PROFILE

Product Manager and Product Owner with 13 years of product ownership across platform, infrastructure, and regulated B2B SaaS products. I've shipped partner-facing API products, multi-tenant policy controls, and usage-based billing mechanics in defence AI, public-sector analytics, insurance, healthcare, payments, and security. I run continuous discovery, turn strategy and technical constraints into a prioritised roadmap, and lead cross-functional teams through agile delivery.

HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

WORK EXPERIENCE

Product Manager, Rohde & Schwarz, Munich / Remote | 07/2024-05/2025

Defence and aerospace. Internal AI and data platform (AI) for the FCAS European programme.

- Championed GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes across multinational teams and making the platform hotfix-capable.
- Redirected product strategy based on user workflow analysis: instrumented two competing workflows, cut the UI-led path that recorded zero usage, and increased pipeline runs by 200%.
- Led a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

Product Manager, Bundesagentur für Arbeit, Nuremberg / Remote | 05/2023-07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt for quarterly ETL imports, saving close to 75% of the time per data update and removing hand-holding from routine runs.
- Migrated a bare-metal system fully into containers, giving the team autonomous control of its own environments, alongside a full UI relaunch and a large ETL migration.

Product Owner, CLINET Platforms, Berlin | 01/2023-07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut an undeliverable roadmap to its top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows: digital anamnesis dropped from 30 minutes to 5.

Product Manager (AI), EMIL Group, Berlin | 04/2022-12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to under a week.

Product Owner Integration Team, Scheidt & Bachmann Fuel & Convenience Retail, Mönchengladbach |

09/2021-03/2022

Retail and payments. POS and forecourt systems in a fully SAFe (Scaled Agile Framework) setup.

- Moved research results into production across a matrix organisation with agile release trains and PI planning.

Product Owner (interim), Bundesdruckerei, Berlin | 03/2021-06/2021

Government. Secure data platform; identity management for Robert Koch Institute programmes DIM and DESH.

Product Owner (proxy), AOK ITSCare, Frankfurt | 03/2019-05/2020

Health insurance. B2B procurement webshop for three AOK insurers and roughly 20,000 employees.

- Migrated a legacy system to Shopware; still in production. Owned backlog refinement, user stories and acceptance criteria in Jira.

FOUNDER TRACK

Founder and Product Manager, construct8, Limassol | 12/2025-Present

Construction staffing. Two-sided B2B marketplace matching firms with workers.

- Built zero to one alone: anonymity-until-payment model, WhatsApp/Telegram as product surface, LLM agents across the funnel, funnel and conversion analysis in SQL.

Co-Founder and Product Owner, Qcrypt AG, Berlin | 01/2016-12/2021

IT security. Integrated hardware and software for quantum-secure encryption.

- Enterprise buyers required fast deployment, so I shipped a three-layer product that installs in under two minutes. Later Chair of the board.

Co-Founder, CDO and CFO, Smart Soil Technologies, Berlin | 03/2018-08/2021

Nanotechnology and agriculture. Took a fertiliser product from laboratory to investor rounds.

Founder and CFO, Kvitt Payment Solutions, Berlin | 02/2013-11/2018

Fintech. Mobile group-based P2P payments; acquired and operated by Sparkasse inside the girocard ecosystem.

- Built from zero to acquisition, working through revenue share, billing, and partnership mechanics on both sides.

SKILLS

- **AI Products and Tooling:** LLM (large language model) agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.
- **Platform and API Product Management:** multi-tenant architecture, tenant isolation, delegated administration, partner onboarding, provisioning APIs, usage metering, API design, developer experience, B2B SaaS.
- **Product Ownership:** requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.
- **Product Management:** continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.
- **Agile and Scaled Delivery:** Agile, Scrum, Kanban, SAgile (Scaled Agile Framework), ART (agile release train), PI (program increment) planning.
- **Technical Environments Owned:** Kubernetes (K8s), Docker, GitOps with ArgoCD, CI/CD, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt (data build tool), SQL, OpenShift.
- **Analytics and Data:** funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.
- **Governance and Business:** GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning as CFO, ROI reasoning.

EDUCATION

Diplom-Wirtschaftsingenieur (Industrial Engineering and Management, equivalent to a Master's degree), Technische Universität Berlin (TU Berlin), Germany | 10/2006-09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.

LANGUAGES

German (native speaker, C2) · English (C2, business and technical fluency)
