

Philipp Hilbert. *Product Owner driving patient-pathway outcomes.*

Positioning, Regulated-industry PM with 13 years of backlog ownership, clinical workflow delivery, and data-driven prioritisation, ready to bring that to Psychiatry UK's patient journey.

§ WHY PSYCHIATRY UK

Psychiatry UK is doing something structurally rare in UK mental health: running a fully remote care model at scale, which means the patient pathway itself is the product. The job description calls out commercial acumen alongside clinical outcomes in the same breath, that tension between revenue sustainability and patient experience is exactly the kind of constraint I find sharpening rather than frustrating. The role owns the roadmap end to end, from discovery through backlog to KPIs, which is the shape of work where I produce my best output. *That is exactly the environment where careful prioritisation and clinical empathy need to compound.*

§ HONEST FRAMING

I have not shipped a consumer-facing mental-health application. My healthcare product work, a mobile patient app piloted in hospitals at CLINET Platforms and a clinical wifi rollout across nine hospitals at Waldburg-Zeil Kliniken, was on the clinical-operations side rather than direct-to-patient therapy pathways. The transferable mechanic is strong: I have repeatedly translated clinical workflows into digital requirements under regulated constraints, and I know how to hold patient safety and delivery pace in balance.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
 - **GitHub Copilot**, accelerated acceptance-criteria drafting
 - **Cursor**, rapid prototyping and requirements iteration
 - **Lovable**, front-end prototype validation with stakeholders
 - **GPT**, discovery synthesis and stakeholder communication prep
 - **Gamma.app**, roadmap and strategy storytelling for non-technical audiences
 - **Miro**, async workshop facilitation and journey mapping
 - **Framer**, interactive journey mock-ups for clinical and ops feedback
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Delivered production work across Jira, Confluence, Figma, Miro, Jenkins CI/CD, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, REST APIs, Python, Docker, Kubernetes, ArgoCD, GitLab, Azure DevOps, and Shopware, spanning healthcare, insurance, public-sector analytics, and defence AI platforms.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace removing the headhunter from construction staffing.

- Anonymity-until-payment model protects both firms and workers until commitment is made.
 - WhatsApp and Telegram as the primary product surface, with LLM agents running the funnel end to end.
 - Funnel and conversion analysis in SQL; one person operates the day-to-day.
 - Demonstrates the zero-to-one product capability and commercial data reasoning this role requires at speed.
-

§ HOW I WOULD WORK AT PSYCHIATRY UK

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow clinical coordinators, referral handlers, and remote prescribers to trace the current patient pathway from first contact to discharge, identifying the friction points where drop-off, delay, or manual effort concentrate.

WEEK 2

Prioritise, size, validate.

Map the top friction points against commercial impact and patient-experience data, draft a first backlog slice with user stories and acceptance criteria, and pressure-test the ranking with the clinical and operational leads.

WEEK 3+

Ship, measure, iterate.

Run the first sprint, instrument the first KPIs against the agreed success measures, and establish a regular retrospective cadence so the team closes loops rather than accumulating debt.

I COVER LETTER

Dear Hiring Team,

I am applying for the Product Owner, Patient Pathway role at Psychiatry UK. My background spans 13 years of product ownership in regulated industries, healthcare, insurance, public-sector analytics, and defence, and I have spent much of that time in exactly the position this role describes: holding clinical or operational complexity in one hand and commercial accountability in the other while a cross-functional team needs clear direction.

The work I am most proud of at CLINET Platforms illustrates why this role appeals to me. A five-person team was carrying a roadmap it could not realistically deliver. I cut it to the top ten percent of features against agreed success measures, implemented the CompuGroup Medical interface into hospital information system workflows, and reduced the digital anamnesis process from 30 minutes to five from form to database. That is the kind of outcome I want to replicate: fewer things, done properly, measured against patient impact rather than feature count. Psychiatry UK's fully remote care model means the patient pathway is the entire product surface, there is no clinic building to absorb friction, and that makes rigorous backlog prioritisation and data-driven decision-making more consequential, not less.

