

Philipp Hilbert. *Credit product specialist turning P&L levers into customer value.*

Positioning, ten years shipping regulated financial products, from mobile P2P payments to enterprise billing, now focused on credit card monetization at scale.

§ WHY TABBY

Tabby is doing something structurally interesting: taking a BNPL beachhead and building a full money app around it, which means the Tabby Card is not just a product but the monetization spine of the entire platform. The GMV growing at +142% year over year while simultaneously driving profitability through a product-led program is the tension I find most energising, it means every fee structure and billing cycle decision has to serve both retention and margin at once. The regulatory surface (CBUAE, SAMA across UAE and KSA) is the kind of constraint that sharpens product thinking rather than diluting it. *That is exactly the environment where precision in unit economics separates good PMs from great ones.*

§ HONEST FRAMING

I have not owned a revolving credit or grace-period billing product end to end, my card-adjacent experience comes from the P2P payments and PSP-integration side at Kvitt and Scheidt & Bachmann, not from managing statements and minimum payment logic. What I do bring is a strong track record of owning P&L trade-offs, defending fee structures with Finance and Risk (at EMIL Group and Bundesagentur für Arbeit), and shipping billing-adjacent workflows under regulatory scrutiny, the domain mechanics are learnable fast when the analytical and stakeholder muscle is already there.

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo specs and edge-case generation
- **GitHub Copilot**, accelerating acceptance criteria and test coverage
- **Cursor / VSCode**, LLM-assisted backlog and requirements work
- **Lovable**, rapid front-end prototyping before engineering commits
- **GPT**, stakeholder brief drafting and discovery synthesis
- **n8n**, agentic workflow design and automation loops
- **Framer**, design-heavy early-stage mockups
- **Gamma.app**, executive and C-level reporting decks

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

PostgreSQL, MongoDB, REST APIs, Python, Kotlin (Spring Boot), Kafka, Kubernetes, Docker, ArgoCD, GitOps, Jenkins, CI/CD, Dagster, dbt, ETL pipelines, Azure DevOps, GitLab, Jira, Confluence, Figma, Miro, Matomo, MicroStrategy, SQL funnel and churn analysis.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built zero-to-one as sole founder.

- Matches construction firms with workers, removing the headhunter from the hiring loop with an anonymity-until-payment model.
- WhatsApp and Telegram as the product surface; LLM agents across the funnel so one person runs the day-to-day operations.
- Funnel and conversion analysis in SQL; full stack owned solo from concept through live customers.
- Demonstrates the same 0→1 on new financial infrastructure the Tabby Card expansion into KSA requires: novel product logic, regulatory edge cases, and lean execution without a full team.

§ HOW I WOULD WORK AT TABBY

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow every stakeholder, Risk, Compliance, Billing, Finance, and map the current fee-structure and repayment-experience decision flows in detail, identifying where guardrails are implicit rather than instrumented.

WEEK 2

Instrument the P&L.

Build a working unit-economics model for the Card Retention scope: margin basis points by cohort, fee revenue per billing cycle, and the repayment funnel drop-offs that cost the most, so the first experiment backlog is grounded in dollars, not intuition.

WEEK 3+

Ship and measure.

Pre-register the first A/B test, pricing or billing cycle, with clear success metrics and kill criteria, align it with Compliance on CBUAE requirements, and hand off a rollout plan the engineering team can execute without ambiguity.

I COVER LETTER

Dear Vita and the Tabby Card team,

Tabby Card is an unusual asset: a credit product growing at +142% GMV year over year that is simultaneously being asked to generate margin. Most fast-growing credit products buy growth by deferring monetization; the fact that Tabby is running both at once, with a product-led program, tells me the team has real discipline about unit economics. That discipline is what I want to work inside.

My most relevant foundation is Kvitt Payment Solutions, which I co-founded and built from zero to acquisition, absorbed into the girocard ecosystem and operated by Sparkasse. Kvitt was a mobile P2P payments product, which meant I lived in the intersection of customer-facing payment UX, PSP integration, and the regulatory envelope of the German banking system. The parallels to owning billing cycles, fee structures and repayment experience at Tabby are direct:

every edge case in a payment flow is also a compliance question, and every pricing decision is a retention question dressed differently.

