

Philipp Hilbert. *Product Manager turning platforms into financial hubs.*

Positioning, Thirteen years shipping regulated financial and platform products, payments, fintech, public-sector infrastructure, in high-stakes, cross-functional environments.

§ WHY STRIPE

Treasury for Platforms is one of the more technically interesting product problems in fintech right now: not a payments layer on top of a bank, but financial infrastructure that platforms like Shopify Balance can embed and own as their own product. The requirement to be the most technically fluent person in the room with the user, and the most user-fluent person in the room with engineering, describes how I have worked for thirteen years. *That is a tension I know how to hold.*

§ HONEST FRAMING

I have not shipped treasury account types or checkbook products directly. My payments work, founding Kvitt Payment Solutions through to acquisition inside the girocard ecosystem, covers the transaction mechanics, but not the full-featured financial account layer Treasury for Platforms centres on. The transferable mechanic I am strongest in is regulated infrastructure product ownership: taking a complex, compliance-heavy product from alpha to general availability with engineering, legal, and external partners in the same room.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, code review and PR acceleration
- **Cursor**, editor-level AI pair programming
- **Lovable**, rapid front-end prototyping
- **GPT**, document drafting and edge-case generation
- **n8n**, agentic workflow automation
- **Framer**, design-heavy prototyping
- **Gamma.app**, stakeholder presentation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, SQL, Python, Kotlin (Spring Boot), Django, REST APIs, MongoDB, Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Dagster, dbt, Git, GitLab, Azure DevOps, Jira, Confluence, Figma.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace matching construction firms with workers, built alone from zero.

- Anonymity-until-payment model protects both sides until commitment is made.
- WhatsApp and Telegram as the product surface, with LLM agents handling the funnel day-to-day.
- Funnel and conversion analysis in SQL; one operator runs the full product.
- Directly relevant: multi-party transaction design, platform economics, and agentic automation at the infrastructure layer.

§ HOW I WOULD WORK AT STRIPE

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Join active platform sales calls and integration reviews to understand where the current Treasury onboarding friction lives, before touching the roadmap.

WEEK 2

Slice the roadmap.

Take the alpha-to-GA path for the highest-priority account type and identify the three decisions blocking it, with a written framing doc.

WEEK 3+

Ship and close loops.

Drive the first integration milestone to completion with engineering, legal, and a live platform partner, then write up what broke and what to fix next.

I COVER LETTER

Dear Stripe team,

Stripe Treasury for Platforms is asking for someone who can own the path from alpha to general availability on new account types, checkbooks, and accounting integrations, joining sales calls, running demos, and sitting between engineering and the platform developer in the room. That is the exact shape of work I have done repeatedly, most directly at Kvitt Payment Solutions, where I took a mobile P2P payments product from zero to acquisition inside the girocard ecosystem, and at EMIL Group, where I shipped the Claims Center from concept to production on a B2B SaaS insurance platform with 18 engineers across three teams.

At Rohde & Schwarz I owned the AI and data platform for the FCAS programme, a multinational infrastructure product with strict compliance and security requirements. I instrumented competing developer workflows to make a roadmap decision, UI-led recorded exactly zero clicks, developer-code-first increased pipeline runs by 200%. That is the kind of data-first, opinionated product thinking this role asks for. I am comfortable writing SQL to answer a question myself rather than waiting for an analyst.

The Treasury for Platforms problem that interests me most is the compliance and bank-partnership layer that lets platforms launch quickly while staying inside regulatory guardrails. I have owned that tension in payments (girocard ecosystem), public-sector analytics (Bundesagentur für Arbeit, Deputy IT Security Officer), and defence AI (FCAS, EU AI Act compliance). I understand that the regulatory constraint is usually also the moat.

I have not shipped treasury account types directly, and I said so upfront in the framing section of this application. What I bring instead is thirteen years of regulated infrastructure product ownership, a working knowledge of platform economics from building a two-sided marketplace myself, and the technical range to hold a productive conversation with a Stripe engineer about API design or schema tradeoffs. I can close the domain gap faster than someone without the infrastructure and payments foundation.

I would be glad to talk through the Treasury roadmap and where I could add the most traction earliest.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ PROFILE

Product Manager and Product Owner with 13 years of product ownership in regulated industries: payments, fintech, defence AI, public-sector analytics, insurance, and healthcare. I run continuous discovery, translate strategy and user needs into a prioritised roadmap, and lead cross-functional teams through agile delivery. Platform product experience spans a two-sided B2B marketplace built alone and B2B SaaS platforms with 18-person delivery organisations. Strong on SQL-driven data analysis and technically fluent enough to work directly with engineering on API and schema decisions.

§ HOW I WORK

- I leave my ego at home. I want to drive the decision, not to have the last word.
- On a new product I spend a little to learn before spending a lot to build. Cheap experiments make expensive decisions safe(r).
- Outcome over output. Producing something is not the achievement; it also has to fit a market, so I agree what would count as success before we build and check afterwards whether it happened.
- I keep the whole value chain in view, not just the backlog. Defect-to-fix time is a product metric; architects and DevOps engineers build that chain, my job is to steer it into the right lanes.

