

Philipp Hilbert. *Senior Product Manager, AR Automation & Fintech Platforms.*

Positioning, B2B payments veteran with 13 years of product ownership who turns complex financial workflows into scalable, AI-native platform experiences that move money faster.

§ WHY VERSAPAY

Versapay sits at exactly the intersection I find most interesting: the unglamorous but high-stakes middle of B2B commerce where slow AR cycles destroy working capital and erode customer relationships. The specificity of the problem, connecting finance teams, customers, and business systems in one ecosystem to give cash-flow clarity, is what separates a real platform from a feature set. I have spent years in adjacent territory: P2P payments at Kvitt (acquired by Sparkasse inside the girocard ecosystem), PSP integration design, and B2B SaaS platform delivery for insurers and public-sector clients where data accuracy and trust are non-negotiable. Processing \$257B annually on a platform used by 5M+ companies is a scale challenge where systems thinking and rigorous instrumentation matter more than roadmap length. *That is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo feature delivery and spec generation
- **GitHub Copilot**, paired engineering across Python and Kotlin projects
- **Cursor**, context-aware refactoring and codebase navigation
- **Lovable**, rapid front-end prototyping for discovery and concept tests

- **Framer**, design-heavy prototype surfaces for stakeholder validation
 - **GPT**, research synthesis, edge-case generation, and user-story drafting
 - **n8n**, agentic workflow automation and multi-step LLM pipeline orchestration
 - **Gamma.app**, structured written artifacts and decision-framework documents
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, REST APIs, Kafka, Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Dagster, dbt, ETL pipelines, Azure DevOps, GitLab, Jira, Confluence, Figma, Matomo, MicroStrategy, SQL.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B marketplace that takes the headhunter out of construction staffing.

- Matches firms with workers under an anonymity-until-payment model that protects each side until commitment is made.
 - WhatsApp and Telegram as the primary product surface, minimising onboarding friction for a non-technical user base.
 - LLM agents across the full funnel so a single operator runs day-to-day operations without a support team.
 - Demonstrates end-to-end zero-to-one ownership, strategy, discovery, implementation, and funnel analytics in SQL, directly transferable to Versapay's self-serve and automation ambitions.
-

§ HOW I WOULD WORK AT VERSAPAY

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow AR automation workflows end-to-end with finance teams and customers, instrument where cash-flow clarity breaks down, and map the gap between what the platform promises and what actually lands in reconciliation.

WEEK 2

Instrument, slice, validate.

Define the leading metrics for my product area, adoption, reconciliation cycle time, cost-to-serve, and run the first structured concept test against a real customer segment rather than internal assumption.

WEEK 3+

Ship, unblock, compound.

Deliver the first scoped change with a clear success criterion attached, close the feedback loop publicly with the team, and establish the experiment-to-release cadence that makes every subsequent decision cheaper.

I COVER LETTER

Dear Versapay Team,

AR is one of those domains where the problem is obvious, the pain is acute, and the solutions are almost always under-engineered, which is why Versapay's positioning as the platform that removes friction between finance teams, customers, and business systems caught my attention. I have spent the last decade building products in exactly the adjacent spaces: P2P payments at Kvitt (taken from zero to acquisition by Sparkasse inside the girocard ecosystem), B2B SaaS platforms for insurers and reinsurers at EMIL Group, data platform product ownership at Germany's Federal Employment Agency, and AI/data platform delivery for the FCAS defence programme at Rohde & Schwarz. The connective tissue across all of it is the same: complex financial and operational workflows, regulated environments, cross-functional teams, and the discipline of defining what "done" actually means in measurable terms before a line of code is written.

What draws me specifically to this role is the AI-first mandate. I do not treat AI as a feature to be added; I use it daily as a product execution tool. Claude Code, GitHub Copilot, Cursor, and Lovable are part of how I run discovery, generate edge cases, prototype concepts, and accelerate spec work. At Rohde & Schwarz I redirected platform strategy based on instrumented workflow analysis, two competing designs, one recorded zero clicks, and drove a 200% increase in pipeline runs by prioritising what users actually did over what they said they wanted. That same discipline applies directly to AR automation: the workflows are measurable, the drop-off points are findable, and the experiments are designable.