At EMIL Group I ran an 18-person delivery organisation for a B2B SaaS insurance platform and shipped the Claims Center from concept to production. More relevant here: I restructured the team when it was hemorrhaging senior engineers and losing client trust, and I cut time-to-market for new insurance product launches from months to under a week. The stakeholder surface, Finance, Legal, Compliance, Risk, mirrors exactly what the Tabby Card role describes, and I am comfortable being the person who owns a trade-off rather than escalating it.

I want to be transparent about one gap: I have not owned revolving credit, grace periods, or minimum payment logic end to end. My card-adjacent experience is on the payments and PSP side. I flag this not as a disqualifier but because I think you should hear it from me first, not discover it in week three. The analytical and regulatory-stakeholder muscle is there; the specific credit-card billing mechanics I will learn fast, and I have a demonstrated pattern of doing exactly that when entering new regulated domains.

On the KSA expansion: I have experience adapting a product to a new regulatory environment under time pressure (the FCAS programme involved multinational compliance across DE, FR, ES, IT), and I have actively targeted the UAE as my next location, I am willing to relocate to Dubai or Abu Dhabi, which means the GCC market is a genuine interest, not a concession.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager and Product Owner with 13 years of delivery in regulated industries, payments, fintech, insurance, public-sector analytics and defence AI. I own P&L trade-offs, run experiment-driven roadmaps, and work directly with Finance, Risk, Legal and Compliance to ship fee structures and billing workflows that hold up in production. Available to relocate to the UAE.

§ WHAT I CAN DO

Product Management: continuous discovery, product vision and roadmap, A/B testing, MVP definition, PoC, prioritisation, go-to-market support, user research and interviews, product lifecycle management.

Fintech and Payments: P2P payment product design, PSP integration, payment flow UX, fee structure and pricing decisions, regulatory compliance (GDPR, banking regulation), billing and repayment workflow design.

Insurance and Regulated Products: B2B SaaS for insurers and reinsurers, claims workflows, data governance, Deputy IT Security Officer, EU AI Act, GDPR.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity tracking, UAT, Jira, Confluence, Figma, Miro.

Analytics and Data: funnel and churn analysis, KPI definition, unit economics modelling, ETL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, SQL.

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, evaluation loops, human-in-the-loop design, AI governance, Explainable AI; Claude Code, GitHub Copilot, Cursor, Lovable.

Agile and Scaled Delivery: Scrum, Kanban, SaaS, ART, PI planning, GitOps rollout with ArgoCD, CI/CD, release gating, regression and end-to-end test automation.

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA PLATFORM 2024-2025

Led cross-functional team of 15+ through Scrum; GitOps delivery with ArgoCD cut rollout from days to 30 minutes. Redirected strategy on workflow analysis, lifting pipeline runs 200%.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Introduced Dagster and dbt, saving ~75% of time per data update; migrated bare-metal to containers; carried full UI relaunch and large ETL migration in parallel. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE APP 2023

Cut roadmap to top 10% of features; user acceptance rose fivefold. Shipped CGM/KIS integration, reducing digital anamnesis from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person org into three lean teams; attrition from near-total exodus to one departure. Shipped Claims Center zero-to-one; cut insurance product time-to-market from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL PAYMENTS AND POS 2021-2022

Moved research into production in a full SAFe setup with agile release trains and PI planning across a matrix organisation.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and ~20,000 employees; still in production.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK 2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER AND EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION STAFFING MARKETPLACE 2025-2026

Zero-to-one two-sided B2B marketplace; LLM agents across the funnel; SQL funnel and conversion analysis; sole founder.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE ENCRYPTION 2016-2021

Owned backup, restore and encryption product architecture; shipped three-layer install under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · NANOTECHNOLOGY 2018-2021

Lab to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built mobile group P2P payments product from zero; acquired by Sparkasse, operated inside the girocard ecosystem.
