

Philipp Hilbert. *Analytics PM who ships what the numbers actually mean.*

Positioning, data platform PM with 13 years shipping analytics, infrastructure, and developer-facing products in regulated, high-stakes environments.

§ WHY REVENUECAT

RevenueCat sits at a genuinely rare intersection: enough data volume to make benchmarking meaningful, and enough market penetration to make the benchmarks defensible. The detail about being inside 50%+ of newly shipped subscription apps is not a vanity stat, it means the analytics platform can answer questions that no individual developer could answer alone, including what good actually looks like across the cohort. That is the kind of product surface where getting the data model right matters as much as getting the UI right, and the predictive LTV work in particular is exactly the kind of feature that requires holding both ends simultaneously. *That is the kind of problem that keeps me at my desk past midnight, not because I have to, but because I want to see what the next query returns.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, day-to-day coding assistance
- **Cursor**, context-aware editing
- **Lovable**, rapid front-end prototyping
- **GPT**, research and edge-case generation
- **n8n**, agentic workflow automation

- **Framer**, design-heavy prototyping
 - **Gamma.app**, stakeholder presentations
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, SQL, Python, Dagster, dbt, REST APIs, Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, MongoDB, Kotlin (Spring Boot), Django, Azure DevOps, GitLab, Matomo, MicroStrategy, ETL pipelines, Jira, Confluence.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace built and run solo, with LLM agents across the full funnel.

- Anonymity-until-payment model protecting both sides of the hire until commitment is made.
 - WhatsApp and Telegram as the primary product surface, keeping acquisition friction near zero.
 - LLM agents handle day-to-day funnel operations so one person runs the platform end to end.
 - Funnel and conversion analysis in SQL, the same analytical muscle RevenueCat's analytics PM needs daily.
-

§ HOW I WOULD WORK AT REVENUECAT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Read every open ticket, every chart complaint, every Slack thread about a number that looked wrong, then map which data model decisions are causing the most downstream confusion for developers.

WEEK 2

Instrument, then slice.

Pick the single most-complained-about analytics surface, instrument it properly, and slice the data to separate a display bug from a genuine metrics definition problem.

WEEK 3+

Ship, measure, iterate.

Close the first meaningful fix end to end, write the post-mortem in public so the team knows why the number was wrong and what we changed, and use that as the template for every anomaly investigation going forward.

I COVER LETTER

Dear RevenueCat hiring team,

I have spent thirteen years building products that help non-technical people make confident decisions from complex data, in defence AI, public-sector labour-market analytics, insurance, and healthcare. What draws me to this role is not that it is in a fast-growing company, but that it is a genuinely hard analytics product problem: you are sitting on the richest monetisation dataset in mobile, and the challenge is turning that into something a solo developer can act on before their morning coffee goes cold.

The analytics work I am proudest of happened at the Bundesagentur für Arbeit, where I owned a national labour-market data platform used by policymakers and researchers. I introduced Dagster and dbt, cut data update time by 75%, and migrated the system from bare metal to containers, not because it was on a roadmap someone handed me, but because I dug into the data pipeline myself, found where the hours were going, and fixed it. That is the disposition RevenueCat is asking for: someone who does not fully delegate the investigation to engineering when a number looks off. At Rohde & Schwarz I instrumented two competing developer workflows to decide which one to prioritise, the beautiful UI-led path recorded exactly zero clicks; the developer-code-first path drove a 200% increase in pipeline runs. Metrics-driven decisions where you have to be willing to kill your own preference are the ones I find most satisfying.

I am comfortable with SQL and have used it to build funnel and conversion analysis for construct8, my own two-sided marketplace. I prototype in code using Claude Code and Lovable, and I can hold a technical conversation about data models, API contracts, and the tradeoffs in an analytics pipeline without needing engineering to translate. On the mobile and subscription app ecosystem specifically: I do not have a shipped consumer subscription app to my name, and I want to name that directly. What I do have is deep familiarity with how developers reason about

monetisation metrics from working with developer-facing data products, a strong grasp of cohort and LTV mechanics from running financial planning across several ventures, and the ability to get up to speed on a new domain fast by going straight to the data.

The benchmarking and predictive LTV work is the piece that excites me most. RevenueCat's market position makes it possible to tell a developer not just what their numbers are, but whether those numbers are good, and to do that responsibly requires getting the data model and the statistical framing right before the UI conversation even starts. That is exactly the kind of upstream analytical rigour I want to own.

I would be glad to discuss the role in more detail at your convenience.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years of product ownership across analytics platforms, developer-facing data products, and regulated B2B SaaS. My work at the Bundesagentur für Arbeit, a national labour-market data platform, and at Rohde & Schwarz, an internal AI and data platform for a multinational aerospace programme, maps directly to what RevenueCat needs: someone who can own the data model, debug anomalies without delegating entirely to engineering, and translate complex analytics into decisions developers can act on. I run continuous discovery, instrument competing workflows rather than debating them, and treat defect-to-fix time as a product metric.

§ WHAT I CAN DO

Analytics and Data: SQL, funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, Matomo, MicroStrategy.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance; prototyping with Claude Code, GitHub Copilot, Cursor, Lovable.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity tracking, UAT, Jira, Confluence, Figma, Miro.

Technical Environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, REST APIs, Python, PostgreSQL, MongoDB, Kafka, Kotlin.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, SDLC.

Stakeholder and Leadership: stakeholder alignment, cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI DATA PLATFORM 2024-2025

Internal AI and data platform for the FCAS European programme. Led 15+ engineers and data scientists. GitOps rollout with ArgoCD cut deployment time from days to 30 minutes; instrumenting two competing developer workflows drove 200% increase in pipeline runs.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics platform for policymakers and researchers. Introduced Dagster and dbt, reducing data update time by 75%; migrated bare-metal system to containers; carried full UI relaunch and ETL migration in parallel. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Triaged an undeliverable roadmap; cut to top 10% of features by agreed success measures; user acceptance rose fivefold. Shipped CGM/KIS integration reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022-2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut time-to-market for new insurance products from months to under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS POS 2021-2022

Retail and payments, POS and forecourt systems. Moved research results to production in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA 2021-2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B SAAS 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; still in production. Backlog refinement, user stories, acceptance criteria in Jira.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE 2025-2026

Two-sided construction staffing marketplace built solo. Anonymity-until-payment model; LLM agents across the funnel; SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software. Shipped a three-layer product installing in under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH 2018-2021

Nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P PAYMENTS 2013-2018

Mobile group-based P2P payments. Built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
