Dear Reiz Tech team,

I have 13 years of product ownership in regulated B2B software, insurance, payments, public-sector analytics, and healthcare, and I am applying for the Product Manager role on your lending platform.

The work you describe matches my background closely. At EMIL Group I owned a B2B SaaS platform for insurers, reinsurers, and brokers. I restructured the delivery organisation, shipped the Claims Center from concept to production, and cut time-to-market for new insurance products from months to under a week. At Bundesagentur für Arbeit I owned a national labour-market data platform, introduced Dagster and dbt to automate quarterly data imports, and saved roughly 75% of the time per update. Both roles required the same skills your posting names: client conversations, prioritisation under incomplete information, and cross-functional alignment without formal authority.

The lending context adds one dimension I do not have in production, I have not shipped a loan origination or credit decisioning feature. I have, however, owned product areas where regulation and data privacy set hard constraints: GDPR across multiple projects, and Deputy IT Security Officer at Bundesagentur für Arbeit. I understand how compliance requirements shape what you can build and in what order, and I pick that domain knowledge up quickly in client conversations.

Your posting mentions working with clients and managing senior stakeholder expectations. I am comfortable in that room. At CLINET Platforms I inherited a five-person team with a roadmap it could not deliver, rebuilt trust with hospital stakeholders, and cut the roadmap to the features that actually moved the needle. User acceptance rose more than fivefold. At Rohde & Schwarz I worked with multinational stakeholders on a defence AI platform and redirected strategy when workflow analysis showed that a heavily funded UI approach was recording zero real clicks.

I work remotely, I am an EU citizen, and I can start within four weeks of an offer.

Best regards, *Philipp Hilbert*
