

Philipp Hilbert. *Delivery experience leader with a decade of end-to-end product ownership.*

Positioning, ten years owning product roadmaps from discovery to rollout, now applying that discipline to Amazon's MENA delivery experience.

§ WHY AMAZON

Amazon's DEX team in MENAT sits at the intersection of customer obsession and genuine operational complexity, a region where last-mile infrastructure, payment rails, and customer expectations differ market by market. The job description is explicit that this is not a pure product role; it blends P&L accountability, business strategy, and execution ownership, which is exactly the shape of work I find most satisfying. What draws me in particular is the framing of delivery experience as a measurable, improvable product metric, not merely a logistics afterthought. *That is precisely the problem space where rigorous discovery and data-backed decision-making generate the most compounding value.*

§ HONEST FRAMING

I have not held a role with explicit P&L sign-off authority; my financial accountability has been at the programme and product level rather than full profit-and-loss ownership. The transferable mechanic is strong: I routinely negotiate outcomes with senior leadership, define success metrics before build, and make product decisions through a business-viability lens, the same analytical rigour the role demands, one abstraction level closer to the line.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo iteration and spec generation
 - **GitHub Copilot**, assisted code review and prototyping
 - **Lovable**, rapid clickable prototypes from product briefs
 - **Framer**, design-heavy wireframes and stakeholder demos
 - **GPT**, document drafting and edge-case enumeration
 - **n8n**, multi-agent workflow automation
 - **Cursor/VSCode**, lightweight scripting and repo navigation
 - **Gamma.app**, senior leadership presentation decks
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Production work spans WhatsApp and Telegram messaging APIs with LLM agents at construct8; Kafka, Kotlin, and Python data pipelines at Rohde & Schwarz; Dagster and dbt ETL migrations at Bundesagentur für Arbeit; Kubernetes, OpenShift, ArgoCD, Jenkins, and GitOps rollout tooling; clinical CGM/KIS integrations in iOS/Android at CLINET; Shopware e-commerce at AOK ITSCare; POS and payment forecourt systems at Scheidt & Bachmann; and PostgreSQL, MongoDB, and REST APIs across multiple platforms.

§ SIDE PROJECT

TRUE-NORTH.BERLIN TRUE-NORTH.BERLIN →

Independent product consultancy and AI-native tooling lab.

- Builds and ships production features using agent frameworks under self-authored guardrails, without writing raw production code.
- Architecture: file-queue-based agent loops with Claude Code and Lovable for full prototype-to-deployed-feature cycles.
- Hosts client engagements (construct8) alongside personal experiments in agentic workflow design and crypto market infrastructure.
- Directly relevant: demonstrates the autonomous, entrepreneurial execution mode the DEX role expects from a senior individual contributor.

§ HOW I WOULD WORK AT AMAZON

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Conduct structured ride-alongs with customer service, ops, and logistics partners across at least two MENA markets to map the actual delivery-experience failure modes against the existing DEX roadmap.

WEEK 2

Instrument, then slice.

Identify the two or three metrics that most directly proxy customer delivery satisfaction in the region, confirm they are instrumented, and propose the first data-backed roadmap slice for stakeholder alignment.

WEEK 3+

Ship, measure, iterate.

Drive the first launch to production, define the pre-agreed success metric, and close the feedback loop with a written retrospective that updates the roadmap prioritisation for the following sprint.

I COVER LETTER

Dear Amazon DEX MENAT Hiring Team,

The delivery experience problem in MENA is structurally harder than in mature markets: address data is fragmented, customer expectations vary sharply between Gulf and Levant markets, and the last-mile infrastructure is still being built in real time. That operational complexity is exactly the kind of environment where rigorous product thinking, treating each roadmap bet as a falsifiable hypothesis, generates disproportionate value. It is why this role caught my attention immediately.

Over the past decade I have owned product roadmaps across regulated, operationally complex environments: a national health data platform at Bundesdruckerei (RKI), a public-sector labour-market analytics platform at Bundesagentur für Arbeit, a defence AI training pipeline at Rohde & Schwarz, and currently a zero-to-one B2B marketplace at construct8. In each case the mandate was similar to what you describe, business strategy, product execution, and operational

excellence rolled into one accountability. At Rohde & Schwarz I drove a deployment rollout from days to thirty minutes by reframing the product's architecture from UI-heavy to developer-friendly, a decision I reached by working directly with the engineering team and the end users simultaneously. At EMIL Group I restructured a seventeen-person monolithic team into three nimble squads with clear leads, because the team structure was the bottleneck, not the backlog. The financial rigour the job description calls for, quickly assessing the viability of key decisions, influencing senior leadership through data, is how I have operated throughout. Before building anything at Bundesagentur für Arbeit I co-authored the migration business case and had the success metric agreed in writing before the first sprint. At Scheidt & Bachmann I worked inside a SAFe release-train structure, aligning PI planning across payment, POS, and forecourt workstreams, which demanded exactly the cross-functional stakeholder discipline Amazon operates at.

