

Philipp Hilbert. *Principal P2P Product Specialist.*

Positioning, fintech PM with a shipped P2P payments product, 13 years across regulated marketplaces, and deep personal fluency in crypto trading infrastructure.

§ WHY BYBIT

Bybit's P2P platform sits at the intersection of the two things I find genuinely hard and interesting: designing trust mechanics between strangers transacting at scale, and keeping conversion high while fraud signals are ambiguous. The posting names dispute handling, escrow processes, and risk alerts as core problems, not nice-to-haves, and that is exactly the product surface I built at Kvitt Payment Solutions, where the core mechanic was a group-based P2P payment flow taken from zero to acquisition inside the girocard ecosystem. Bybit's 80 million users mean that every basis-point improvement in order completion rate moves real volume, and that the cost of getting escrow or appeal flows wrong is immediate and measurable. *That is precisely the kind of environment where outcome-over-output thinking pays off.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo spec and edge-case generation
- **GitHub Copilot**, paired with Cursor for implementation review
- **Lovable**, rapid front-end flow prototyping
- **Framer**, interaction design and UX walkthroughs
- **GPT**, research synthesis and structured requirements drafts
- **n8n**, agentic workflow automation
- **Gamma.app**, stakeholder decks from structured notes
- **Jira / Confluence**, backlog and sprint discipline

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Python, PostgreSQL, MongoDB, REST APIs, Kafka, Kotlin (Spring Boot), Django, SQL, Docker, Kubernetes, ArgoCD, GitLab, Azure DevOps, Jenkins, CI/CD, Dagster, dbt, Matomo, Figma, Miro.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/HilbertP) →

Two-sided B2B staffing marketplace built solo, zero to one.

- Anonymity-until-payment model protects both parties until commitment is confirmed, directly analogous to escrow-gated P2P release mechanics.
 - WhatsApp and Telegram as the primary product surface; LLM agents automate the full funnel so one operator runs day-to-day.
 - Funnel and conversion analysis in SQL; order completion and drop-off tracked as primary KPIs.
 - The trust and governance design transfers directly to P2P marketplace dispute and merchant management problems.
-

§ HOW I WOULD WORK AT BYBIT

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Shadow CS and risk teams on live dispute queues, pull the last 90 days of order completion, dispute rate, and cancellation data, and map every current P2P flow, ad sequencing through appeal resolution, against user drop-off points.

WEEK 2

Instrument and slice.

Identify the two or three flow steps with the highest abandonment or dispute concentration, frame competing hypotheses, and spec the smallest experiments that could falsify each one.

WEEK 3+

Ship, measure, close.

Push the first targeted improvement, whether a payment-confirmation UX change, a risk-alert threshold, or an appeal-flow shortcut, through to production, instrument it properly, and run the next prioritisation loop.

I COVER LETTER

Dear Hiring Team at Bybit,

I am applying for the Principal P2P Product Specialist role. My interest is specific: I founded Kvitt Payment Solutions, a mobile group-based P2P payments product that was acquired by Sparkasse and operated inside the girocard ecosystem. That experience gave me a hands-on understanding of what it actually takes to design trust between strangers transacting with real money, escrow logic, dispute escalation, fraud signal triangulation, and the UX decisions that move completion rates without opening attack surfaces.

Beyond Kvitt, I have spent the last eight years as an active participant in crypto markets, trading on Hyperliquid, Bitget, Jupiter, and Across Protocol, working with liquidation heatmaps on Coinglass and Hyblock Capital, and building my own backtesting engine and algorithmic trading frameworks. I understand P2P crypto trading not just as a product manager reading a spec, but as a user who has experienced firsthand where order flows break, where payment confirmation anxiety spikes, and where trust between counterparties is fragile. That dual perspective, product builder and power user, is directly relevant to the order completion rate, dispute rate, and liquidity metrics this role owns.