At the Bundesagentur für Arbeit I owned a national labour-market analytics platform as its Deputy IT Security Officer, introduced Dagster and dbt to eliminate manual data processing, and cut the time per quarterly data update by 75%. That project taught me how to translate

messy, politically sensitive requirements into clean data pipelines and then hold stakeholders to KPI definitions they had pre-agreed, skills that transfer directly to monitoring pathway performance metrics and communicating trade-offs to clinical, operational, and commercial audiences at Psychiatry UK.

My commercial instincts were shaped early. I co-founded Kvitt Payment Solutions, built it to acquisition by Sparkasse inside the girocard ecosystem, and co-founded Qcrypt AG as its Product Owner, where I shipped a quantum-secure encryption product that installs in under two minutes because enterprise buyers would not accept longer. Revenue sustainability and operational scalability have never been abstract concerns for me; they are the conditions under which a product earns the right to keep existing.

I am a remote-first operator, comfortable with async collaboration across clinical, technical, and commercial stakeholders, and I hold a strong belief that user stories and acceptance criteria are a communication contract, not a documentation exercise. I would welcome the chance to talk through how my background maps onto Psychiatry UK's immediate pathway challenges.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Owner and Product Manager with 13 years of backlog ownership in regulated industries, including healthcare, insurance, public-sector analytics, and defence AI. I run continuous discovery, translate clinical and operational constraints into prioritised roadmaps, and lead cross-functional agile teams from user story through to measured outcome. My record spans B2B SaaS platforms, mobile patient apps, national data platforms, and fintech products taken to acquisition, always with commercial accountability alongside delivery rigour.

§ WHAT I CAN DO

Product Ownership: user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, prioritisation, release planning, UAT, Jira, Confluence, Figma, Miro

Product Management: continuous discovery, product vision and roadmap, MVP definition, A/B testing, user research, prototyping, go-to-market support

Agile Delivery: Scrum, Kanban, SAFe, ART, PI planning, WIP limits, velocity and burndown

Analytics and Data: KPI definition, funnel and churn analysis, Matomo, MicroStrategy, ETL, Dagster, dbt, PostgreSQL, SQL

Regulated Domains: healthcare (clinical apps, hospital information systems), insurance (B2B SaaS), public sector (national analytics), defence AI (FCAS programme), GDPR/DSGVO, Deputy IT Security Officer

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, EU AI Act, Claude Code, GitHub Copilot, Cursor, Lovable

Technical Environments: Kubernetes, Docker, ArgoCD, GitOps, CI/CD, Jenkins, REST APIs, Python, PostgreSQL, MongoDB, Azure DevOps

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Owned the internal AI and data platform for the FCAS European programme; led 15+ engineers through Scrum, introduced GitOps with ArgoCD (rollout time: days → 30 minutes), and increased pipeline runs 200% by redirecting strategy to developer-code-first workflows.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

National labour-market analytics platform; introduced Dagster and dbt, cutting data-update time by 75%; led full bare-metal-to-containers migration and UI relaunch; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut an undeliverable roadmap to the top 10% of features, user acceptance rose fivefold; implemented CGM/KIS interface reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured an 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure; shipped Claims Center from concept to production; cut insurance-product launch from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS POS
2021-2022

Moved research results into production in a full SAFe setup with agile release trains and PI planning across a matrix organisation.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT
DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE
PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; backlog refinement, user stories and acceptance criteria in Jira. Still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals; patient pathway and clinical-network context.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PM · CONSTRUCTION STAFFING
MARKETPLACE 2025-PRESENT

Zero to one: two-sided B2B marketplace, anonymity-until-payment model, LLM agents across the funnel, SQL-based conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Shipped a three-layer hardware-software product installing in under two minutes to satisfy enterprise buyers; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group-based P2P payment product from zero to acquisition by Sparkasse inside the girocard ecosystem.
