

Philipp Hilbert. *Senior Product Manager, B2B Platform.*

Positioning, ten years owning technical B2B platforms end-to-end, from seller-facing tooling to data pipelines, in regulated and high-velocity environments.

§ WHY KAUF LAND E-COMMERCE

Kaufland's marketplace sits at the intersection of two things I find genuinely hard and interesting: building platform capabilities that serve a long tail of sellers with wildly different technical maturities, and doing it inside the governance structure of a Group without losing the start-up cadence the posting describes. The explicit call-out of "platform thinking to balance business goals, technical constraints, speed, scalability, and long-term ecosystem impact" is exactly how I framed the FCAS AI platform challenge at Rohde & Schwarz, where the constraint was multinational team alignment rather than seller diversity, but the balancing act was identical. The mention of MarTech and Selling Experience as the two platform pillars is concrete enough that I can already picture the seller adoption funnels and the integration surface. *That is exactly the kind of product problem where outcome-over-output discipline pays off fastest.*

§ AI-NATIVE STACK

Daily tools, not buzzwords.

- **Claude Code**, in-repo refactors and spec generation
- **GitHub Copilot**, paired development with engineering teams
- **Cursor / VSCode**, LLM-assisted feature slicing
- **Lovable**, rapid front-end prototyping for user-testing
- **Framer**, design-heavy workflow mockups

- **n8n**, agentic workflow orchestration
 - **GPT**, research synthesis and stakeholder-document drafting
 - **Gamma.app**, deck and go-to-market communication
-

§ TECHNICAL ENVIRONMENT

Shipped with, not just listed.

Kubernetes, OpenShift, Docker, ArgoCD, GitOps rollout and rollback, Jenkins CI/CD, GitLab, Azure DevOps, REST APIs, Dagster, dbt, PostgreSQL, MongoDB, Kafka, Python, Kotlin (Spring Boot), Django, Shopware, all in production contexts across defence AI, public-sector analytics, insurance SaaS, and healthcare platforms.

§ SIDE PROJECT

CONSTRUCT8 [GITHUB.COM/HILBERTP](https://github.com/hilbertp) →

Two-sided B2B marketplace matching construction firms with workers, zero to one alone.

- Anonymity-until-payment model protects both sides; WhatsApp and Telegram as the primary product surface to meet users where they already operate.
 - LLM agents across the funnel, sourcing, qualification, scheduling, so a single operator runs day-to-day without headcount.
 - Funnel and conversion analysis in SQL; architecture is file-queue-based agent loops with a lightweight web front end built in Lovable.
 - Direct analogue to Kaufland's seller onboarding problem: reducing friction for a non-technical supply side while keeping the platform economics intact.
-

§ HOW I WOULD WORK AT KAUFLAND E-COMMERCE

First weeks, concrete.

WEEK 1

Listen, map, find the gaps.

Sit in on seller support tickets, watch a handful of seller onboarding sessions live, and map the current Selling Experience or MarTech capability against what sellers are actually doing as workarounds, before touching the roadmap.

WEEK 2

Slice and validate.

Take the two or three highest-friction seller pain points surfaced in week 1, write testable hypotheses with agreed success metrics, and confirm with engineering which can be prototyped cheaply in the current sprint cycle.

WEEK 3+

Ship, measure, iterate.

Move the first validated slice to production, instrument adoption with the existing data stack, and open the first structured seller feedback loop so the next prioritisation cycle is driven by outcome data rather than assumptions.

I COVER LETTER

Dear Verena Schilmann,

Kaufland e-commerce is building the B2B platform infrastructure that determines whether sellers on an international marketplace grow or stall, and it is doing that inside one of Europe's most stable retail groups while deliberately keeping a start-up delivery cadence. That combination is unusual, and it is exactly the setup where a product manager with a technical background and a strong outcome-over-output discipline adds the most leverage.

My most directly relevant context is the AI and data platform I owned at Rohde & Schwarz for the FCAS European programme. The platform served highly technical users, engineers and data scientists across multinational teams, who needed reliable, fast, self-service tooling rather than a polished UI nobody would click. I instrumented two competing interaction models, discovered that the UI-first design recorded exactly zero production clicks, and redirected the entire roadmap toward a developer-code-first approach that increased pipeline runs by 200%. That is the same data-driven, seller-insight-first logic the posting describes for Selling Experience: you measure what sellers actually do, not what they say they need, and you build for the workflow that creates the most adoption.

On the MarTech and growth side, I bring the e-commerce domain anchor from the Shopware B2B procurement webshop I owned at AOK ITSCare, where I migrated three AOK insurers and roughly 20,000 employees off a legacy system and into a platform that is still in production. The operational complexity of a procurement webshop, catalogue management, buyer roles, approval flows, integration with downstream ERP systems, maps directly to the seller-facing marketing and listing tooling a marketplace platform needs to get right. I also understand the seller adoption funnel from the marketplace side: at construct8, my own two-sided B2B

marketplace, I instrumented the full funnel in SQL and iterated on onboarding friction in weeks, not quarters.

I work with AI tooling daily, Claude Code, GitHub Copilot, Lovable, n8n for agentic workflows, and I treat these as a PM's leverage on speed, not as a technology to evangelise. The posting's call for someone who "explores and experiments with emerging technologies from experimentation to production" resonates: at Bundesagentur für Arbeit I introduced Dagster and dbt into a quarterly ETL cycle and cut data-update time by 75%, not because the tools were interesting but because the outcome was the only thing that mattered.

I am based in Berlin, hold EU citizenship, and am available on four weeks' notice. I would welcome a conversation about where the Selling Experience or MarTech platform has the highest unsolved friction today.

