

Philipp Hilbert. *Senior Product Manager, Data, analytics, automation, and product intelligence.*

Positioning, ten years shipping data-driven products across public-sector analytics, defence AI platforms, and B2B SaaS, now applying that depth to ecommerce intelligence at scale.

§ WHY BESTREVIEWS

BestReviews sits at an intersection I find genuinely interesting: a data and BI platform that directly shapes consumer decisions at the scale of Nexstar's distribution network. The explicit call for someone who will "create and maintain the roadmap for in-house data analytics, automations, and partner integrations" is the exact work I did at the Federal Employment Agency, owning the product layer of a national labour-market analytics platform, integrating ETL pipelines, and making quarterly data cycles run without hand-holding. What draws me further is the small, distributed team setup: two BI developers in Asia, seven engineers in Europe, a VP of Product as the reporting line. That is a coordination and prioritisation problem as much as a technical one, and it is the kind of problem I solve well. *That kind of leverage, where one focused PM multiplies the output of a distributed team, is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo automation and spec generation
- **GitHub Copilot**, assisted development and code review
- **Cursor**, exploratory coding and rapid prototyping

- **Lovable**, fast front-end prototyping
 - **GPT**, research, drafting, and evaluation loops
 - **n8n**, agentic workflow and automation design
 - **Gamma.app**, stakeholder-facing presentations
 - **Framer**, design-heavy mockups and landing pages
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Dagster, dbt, PostgreSQL, MySQL-compatible SQL, Python, ETL pipelines, Jenkins CI/CD, Kubernetes, Docker, ArgoCD, GitOps, REST APIs, Kafka, MongoDB, Matomo, MicroStrategy, Jira, Confluence, Azure DevOps, Figma, Miro, all from production roles, not side reading.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built alone, zero to one, using LLM agents across the entire funnel.

- Anonymity-until-payment model protecting both sides until commitment, with WhatsApp and Telegram as the primary product surface.
 - LLM agents handle matching, qualification, and follow-up; one person runs the day-to-day operation.
 - Funnel and conversion analysis written directly in SQL against a live data model.
 - Demonstrates the exact combination BestReviews needs: autonomous delivery, AI-powered automation, and analytics tied to outcomes.
-

§ HOW I WOULD WORK AT BESTREVIEWS

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the BI and engineering teams, audit the existing roadmap against partner and ecommerce team priorities, and map where automation bottlenecks sit in the data pipeline.

WEEK 2

Slice and sequence.

Identify the highest-leverage automation candidate, one routine task consuming disproportionate BI hours, and draft a scoped requirement ready for sprint.

WEEK 3+

Ship, measure, repeat.

Deliver the first automation increment, instrument its impact against a pre-agreed KPI, and use the result to sharpen the next roadmap quarter.

I COVER LETTER

Dear BestReviews hiring team,

I am applying for the Senior Product Manager, Data role. The combination of a small, close team, a distributed engineering setup across multiple continents, and a mandate to build out data analytics, automations, and partner integrations is one I have navigated before, and one I find more interesting than a large organisation with a well-funded roadmap already in place.

At the Federal Employment Agency I owned the product layer of a national labour-market analytics platform used by policymakers and researchers across Germany. The practical work looked a lot like what this role describes: I introduced Dagster and dbt so that quarterly data imports and new indicators ran without manual hand-holding, saving close to 75 percent of the time per update cycle. I also integrated test automation into the Jenkins pipeline, freeing QA capacity that was then redirected to new feature work. Those were not engineering decisions, they were product decisions about where automation would compound the team's capacity most quickly, and they required me to dig into the data flows, understand the downstream consumers, and make the case to stakeholders who were not technical.

At Rohde & Schwarz I managed the internal AI and data platform for the FCAS European defence programme, leading a cross-functional team of fifteen engineers and data scientists. I instrumented two competing design approaches, a UI-led one and a developer-code-first one, and the beautiful UI recorded exactly zero clicks. Redirecting strategy based on that signal increased pipeline runs by 200 percent. That is the kind of quantitative hypothesis-testing the BestReviews role calls for, and it is how I approach product decisions generally: agree what success looks like before building, then check afterwards whether it happened.

On the AI tooling side: I use Claude Code, GitHub Copilot, and Cursor for in-repo automation and rapid prototyping; I have built LLM-agent workflows in n8n; and I have shipped AI-powered features in a production environment. I also have five years of Python experience and

am comfortable reading and writing data transformation logic, which I expect to matter when working closely with two BI developers. The Looker experience listed as a nice-to-have is the one gap in the stack, I have worked with MicroStrategy and Matomo for analytics and Dagster and dbt for pipeline orchestration, and I pick up BI tooling quickly.

I would enjoy the chance to speak about how my background fits the role. Thank you for your time.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager, Data with thirteen years of product ownership across public-sector analytics platforms, defence AI, insurance SaaS, fintech, and healthcare. I build and maintain data product roadmaps, own ETL pipeline decisions as a product layer, and drive automation that compounds small team capacity. I work well in distributed setups, coordinating across time zones via async communication, and I tie every analytics investment to a measurable outcome before a line is written.

§ WHAT I CAN DO

Analytics and Data: funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt (data build tool), PostgreSQL, Python, SQL, Matomo, MicroStrategy, BI platform ownership

AI Products and Tooling: LLM (large language model) agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor and Lovable

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research, prototyping, product lifecycle management, go-to-market support

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro

Agile and Scaled Delivery: Agile, Scrum, Kanban, SAFe (Scaled Agile Framework), ART (agile release train), PI planning

SDLC and Delivery Practices: GitOps with ArgoCD, CI/CD, Jenkins, containerised environments, regression and end-to-end test automation, branching strategy, defect-to-fix time as a product metric

Technical Environments: Kubernetes, Docker, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Git, GitLab, Azure DevOps

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM 2024-2025

Led FCAS internal AI and data platform for 15+ engineers and data scientists; GitOps rollout cut deployment time from days to 30 minutes; instrumented competing workflows and redirected strategy, increasing pipeline runs by 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Owned national labour-market analytics platform; introduced Dagster and dbt, saving ~75% of time per data update cycle; migrated bare-metal system to containers; carried full UI relaunch and ETL migration in parallel. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023

Cut overloaded roadmap to top 10% of features; user acceptance rose fivefold. Implemented CGM/KIS integration reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022

Restructured 18-person delivery org into three lean teams; attrition dropped from near-total exodus to one departure. Shipped Claims Center from concept to production; cut insurance product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS, POS
2021-2022

Moved research into production in a fully SAFe matrix organisation with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT
DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE E-
COMMERCE 2019-2020

Migrated legacy procurement webshop to Shopware for three AOK insurers and ~20,000 employees; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY IT MODERNISATION 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING MARKETPLACE 2025-2026

Zero-to-one two-sided B2B marketplace; LLM agents across the funnel; SQL-based funnel and conversion analysis; anonymity-until-payment model.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped three-layer hardware and software product installing in under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH
2018-2021

Took nanotechnology fertiliser product from lab to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group P2P payment product from zero to acquisition; acquired and operated by Sparkasse inside the girocard ecosystem.

§ LANGUAGES

German, native (C2). English, C2, business and technical fluency.