My experience is strongest in European B2B SaaS and public-sector platforms; I am transparent that direct MENA market or P&L ownership experience is not on my record. What I bring instead is a track record of entering operationally complex, cross-functional environments, understanding the customer problem faster than the organisation expects, and shipping measurable improvements with small, focused teams. I am also actively targeting the UAE for relocation and view this posting as a long-term commitment, not a geographic experiment.

I would welcome the opportunity to discuss how this background maps to the specific execution challenges on the MENA DEX roadmap.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Philipp Hilbert is a product leader with ten-plus years of end-to-end ownership across B2B SaaS, public-sector platforms, and regulated environments. He enters complex, multi-stakeholder situations, maps the real customer problem, and drives measurable outcomes through cross-functional alignment and disciplined execution. His background spans defence AI platforms, e-commerce migrations, payment and forecourt systems, and health data infrastructure, all sharing the operational rigour and data-backed decision-making that a senior delivery-experience role demands.

§ WHAT I CAN DO

Product craft. Continuous discovery, prototype-led validation, outcome negotiation with stakeholders, backlog and release ownership, SAFe at scale (PI planning, release trains), metric definition before build.

Integration and platforms. Payment and forecourt systems, e-commerce platforms (Shopware), clinical interfaces (CGM/KIS), messaging APIs (WhatsApp, Telegram).

Data and AI platforms. Multimodal AI training data pipelines, ETL orchestration and migration, analytics platforms for public use. Kafka, Python, Kotlin, Dagster, dbt, LLM agents.

Cloud, delivery and operations. Bare-metal to container migration, rollout and hotfix pipelines, GitOps. Kubernetes, OpenShift, ArgoCD, Jenkins, Git, GitLab, Azure DevOps.

AI-first building. I own production code without writing it: Claude Code, GitHub Copilot, Lovable for full prototyping, agent frameworks under my own guardrails.

Regulated environments. Defence, public sector, health data and insurance: identity management, highest privacy requirements, audit and governance cycles.

Working tools: Jira, Confluence.

§ PROFESSIONAL EXPERIENCE

CONSTRUCT8 · PRODUCT MANAGER · CONSTRUCTION MARKETPLACE, B2B SAAS 2025 TO NOW

Zero-to-one build; AI-assisted operations via WhatsApp/Telegram APIs and LLM agents.

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI PLATFORM (FCAS), B2B SAAS 2024 TO 2025

Unified multimodal AI training data into one standard; compressed rollout from days to 30 minutes, fully hotfix-capable; steered product from UI-heavy to dev-code-friendly. Kafka, Kotlin, Python.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC ANALYTICS PLATFORM 2023 TO 2024

Made public labour-market data searchable, filterable, and social-media-ready; bare-metal-to-container migration and big ETL migration. Dagster, dbt.

EMIL GROUP · PRODUCT MANAGER · INSURTECH LOW-CODE SAAS 2022

Launched Claims Center; split a 17-person team into three nimble squads with leads.

CLINET · PRODUCT OWNER · HEALTH-TECH MOBILE APP 2021 TO 2022

Native iOS/Android app; integrated the CGM/KIS clinical interface directly.

BUNDESDRUCKEREI · PRODUCT OWNER · NATIONAL HEALTH DATA PLATFORM (RKI) 2021

RKI projects DIM and DESH: vaccination statistics and viral-mutation tracking; identity management, highest privacy.

SCHEIDT & BACHMANN · PRODUCT OWNER · FUEL-RETAIL INTEGRATION 2020 TO 2021

POS, payment, and forecourt systems; SAFe: PI planning, release trains.

AOK ITSCARE · PROXY PRODUCT OWNER · PROCUREMENT PLATFORM 2019 TO 2020

Full migration of a legacy webshop to a modern Shopware application for ~20,000 users.

ENERCON · PROJECT LEAD · IT MODERNISATION, WIND ENERGY 2019

Full site modernisation: end devices, servers, switches, lines, software.

§ FOUNDER & EARLY-STAGE EXPERIENCE

Kvitt (mobile payments, acquired by Sparkasse) · Qcrypt (quantum encryption) · Smart Soil Technologies (nanotech)