Best regards, *Philipp Hilbert*

II CURRICULUM VITAE

§ BEARING

Product Manager with 13 years owning technical B2B platforms in regulated and high-velocity environments, defence AI, public-sector data, insurance SaaS, healthcare, payments, and e-commerce. I translate complex seller and operator workflows into prioritised roadmaps, lead cross-functional teams through agile delivery, and measure success by adoption and outcome metrics rather than feature count. My technical fluency across APIs, data flows, CI/CD, and system integrations means I can hold an architecture conversation and a stakeholder presentation in the same morning.

§ WHAT I CAN DO

Platform and B2B Product Management: product vision and roadmap, B2B platform strategy, e-commerce seller tooling, API and integration product design, platform thinking, go-to-market support, product lifecycle management.

Data and Analytics: funnel and churn analysis, KPI definition, ETL (extract, transform, load), Dagster, dbt, PostgreSQL, Matomo, MicroStrategy, data-driven product decisions.

AI Products and Tooling: LLM agents, agentic workflows, prompt and context engineering, human-in-the-loop design, AI governance, EU AI Act, Explainable AI (XAI); Claude Code, GitHub Copilot, Cursor, Lovable, n8n.

Product Ownership: requirements engineering, user stories, acceptance criteria, backlog refinement, sprint planning, velocity and burndown, UAT, Jira, Confluence, Figma, Miro.

Agile and Scaled Delivery: Scrum, Kanban, SAFe, ART, PI planning, GitOps rollout, CI/CD, regression and end-to-end test automation.

Stakeholder and Leadership: cross-functional team leadership, C-level reporting, workshop facilitation, conflict resolution, change management.

Technical Environments: Kubernetes, OpenShift, Docker, ArgoCD, Jenkins, GitLab, Azure DevOps, REST APIs, Python, Kotlin (Spring Boot), Django, SQL, PostgreSQL, MongoDB, Kafka, Shopware.

Governance: GDPR (DSGVO), Deputy IT Security Officer, identity management, budget ownership.

§ PROFESSIONAL EXPERIENCE

ROHDE & SCHWARZ · PRODUCT MANAGER · DEFENCE AI & DATA PLATFORM 2024-2025

GitOps delivery with ArgoCD cut rollout time from days to 30 minutes for the FCAS AI and data platform; redirected roadmap from UI-first to developer-code-first after instrumentation showed zero UI adoption, lifting pipeline runs 200%; led 15+ engineers and data scientists in Scrum across multinational teams.

BUNDESAGENTUR FÜR ARBEIT · PRODUCT MANAGER · PUBLIC-SECTOR ANALYTICS 2023-2024

Integrated test automation into Jenkins, introduced Dagster and dbt, cut data-update time by 75%; migrated bare-metal to containers; carried full UI relaunch and large ETL migration concurrently. Deputy IT Security Officer.

CLINET PLATFORMS · PRODUCT OWNER · HEALTHCARE MOBILE 2023-2023

Cut roadmap to top 10% of features by agreed success measures; user acceptance rose fivefold. Integrated CGM/KIS interface, reducing anamnesis time from 30 minutes to 5.

EMIL GROUP · PRODUCT MANAGER · B2B SAAS INSURANCE PLATFORM
2022-2022

Restructured 18-person delivery org into three lean teams; attrition fell from near-total exodus to one departure. Shipped Claims Center from concept to production; cut time-to-market for new insurance products from months to under a week.

SCHEIDT & BACHMANN · PRODUCT OWNER · RETAIL & PAYMENTS POS
2021-2022

Moved research results into production across a matrix organisation in a fully SAFe setup with agile release trains and PI planning.

BUNDESDRUCKEREI · PRODUCT OWNER (INTERIM) · SECURE GOVERNMENT
DATA 2021-2021

Data structures and identity management for the Robert Koch Institute programmes DIM and DESH.

AOK ITSCARE · PRODUCT OWNER (PROXY) · B2B E-COMMERCE
PROCUREMENT 2019-2020

Migrated legacy system to Shopware for three AOK insurers and 20,000 employees; still in production. Backlog refinement, user stories and acceptance criteria in Jira.

ENERCON · PROJECT LEAD · WIND ENERGY IT 2019-2019

Full site IT modernisation end to end.

WALDBURG-ZEIL KLINIKEN · PRODUCT OWNER · CLINICAL NETWORK
2017-2018

Wifi infrastructure rollout across nine hospitals.

§ FOUNDER & EARLY-STAGE EXPERIENCE

CONSTRUCT8 · FOUNDER AND PRODUCT MANAGER · B2B MARKETPLACE
2025-PRESENT

Two-sided marketplace matching construction firms with workers, zero to one; LLM agents across the funnel, SQL-based funnel analysis, WhatsApp/Telegram as product surface.

QCRYPT AG · CO-FOUNDER AND PRODUCT OWNER · IT SECURITY 2016-2021

Quantum-secure encryption hardware and software; shipped three-layer product installing in under two minutes for enterprise buyers. Later Chair of the board.

SMART SOIL TECHNOLOGIES · CO-FOUNDER, CDO AND CFO · AGRI-TECH
2018-2021

Laboratory to investor rounds; owned financial planning and investor reporting.

KVITT PAYMENT SOLUTIONS · FOUNDER AND CFO · FINTECH P2P
PAYMENTS 2013-2018

Mobile group-based P2P payment product built from zero; acquired and operated by Sparkasse inside the girocard ecosystem.

§ LANGUAGES

German, native (C2). English, C2, business and technical fluency.
