption. Shipped a three-layer installation in under two minutes for enterprise buyers; later Chair of the Board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments. Built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