§ WORK EXPERIENCE

PRODUCT MANAGER, ROHDE & SCHWARZ, MUNICH / REMOTE | 07/2024 - 05/2025

Defence and aerospace. Internal AI and data platform for the FCAS European programme.

- Redirected product strategy based on user workflow analysis, increasing pipeline runs by 200% by prioritising developer-code-first over UI-led design. Instrumented two competing workflows; the UI-led one recorded exactly zero clicks.
- Championed GitOps delivery and test automation with ArgoCD, reducing rollout time from days to 30 minutes across multinational teams.
- Managed a cross-functional team of 15+ engineers and data scientists through Scrum in Jira and Confluence.

PRODUCT MANAGER, BUNDESAGENTUR FÜR ARBEIT (FEDERAL EMPLOYMENT AGENCY), NUREMBERG / REMOTE | 05/2023 - 07/2024

Public sector. National labour-market analytics platform for policymakers and researchers. Deputy IT Security Officer.

- Introduced Dagster and dbt so quarterly data imports ran without hand-holding, saving almost 75% of time per data update.
- Migrated a bare-metal system fully into containers and carried a full UI relaunch and a large ETL migration through the same period.

PRODUCT OWNER, CLINET PLATFORMS, BERLIN | 01/2023 - 07/2023

Healthcare. Mobile patient app for iOS and Android, piloted in hospitals.

- Cut roadmap to the top 10% of features against agreed success measures: user acceptance rose more than fivefold.
- Implemented the CGM interface into hospital KIS workflows, reducing digital anamnesis from 30 minutes to 5.

PRODUCT MANAGER, EMIL GROUP, BERLIN | 04/2022 - 12/2022

Insurance. B2B SaaS platform for insurers, reinsurers, brokers and underwriters.

- Restructured an 18-person delivery organisation into three lean teams with their own leads: attrition fell from near-total exodus to a single departure.
- Shipped the Claims Center from concept to production with no precedent, and cut time-to-market for a new insurance product from months to under a week.

PRODUCT OWNER INTEGRATION TEAM, SCHEIDT & BACHMANN FUEL & CONVENIENCE RETAIL, MÖNCHENGLADBACH | 09/2021 - 03/2022

Retail and payments, POS and forecourt systems.

- Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

PRODUCT OWNER (INTERIM), BUNDESDRUCKEREI, BERLIN | 03/2021 - 06/2021

- Government secure data platform. Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

PRODUCT OWNER (PROXY), AOK ITSCARE, FRANKFURT | 03/2019 - 05/2020

Health insurance, B2B procurement platform.

- Migrated a legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production.

PRODUCT OWNER, WALDBURG-ZEIL KLINIKEN, ISNY | 08/2017 - 06/2018

- Healthcare, clinical network. Wifi infrastructure rollout across nine hospitals.

§ FOUNDER TRACK

FOUNDER AND PRODUCT MANAGER, CONSTRUCT8, LIMASSOL | 12/2025 - 06/2026

Construction staffing, two-sided B2B marketplace built from zero.

- Anonymity-until-payment model protects both sides until commitment; LLM agents run the funnel so one operator manages the day-to-day. Funnel and conversion analysis in SQL.

CO-FOUNDER AND PRODUCT OWNER, QCRYPT AG, BERLIN | 01/2016 - 12/2021

IT security, quantum-secure encryption hardware and software.

- Enterprise buyers would not accept long installation; shipped a three-layer product that installs in under two minutes. Later Chair of the board.

FOUNDER AND CFO, KVITT PAYMENT SOLUTIONS, BERLIN | 02/2013 - 11/2018

Fintech, mobile group-based P2P payments.

- Built from zero and taken to acquisition: acquired and operated by Sparkasse inside the girocard ecosystem.

§ SKILLS

Product Management: continuous discovery, product vision and product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, go-to-market support, Product Manager, platform product ownership.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, backlog refinement, sprint planning, retrospective, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: SQL, funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, data-driven prioritisation.

Payments and Fintech: P2P payments, girocard ecosystem, PSP integration, platform multi-party transactions, B2B SaaS platform economics.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, GitOps, CI/CD, ArgoCD, Kubernetes, Docker, Jenkins.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, EU AI Act, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning.

§ EDUCATION

DIPLOM-WIRTSCHAFTSINGENIEUR (INDUSTRIAL ENGINEERING AND MANAGEMENT, EQUIVALENT TO A MASTER'S DEGREE), TECHNISCHE UNIVERSITÄT BERLIN (TU BERLIN), GERMANY | 10/2006 - 09/2014

- Specialisation: Logistics. Thesis with Siemens AG Energy Service on balancing-power market profitability.
