

Philipp Hilbert. *Senior Product Owner for mission-critical digital platforms.*

Positioning, 13 years owning multi-disciplinary technical product backlogs in regulated environments, from defence AI to public-sector data platforms.

§ WHY DIGYCORP

The Digital Twin Platform is one of the few programmes where the PM role is genuinely hard in both directions at once: the science stakeholders care about reef ecology at ecosystem scale, and the engineering teams are working across cloud, DevOps, ML and data engineering simultaneously. That combination of high-stakes scientific requirements and deeply technical delivery is exactly the environment I have been working in, most recently on the FCAS defence AI platform where I was the product authority bridging senior programme stakeholders and a multinational cross-functional team. The programme's 2-petabyte data environment and the nursery operations coming online in 2026 are precisely the kind of expanding, multi-domain data landscape where clean backlog discipline and tight Definition of Done make the difference between a sprint that ships and one that drifts. *That is exactly the environment where my strengths compound.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec generation and edge-case drafting
- **GitHub Copilot**, accelerated story and acceptance-criteria authoring
- **Cursor**, lightweight code-review and backlog documentation
- **Lovable**, rapid front-end prototyping for stakeholder validation

- **GPT**, stakeholder feedback synthesis and discovery analysis
 - **Gamma.app**, executive roadmap and narrative slide decks
 - **Jira AI / Atlassian Rovo**, backlog automation and sprint reporting
 - **n8n**, multi-agent agentic workflow orchestration
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Azure DevOps, Git, GitLab, REST APIs, Python, Kotlin, Django, PostgreSQL, MongoDB, Kafka, Dagster, dbt, ETL pipelines, Jira, Confluence, Miro, Figma.

§ SIDE PROJECT

CONSTRUCT8 GITHUB.COM/HILBERTP →

Zero-to-one B2B marketplace matching construction firms with workers, run by one person using LLM agents.

- Built the full two-sided funnel, anonymity-until-payment model protecting each side until commitment, alone from zero.
 - WhatsApp and Telegram as the product surface, with LLM agents handling intake, matching and follow-up across the funnel.
 - Funnel and conversion analysis in SQL; agentic workflow design using file-queue-based loops.
 - Direct evidence that I can own an ambiguous, data-heavy product end to end and make it operational without a team around me.
-

§ HOW I WOULD WORK AT DIGYCORP

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow sprint ceremonies and stakeholder reviews, read the existing backlog and RAID log end to end, and map every open dependency across the five technical disciplines against the quarterly plan.

WEEK 2

Tighten backlog health.

Walk every item entering the next sprint against the Definition of Ready and Definition of Done, close any acceptance-criteria gaps with scientific stakeholders, and surface the first evidence-based trade-off recommendation to the CCB.

WEEK 3+

Ship, report, repeat.

Own the Now, Next, Later roadmap update for the Programme Status Review, run the first dual-track discovery session with the nursery and field teams, and begin tracking delivery health via Agile flow metrics in Jira.

I COVER LETTER

Dear DigyCorp Hiring Team,

The Senior Product Owner role for the Digital Twin Platform stood out immediately because it is structurally the hardest kind of product job: you need someone who can hold a rigorous, evidence-based conversation with senior research scientists about reef ecology, then turn around and translate that conversation into a backlog the engineering teams can plan a sprint against, without losing precision in either direction. That is the operating mode I have been in for the last several years.

At Rohde & Schwarz I was the product authority for an internal AI and data Platform supporting the FCAS European defence programme. The stakeholder surface spanned defence programme leads, data scientists and a multinational engineering team of 15+ people working across cloud, DevOps and data engineering. I ran dual-track continuous discovery to keep requirements validated ahead of sprint commitment, owned the full backlog with clear epics, user stories and acceptance criteria, and prioritised using cost-of-delay reasoning to sequence work that actually mattered to the programme. The result was a 200% increase in pipeline runs after redirecting strategy based on instrumented user workflow analysis, and a GitOps rollout path that compressed deployment from days to 30 minutes, making the Platform hotfix-capable for the first time.

At the Bundesagentur für Arbeit I owned the product backlog for a national labour-market analytics Platform serving policymakers and researchers. That environment required the same combination of scientific-stakeholder management and deep technical delivery: I carried a full ETL migration, a bare-metal-to-containers modernisation and a UI relaunch simultaneously, while introducing Dagster and dbt to eliminate the hand-holding that had been consuming 75% of the time on each quarterly data update. The Definition of Done on every data pipeline story

included automated test coverage in the Jenkins CI/CD pipeline, because a data Platform that scientists rely on cannot ship untested.

