

Philipp Hilbert. *Technical Product Manager, Agentic AI workflows.*

Positioning, I build delivery structure around agentic engineering teams, roadmap, sprint hygiene, and stakeholder alignment, without slowing down what's already working.

§ WHY LOANSURE

Loansure's agentic team is a recognizable situation: strong engineers who have shipped real things, now needing someone to hold the roadmap and translate between them and the business. The "citizen builder" audit, reviewing Replit and Claude tools built by business users to decide which are worth operationalizing, is exactly the kind of technical product judgment call I enjoy and have done before. The emphasis on Performance Marketing as the primary business stakeholder gives a concrete, measurable domain to anchor priorities against rather than abstract backlog hygiene. *That combination of technical ambiguity, real delivery autonomy, and clear business outcome is precisely where my working style produces the most leverage.*

§ HONEST FRAMING

I have not shipped a product in mortgage or lending specifically. My regulated-industry experience runs across insurance, health, defence, public-sector analytics, and fintech payments, the compliance and stakeholder dynamics transfer directly, but the domain terminology will take a few weeks to become fluent.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
 - **GPT**, discovery synthesis and edge-case enumeration
 - **Cursor / VSCode**, exploratory code reading
 - **Lovable**, rapid front-end prototyping
 - **GitHub Copilot**, daily coding assistance
 - **n8n**, agentic workflow orchestration
 - **Framer**, design-heavy prototyping
 - **Gamma.app**, stakeholder-facing deck creation
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD (GitOps), Jenkins, CI/CD pipelines, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), PostgreSQL, MongoDB, Kafka, Dagster, dbt, SQL, Jira, Confluence, Figma, Miro, LLM agent frameworks, Replit, n8n, Matomo, MicroStrategy.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B staffing marketplace with LLM agents across the funnel, built solo.

- Matches construction firms with workers, removing the headhunter from the hire with an anonymity-until-payment model.
- WhatsApp and Telegram as the primary product surface; LLM agents handle intake, qualification, and matching.
- Funnel and conversion analysis in SQL; one operator (me) runs the day-to-day.
- Directly relevant: demonstrates hands-on agentic workflow design, solo zero-to-one execution, and the kind of citizen-builder judgment Loansure wants applied to its Replit and Claude tools.

§ HOW I WOULD WORK AT LOANSURE

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow the agentic engineering team and the Performance Marketing stakeholders in their existing workflows, map what is in flight versus what is ad hoc, and identify which citizen-builder Replit and Claude tools already have real adoption.

WEEK 2

Scope and prioritize.

Run a short prioritization session with engineering leads and at least one business stakeholder, draft the first version of the roadmap with clear epics, and agree what "done" looks like for the top three items.

WEEK 3+

Ship sprint discipline.

Stand up consistent sprint planning, backlog grooming, and story-pointing norms; deliver the first leadership progress report; and close the loop on the citizen-builder audit with a written operationalization plan.

I COVER LETTER

Dear Loansure Hiring Team,

I am applying for the Technical Product Manager, Agentic Team (Contract) role. The situation you describe, a capable engineering team that has shipped real agentic workflows but lacks a dedicated product and delivery function, is one I have navigated more than once, and it is the kind of build-it-from-scratch assignment I find most interesting.

At EMIL Group I inherited an 18-person delivery organisation that had lost its senior engineers and its client trust. I restructured it into three focused teams with their own leads, brought attrition from near-total to a single departure, and shipped the Claims Center from concept to production with no prior precedent in the organisation. At CLINET Platforms I took a five-person team with an undeliverable roadmap, cut it to the top 10% of features against agreed success measures, and watched user acceptance rise more than fivefold. Both of those situations

required the same thing Loansure is asking for: the credibility to make prioritization decisions that hold, not just relay them.

The agentic workflows dimension is not theoretical for me. I run multi-agent orchestration with n8n, I use Claude Code and Cursor daily for in-repo work, and I built construct8, a two-sided B2B staffing marketplace, solo, with LLM agents handling intake, qualification, and matching across WhatsApp and Telegram. That background means I can read the engineering team's work at a level of detail that builds trust rather than creating translation overhead. It also means I have direct intuitions about which of the citizen-builder tools your business users have created in Replit and Claude are worth the engineering cost to operationalize, and which are not.

The Performance Marketing anchor is useful to me because it is measurable. Agentic teams can produce a lot of motion without producing outcomes; tying the roadmap explicitly to Performance Marketing KPIs gives a natural forcing function for prioritization and a clear story for leadership reporting. That is the model I would propose to establish in the first three weeks alongside consistent sprint planning, backlog grooming, and story-pointing norms.

I am available on short notice and comfortable operating fully remote across EST/EDT hours. I would be glad to talk through how I would approach the first 90 days in more detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager and product owner with 13 years of product ownership across regulated industries, including defence AI, public-sector analytics, insurance, healthcare, fintech payments, and agentic workflow products. I specialize in bringing roadmap structure, sprint discipline, and stakeholder alignment to technical teams that have been operating without a dedicated product function, and I have hands-on experience designing and shipping agentic workflows with LLM tooling.

§ WHAT I CAN DO

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); full prototyping with Claude Code, GitHub Copilot, Cursor and Lovable.

Product Ownership: requirements engineering, user stories, acceptance criteria, definition of done, epics, backlog refinement, sprint planning, daily stand-up, sprint review, retrospective, story-point estimation, velocity and burndown, release planning, UAT, Jira, Confluence, Figma, Miro.

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support.

Agile and Scaled Delivery: Agile, Scrum, Kanban, WIP limits, SAFe, ART, PI planning.

Stakeholder and Leadership: stakeholder management and expectation alignment, cross-functional team leadership, C-level and executive reporting, workshop facilitation, conflict resolution, change management.

Analytics and data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

SDLC and Delivery Practices: GitOps with ArgoCD, CI/CD, containerised environments, regression and end-to-end test automation, same-day hotfix paths, defect-to-fix and cycle time as product metrics.

Technical Environments Owned: Kubernetes, OpenShift, Docker, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin, PostgreSQL, MongoDB, Kafka.

Governance and Business: GDPR, Deputy IT Security Officer, identity management, budget ownership and financial planning as CFO, ROI reasoning.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Led GitOps rollout (ArgoCD) cutting deployment time from days to 30 minutes; drove 200% increase in pipeline runs by redirecting strategy from UI-led to developer-code-first, based on instrumented workflow analysis. Cross-functional team of 15+ engineers and data scientists, Scrum in Jira and Confluence.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt for a national labour-market data platform, cutting data-update time by 75%; integrated test automation into the Jenkins pipeline; carried full UI relaunch and ETL migration from bare metal to containers. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut an undeliverable roadmap to the top 10% of features; user acceptance rose more than fivefold. Integrated CGM hospital information system (KIS) interface, reducing anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery organisation into three lean teams; attrition fell from near-total to one departure. Shipped Claims Center concept to production; cut new insurance product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS POS 2021-2022

Moved research results to production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT SECURE DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and roughly 20,000 employees; still in production. Backlog refinement, user stories, and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY SITE IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK INFRASTRUCTURE 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-2026

Zero to one alone: two-sided B2B marketplace with LLM agents across the funnel, WhatsApp and Telegram as product surface, SQL-based funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Owned backup, restore, and data-encryption product architecture. Shipped three-layer install under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY 2018-2021

Lab to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group-based P2P payment product from zero to acquisition by Sparkasse inside the girocard ecosystem.