On the commercial side, I have owned product economics before. At EMIL Group I restructured an 18-person delivery organisation that was losing engineers and client trust, shipped the Claims Center from concept to production with no prior template, and cut new insurance

product time-to-market from months to under a week. At Bundesagentur für Arbeit I reduced data-update time by 75% through ETL modernisation while simultaneously running a full UI relaunch, not by heroics, but by sequencing and ruthless scope discipline. I understand that ownership means the outcome metric, not just the feature shipped.

My fintech and payments background adds specific weight here. Kvitt was a mobile group-based P2P payment product built inside the girocard ecosystem; I took it from zero to acquisition. I have designed payment flow and PSP integration products, worked on the edge cases that make or break user trust in payment systems, and understand both the technical constraints and the compliance considerations that come with moving money. Versapay's B2B payments platform, and the challenge of accelerating cash flow at scale across 5M+ transacting companies, is a natural extension of that work, not a pivot.

I operate well in ambiguous, fast-moving environments, I hold decisions accountable to metrics, and I keep the ego out of the room. If that matches what you are looking for in your AR Automation team, I would be glad to talk.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Manager with 13 years of product ownership in regulated, data-intensive B2B environments, payments, fintech, insurance, public-sector analytics, and defence AI. I own outcomes, not features: I agree what counts as success before building, instrument competing approaches, and hold delivery accountable to measurable business metrics. My technical fluency runs deep enough to co-design architecture and challenge estimates without becoming an engineering bottleneck.

§ WHAT I CAN DO

Payments and Fintech: P2P payment product design, PSP integration, girocard ecosystem, payment flow edge-case handling, B2B financial workflow automation

AI Products and Tooling: LLM agent design, agentic workflows, prompt and context engineering, evaluation loops, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); prototyping with Claude Code, GitHub Copilot, Cursor, Lovable

Platform and

Data: ETL (extract, transform, load), Dagster, dbt, PostgreSQL, Kafka, REST APIs, funnel and churn analysis, KPI definition, Matomo, MicroStrategy

Product Management: continuous discovery, product vision and roadmap, prioritisation, MVP and PoC definition, A/B testing, prototyping, go-to-market support, product lifecycle management

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro

Agile and Scaled Delivery: Scrum, Kanban, SAFe (Scaled Agile Framework), ART, PI planning, GitOps rollout with ArgoCD, CI/CD, containerised environments

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management

Governance: GDPR/DSGVO, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

Spearheaded the internal AI and data platform for the FCAS European programme across a 15+ person cross-functional team; redirected strategy based on instrumented workflow analysis, raising pipeline runs 200%; championed GitOps delivery with ArgoCD, cutting rollout time from days to 30 minutes.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS PLATFORM 2023-2024

Owned national labour-market analytics platform for policymakers and researchers; introduced Dagster and dbt to cut data-update time 75%; migrated bare-metal system fully into containers; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Triaged an undeliverable roadmap to the top 10% of features by agreed success measures, raising user acceptance more than fivefold; implemented CGM hospital information system interface, cutting digital anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM 2022

Restructured an 18-person delivery organisation into three lean teams, reducing attrition from near-total exodus to a single departure; shipped the Claims Center from concept to production; cut new insurance product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL & PAYMENTS POS 2021-2022

Moved research results into production across a SAFe matrix organisation with agile release trains and PI planning; POS and forecourt payment systems.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B PROCUREMENT 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and ~20,000 employees; backlog refinement, user stories, and acceptance criteria in Jira; still in production.

ENERCON · PROJECT LEAD · WIND ENERGY SITE IT 2019

Full site IT modernisation end-to-end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK INFRASTRUCTURE 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-2026

Zero to one: two-sided B2B marketplace with LLM agents across the funnel, anonymity-until-payment model, WhatsApp/Telegram as product surface, funnel and conversion analysis in SQL.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Shipped a three-layer quantum-secure encryption product that installs in under two minutes to overcome enterprise buyer resistance; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH
2018-2021

Took nanotechnology fertiliser product from laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group-based P2P payments from zero to acquisition by Sparkasse inside the girocard ecosystem.