The DTP's scope, 2 petabytes of scientific, environmental, spatial and operational data, machine learning across the environment, and operational tooling used daily by nursery and field teams, maps directly to what I have shipped. I am comfortable owning the backlog across cloud engineering, DevOps, backend and frontend development and data engineering, comfortable presenting trade-off recommendations to a Change Control Board, and comfortable running story-mapping sessions with domain experts who are not product people. I use Jira, Azure DevOps and Confluence daily, and I use AI-assisted tooling, Atlassian Rovo, Claude Code, GitHub Copilot, to keep backlog documentation, acceptance criteria and sprint reporting current without the overhead that typically falls behind in fast-moving programmes.

The onsite delivery model and the governance structure, two-week sprints, rolling quarterly plan, formal CCB, are the conditions I work best in. Delivery discipline is not a constraint I work around; it is the mechanism that makes ambitious long-term programmes like this one trustworthy to their scientific stakeholders and their funders. I would be glad to discuss the role and the programme in more detail.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Senior Product Owner with 13 years of backlog ownership and delivery leadership across defence AI, public-sector analytics, healthcare and insurance platforms. Most recently the product authority for an internal AI and data Platform at Rohde & Schwarz supporting the FCAS programme, running dual-track continuous discovery and cross-functional Scrum with 15+ engineers. Equally fluent in scientific-stakeholder negotiation and in the technical trade-off conversations that happen inside sprint planning.

§ WHAT I CAN DO

Product Ownership: user stories, epics, acceptance criteria, Definition of Done, backlog refinement, sprint planning, story-point estimation, velocity, burndown/burnup, INVEST, WSJF, RICE, MoSCoW, cost of delay, UAT, release planning, Jira, Confluence, Azure DevOps, Miro, Figma

Product Management: continuous discovery, dual-track discovery, outcome-based roadmapping, Now, Next, Later, OKRs, North Star metrics, A/B testing, user research, MVP, PoC, product lifecycle management

Agile and Scaled Delivery: Scrum, Kanban, SAgile, agile release train, PI planning, sprint reviews, retrospectives, WIP limits

Data and Analytics Platform Ownership: ETL, Dagster, dbt, PostgreSQL, Kafka, KPI definition, funnel analysis, MicroStrategy, Matomo

DevOps and Infrastructure Fluency: Kubernetes, OpenShift, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Git, GitLab, Terraform, Helm

AI Products and Tooling: LLM agents, agentic workflows, machine learning platform product ownership, prompt engineering, human-in-the-loop design, Explainable AI, EU AI Act, Claude Code, GitHub Copilot, Cursor, Atlassian Rovo

Technical Fluency: Python, Kotlin, Django, REST APIs, SQL, PostgreSQL, MongoDB

Stakeholder and Governance: C-level and executive reporting, Change Control Board presentations, GDPR, Deputy IT Security Officer, identity management, workshop facilitation, conflict resolution

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Owned the AI and data Platform backlog for the FCAS programme; led 15+ engineers and data scientists through Scrum in Jira and Confluence; GitOps rollout via ArgoCD cut deployment from days to 30 minutes; continuous discovery and instrumented workflow analysis drove a 200% increase in pipeline runs.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS PLATFORM 2023-2024

Owned a national labour-market analytics Platform; introduced Dagster and dbt cutting data-update time by 75%; carried full bare-metal-to-containers migration, ETL migration and UI relaunch concurrently; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE PLATFORM 2023

Rationalised an undeliverable roadmap to the top 10% of features against agreed success measures; user acceptance rose fivefold; implemented CGM hospital information system integration cutting digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS PLATFORM 2022

Restructured an 18-person delivery organisation into three lean teams; attrition fell from near-total exodus to one departure; shipped the Claims Center from concept to production; cut time-to-market for a new insurance product from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS PLATFORM 2021-2022

Moved research results into production in a full SAFe setup with agile release trains and PI planning across a matrix organisation.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA PLATFORM 2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE B2B PLATFORM 2019-2020

Migrated a legacy procurement system to Shopware for three AOK insurers and 20,000 employees; backlog refinement, user stories and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY SITE IT 2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · HEALTHCARE CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-2026

Zero-to-one two-sided B2B Platform; LLM agents across the funnel; anonymity-until-payment model; SQL funnel and conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Hardware and software product for quantum-resistant encryption; three-layer install under two minutes; later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO ·
NANOTECHNOLOGY AND AGRICULTURE 2018-2021

Fertiliser product from laboratory to investor rounds; financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Mobile group-based P2P payments built from zero; acquired by Sparkasse, operated inside the girocard ecosystem.
