§ WHY EMARATECH

emaratech sits at the intersection of public-sector complexity and fast-paced enterprise delivery in the UAE, exactly the kind of environment where structured requirements engineering and client-facing product ownership create real leverage. The posting describes a PM who owns the full cycle from BRDs and user stories through UAT and client sign-off, which matches how I have operated across every engagement I have held. The explicit focus on backlog prioritisation against strategic goals, combined with direct client communication and compliance responsibility, mirrors the work I did at Bundesagentur für Arbeit and Rohde & Schwarz, large institutional clients, multi-team delivery, high stakes for system failure. *That combination of client trust, delivery rigour, and structured documentation is where I do my clearest work.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, assisted development cycles
- **Cursor**, context-aware refactors
- **Lovable**, rapid front-end prototyping
- **Framer**, design-heavy wireframing
- **Gamma.app**, stakeholder-ready presentations
- **GPT**, research and draft synthesis
- **n8n**, agentic workflow automation

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy, SAFe, Scrum, Kanban.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace for the construction industry, built solo from zero.

- Anonymity-until-payment model protecting both sides until commitment is confirmed.
 - WhatsApp and Telegram as the primary product surface, with LLM agents running the funnel end-to-end.
 - Funnel and conversion analysis in SQL; full solo delivery from concept to live.
 - Demonstrates exactly the autonomous zero-to-one ownership and agentic product execution this role calls for in a client-delivery context.
-

§ HOW I WOULD WORK AT EMARATECH

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow active client engagements, read existing BRDs and CRs, and map the current requirements-to-delivery pipeline to locate where handoffs break down between client input and team execution.

WEEK 2

Sharpen the backlog.

Take one live backlog, rank stories against strategic goals, surface priority conflicts, and align the product owner on a clean iteration goal, using the same ranking approach the posting describes.

WEEK 3+

Ship and close loops.

Own acceptance criteria on the next sprint, run UAT validation, and deliver the first client-facing progress update with clear metrics against defined success factors.

I COVER LETTER

Dear emaratech Hiring Team,

I am writing to apply for the Product Manager position. With thirteen years of product ownership across defence AI, public-sector analytics, healthcare, insurance, and fintech, always in environments where client requirements had to be translated precisely into delivery, I believe I can step into this role and add value from the first sprint.

Your posting describes a PM who interfaces directly with clients, documents business requirements, manages the backlog against strategic priorities, and owns quality through UAT. That is an accurate description of what I have done at every engagement. At Rohde & Schwarz, I managed a cross-functional team of 15+ engineers and data scientists for an internal AI and data platform, running Scrum ceremonies in Jira and Confluence while maintaining alignment with multinational stakeholders across the FCAS European programme. At Bundesagentur für Arbeit, I served as Deputy IT Security Officer alongside my product role, which meant I also carried compliance and procedural responsibility of exactly the kind your posting requires. At CLINET Platforms, I cut a five-person team's roadmap to the top 10% of features against agreed success criteria and increased user acceptance fivefold, a clear example of backlog prioritisation driving outcome over output.

The conflict resolution and stakeholder alignment aspects of this role are areas where I have had to operate under pressure. At EMIL Group, the delivery organisation was losing senior engineers and client trust simultaneously. I restructured 18 people into three lean teams with dedicated leads: attrition dropped from near-total exodus to a single departure. Rebuilding client confidence while restructuring internally required exactly the kind of dual-track engagement management your posting describes, resolving internal priority conflicts while maintaining external-facing communication and delivery commitments.

On the requirements side, I am comfortable with the full cycle from initial client workshops through Business Requirements Documents, user stories, acceptance criteria, and traceability matrices. I have maintained requirements traceability in both Jira and custom documentation systems, and I understand that a requirements matrix is not a bureaucratic artefact but the instrument by which you check at the end whether what was built matches what was asked. That discipline is non-negotiable in client-delivery environments.

I hold a Diplom-Wirtschaftsingenieur from TU Berlin, which satisfies the Computer Sciences and Engineering academic requirement. I am an EU citizen, fluent in English at C2 level, and fully open to relocating to Dubai for an on-site role. I can be available within four weeks of an offer.

I would welcome the opportunity to discuss how my background maps to your current client engagements and pipeline.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager and Product Owner with 13 years of experience in regulated and enterprise B2B environments. I translate client requirements into structured BRDs and user stories, own the backlog from prioritisation through sprint execution, and carry accountability for UAT, acceptance criteria, and stakeholder alignment across engineering, QA, and client-side teams. My background spans defence AI, public-sector analytics, healthcare, insurance, and fintech, always in delivery-facing roles where documentation rigour and client trust are the primary success measures.

§ WHAT I CAN DO

Backlog Management and Scrum: user stories, acceptance criteria, epics, backlog refinement, sprint planning, daily stand-up, sprint review, retrospective, story-point estimation, velocity and burndown, Jira, Confluence.

Product Planning and Roadmap: continuous discovery, product vision, product roadmap, prioritisation, MVP definition, PoC, A/B testing, user research and interviews, UAT, release planning, requirements traceability matrix.

Stakeholder and Client Engagement: stakeholder management, expectation alignment, cross-functional team leadership, conflict resolution, C-level reporting, workshop facilitation, change management.

Agile and Scaled Delivery: Agile, Scrum, Kanban, WIP limits, SAFe, ART, PI planning, GitOps rollout with ArgoCD, CI/CD, defect-to-fix and cycle time as product metrics.

Analytics and Data: funnel and churn analysis, KPI definition, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy.

Technical Environments Owned: Kubernetes, OpenShift, Docker, Jenkins, Git, GitLab, Azure DevOps, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka.

Governance: GDPR, Deputy IT Security Officer, identity management, EU AI Act, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI 2024-2025

Owned AI and data platform for the FCAS programme; led 15+ engineers and data scientists through Scrum; reduced GitOps rollout time from days to 30 minutes with ArgoCD; increased pipeline runs 200% by redirecting strategy based on user workflow analysis.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR 2023-2024

National labour-market analytics platform; Deputy IT Security Officer; integrated test automation into Jenkins; introduced Dagster and dbt, saving 75% of time per data update; migrated bare-metal to containers; carried full UI relaunch and ETL migration.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE 2023

Cut roadmap to top 10% of features against success criteria: user acceptance rose fivefold. Implemented CGM interface into hospital KIS workflows, reducing anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery organisation into three lean teams; attrition fell from near-total to one departure. Shipped Claims Center concept to production; cut new-product launch time from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER INTEGRATION · RETAIL AND PAYMENTS 2021-2022

Moved research results to production in a fully SAFE environment with agile release trains and PI planning; POS and forecourt systems.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · GOVERNMENT 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH; secure government data platform.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE 2019-2020

Migrated legacy system to Shopware for three AOK insurers and 20,000 employees; backlog refinement, user stories, and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY 2019

Full site IT modernisation end to end, Wismar and Magdeburg sites.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE 2017-2018

Wifi infrastructure rollout across nine hospitals in a clinical network.

§ FOUNDER AND EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING 2025-2026

Zero-to-one two-sided B2B marketplace; anonymity-until-payment model; LLM agents across the funnel; SQL-based funnel and conversion analysis; solo delivery.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software; shipped three-layer product installing in under two minutes for enterprise buyers; later Chair of the Board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRITECH 2018-2021

Nanotechnology fertiliser from laboratory to investor rounds; financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH 2013-2018

Mobile group-based P2P payments built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.
