

# Philipp Hilbert. *Product Lead for Government Digital Platforms.*

*Positioning*, thirteen years delivering regulated digital products, now targeting Abu Dhabi's government technology sector with a record of platform convergence and client trust.

## § WHY AMANA TALENT

Few product roles combine the three things I find genuinely motivating: long-horizon platform thinking, direct accountability to public-sector clients, and a mandate to push AI into a high-stakes, compliance-aware context. The explicit goal of converging similar government products onto a shared platform, so new clients onboard faster with less rebuilding, is exactly the architectural ambition I pursued at Rohde & Schwarz with the FCAS AI and data platform, and at Bundesagentur für Arbeit, where I consolidated fragmented ETL pipelines into a single governed data platform. What makes this specific: Abu Dhabi's government technology context demands real sensitivity to policy requirements, governance forums and SLA accountability, not just agile velocity, and that is the environment I have worked in most of my career. *That is precisely where methodical, low-ego ownership compounds into measurable public value.*

---

## § AI-NATIVE STACK

*Daily tools, not buzzwords.*

- **Claude Code**, in-repo prototyping and spec generation
- **GitHub Copilot**, assisted development across delivery teams
- **Cursor**, context-aware refactoring and review
- **Lovable**, rapid front-end prototyping for discovery
- **Gamma.app**, stakeholder-ready decks from rough notes

- **GPT**, requirements drafting and edge-case generation
  - **n8n**, agentic workflow automation and integration
  - **Framer**, design-heavy interactive prototypes
- 

## § TECHNICAL ENVIRONMENT

*Shipped with, not just listed.*

Kubernetes, OpenShift, Docker, ArgoCD (GitOps), Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin/Spring Boot, PostgreSQL, MongoDB, Kafka, Dagster, dbt, Django, CI/CD pipelines, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy.

---

## § SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

*Two-sided B2B marketplace for construction staffing, built zero to one.*

- Matches construction firms with workers, replacing the headhunter with a digital funnel and an anonymity-until-payment model.
  - WhatsApp and Telegram as the primary product surface; LLM agents handle the day-to-day funnel so one operator runs the entire operation.
  - Funnel and conversion analysis in SQL; full product lifecycle owned alone from concept through live operation.
  - Demonstrates the exact capability this role demands: platform thinking, multi-sided adoption mechanics and AI automation inside a regulated, trust-sensitive context.
- 

## § HOW I WOULD WORK AT AMANA TALENT

*First weeks, concrete.*

### WEEK 1

**Listen, map, find the gaps.**

Sit with every government client contact and internal delivery partner to map the as-is: what is on the roadmap, what SLA commitments are live, where the incident log is red, and which product boundaries overlap enough to be candidates for platform convergence.

## WEEK 2

### Baseline, then slice.

Set a measurable baseline for adoption, uptime and client satisfaction on each product, identify the single highest-risk delivery dependency, and propose the first concrete convergence slice to the wider product function.

## WEEK 3+

### Ship, close loops.

Drive the first backlog prioritisation cycle using government priority, customer value, technical dependency and risk as the four axes, and establish a standing feedback loop with each government client, so every incident closes with a documented root cause and a committed fix date.

---

## *I* COVER LETTER

Dear Hiring Team,

Thirteen years of product ownership in regulated environments, defence AI, public-sector analytics, healthcare, insurance, fintech, has shaped one persistent conviction: government and public-sector technology is the hardest and most consequential domain in which to build digital products well. Not because the technology is more complex, but because the accountability is. SLAs are not commercial hygiene; they are public commitments. Governance forums are not bureaucratic friction; they are the mechanism through which civil servants remain answerable. I am not frustrated by structured approval environments, I rely on them.

The role you are describing matches the work I have been doing. At Bundesagentur für Arbeit I owned a national labour-market analytics platform that served policymakers and researchers across Germany. I acted as the main product contact for internal government stakeholders, ran requirements workshops, represented the product in governance reviews, and reduced data update cycle times by close to 75% by introducing Dagster and dbt into a pipeline that had been hand-held through every quarterly import. Simultaneously I migrated the system from bare metal into containers without interrupting service continuity. At Rohde & Schwarz I led the AI and data platform for the FCAS European programme, a multinational, multi-stakeholder environment with strict security and traceability requirements, and reduced deployment lead time from days to thirty minutes through GitOps delivery with ArgoCD.