On the execution side, my recent roles have been about taking complex operational workflows and making them measurably better. At Rohde & Schwarz I increased pipeline runs 200% by instrumenting competing workflows and redirecting strategy based on what the data actually showed. At Bundesagentur für Arbeit I cut data-update time by 75% through disciplined ETL redesign. At EMIL Group I shipped the Claims Center from concept to production while rebuilding a fractured delivery organisation. Each of these required the same skill set the P2P role calls for: cross-functional alignment across engineering, compliance, and operations; data-driven prioritisation under pressure; and the ability to hold both user experience and platform safety in view simultaneously.

I work AI-natively, Claude Code, Lovable, and n8n for prototyping and agentic workflow design, and I bring Python fluency for data analysis alongside the standard PM toolkit. I am an EU citizen based in Berlin, available at four weeks' notice, and open to remote or relocation to the UAE.

I would welcome a conversation about how the P2P platform's current bottlenecks compare to what I have seen and solved elsewhere.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product manager with 13 years of ownership across fintech, regulated marketplaces, and platform products. Founded and shipped a P2P payments product acquired by Sparkasse; led data and AI platforms for defence and public-sector clients; and spent eight years as a hands-on crypto market participant building trading infrastructure. Combines rigorous discovery practice with the technical fluency to own delivery end-to-end, from escrow flow design to SQL-based funnel analysis to GitOps rollout.

§ WHAT I CAN DO

P2P marketplace and payments: peer-to-peer transaction flow design, escrow and appeal mechanics, dispute resolution, payment confirmation UX, fraud signal analysis, trust and safety mechanisms, order completion and conversion optimisation, merchant management

Product Management: continuous discovery, product vision and roadmap, MVP definition, PoC, A/B testing, user research and interviews, prototyping, product lifecycle management, go-to-market support, prioritisation

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, GitOps, CI/CD, release gating, same-day hotfix paths

Analytics and Data: funnel and churn analysis, KPI definition, SQL, Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, ETL

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management

AI Products and Tooling: LLM agents, agentic workflows, prompt engineering, human-in-the-loop design, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable

Technical Environments: Python, Kotlin, Django, REST APIs, Kafka, PostgreSQL, MongoDB, Docker, Kubernetes, ArgoCD, Jenkins, GitLab, Azure DevOps

Governance: GDPR, Deputy IT Security Officer, identity management, budget ownership, ROI reasoning

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI AND DATA 2024-2025

Spearheaded the internal AI and data platform for the FCAS programme across 15+ engineers; GitOps rollout cut deploy time from days to 30 minutes; pipeline runs up 200% after data-driven strategy redirect.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC SECTOR ANALYTICS 2023-2024

Owned national labour-market analytics platform; introduced Dagster and dbt saving 75% of data-update time; full bare-metal-to-container migration; Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023

Focused five-person team on top-10% features against agreed success measures; user acceptance up fivefold; CGM/KIS integration cut anamnesis time from 30 to 5 minutes.

EMIL GROUP · PRODUCT MANAGER · INSURANCE B2B SAAS 2022

Restructured 18-person delivery org into three lean teams; attrition near zero; Claims Center shipped concept to production; new insurance product launched in under one week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL AND PAYMENTS 2021-2022

Moved research to production across a matrix org in a full SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT DATA 2021

Data structures and identity management for Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · HEALTH INSURANCE
PROCUREMENT 2019-2020

Migrated legacy procurement system to Shopware for three AOK insurers and 20,000 employees; still in production.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · CONSTRUCTION
STAFFING MARKETPLACE 2025-PRESENT

Two-sided B2B marketplace built solo; anonymity-until-payment trust model; LLM agents across the funnel; SQL-based conversion analysis.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · QUANTUM-SECURE
ENCRYPTION 2016-2021

Owned backup, restore, and data-encryption product architecture; shipped three-layer product installing in under two minutes; later Chair of the board.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Built group-based mobile P2P payment product from zero; acquired by Sparkasse and operated inside the girocard ecosystem.

SMART SOIL TECHNOLOGIES · CO-FOUNDER CDO/CFO · NANOTECHNOLOGY
2018-2021

Lab to investor rounds; owned financial planning and investor reporting.