The platform convergence mandate in your posting is where I believe I can contribute most immediately. I have done this before: at Bundesagentur für Arbeit I consolidated fragmented ETL workflows onto a single governed platform; at EMIL Group I restructured a fragmented eighteen-person delivery organisation into three focused teams so that different insurance

product lines could share engineering capacity rather than compete for it. The principle scales directly to the challenge of bringing multiple government clients onto shared foundations. The bottleneck is usually not the technology, it is getting the first shared data contract agreed and holding the line on scope when each client believes their requirements are unique.

On AI and automation: I work with LLM agents and agentic workflows daily, not as a pilot curiosity but as a delivery tool. I understand the constraints that apply in a government context, privacy, data residency, explainability requirements, audit trails, and I have operated inside EU AI Act and GDPR frameworks. My side project, construct8, demonstrates what responsible AI automation inside a trust-sensitive context looks like when the PM is also the one writing the integration: an anonymity-until-payment marketplace running on LLM agents, with funnel analytics in SQL and no engineering team behind me.

I would be glad to discuss the specific products in your portfolio and where you see the greatest pressure on the roadmap right now. Abu Dhabi is one of the locations I am actively targeting, and I am available to relocate on short notice.

Best regards, *Philipp Hilbert*

---

## **II** CURRICULUM VITAE

---

### § BEARING

Product manager with 13 years of ownership in regulated digital products, government analytics, defence AI, healthcare, insurance and fintech, with a consistent track record of owning complex platforms end to end: strategy, prioritisation, delivery and ongoing service quality. At Bundesagentur für Arbeit I ran a national public-sector analytics platform as the primary product and government stakeholder contact; at Rohde & Schwarz I led AI platform delivery for the FCAS European programme across multinational teams. I am relocating to Abu Dhabi and am available at short notice.

---

### § WHAT I CAN DO

**Product Management:** continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

**Product Ownership:** requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, Scrum ceremonies, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

**Agile and Scaled Delivery:** Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI planning.

**Platform and AI:** LLM agents, agentic workflows, prompt and context engineering, AI governance, EU AI Act, Explainable AI (XAI); ETL pipeline ownership, Dagster, dbt, Kubernetes, ArgoCD, CI/CD, REST APIs.

**Stakeholder and Leadership:** stakeholder management, cross-functional team leadership, C-level and executive reporting, workshop facilitation, governance and steering committee representation.

**Governance and Compliance:** GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership and financial planning.

---

## § PROFESSIONAL EXPERIENCE

### ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Led FCAS AI platform delivery across 15+ engineers and data scientists. GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; pipeline utilisation rose 200% after redirecting strategy based on user workflow instrumentation.

### BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Primary product and stakeholder contact for a national labour-market analytics platform. Introduced Dagster and dbt, reducing data update effort by 75%; migrated bare-metal infrastructure to containers while carrying a full UI relaunch in parallel. Deputy IT Security Officer.

### CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023-2023

Cut an undeliverable roadmap to the top 10% against agreed success measures; user acceptance rose fivefold. Integrated CGM hospital information system interface, reducing digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM  
2022-2022

Restructured an 18-person delivery organisation into three focused teams; attrition dropped from near-total to one departure. Shipped the Claims Center from concept to production and cut time-to-market for new insurance products from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL &  
PAYMENTS 2021-2022

Moved research results into production in a fully SAFe organisation with agile release trains and PI planning across a matrix structure.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT SECURE  
DATA 2021-2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B  
2019-2020

Migrated a legacy procurement webshop to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT MODERNISATION 2019-2019

Full site IT modernisation end to end across wind energy facilities.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL  
NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals in a clinical network.

---

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION  
STAFFING B2B 2025-2026

Zero-to-one two-sided marketplace. Anonymity-until-payment model, WhatsApp and Telegram as product surface, LLM agents across the funnel, SQL funnel analytics.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE  
ENCRYPTION 2016-2021

Shipped a three-layer quantum-secure encryption product installing in under two minutes. Later Chair of the Board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·  
NANOTECHNOLOGY & AGRICULTURE 2018-2021

Took a fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P  
PAYMENTS 2013-2018

Built a mobile group-based P2P payments product from zero to acquisition by Sparkasse inside the girocard ecosystem.
